Dear Ms. Creedon and Mr. Pulupa:

Atlantic Oil Company (Atlantic) is very small independent Oil Company founded in 1933. We currently have sixteen employees, with seven of them working in the Edison/ Mt. View Oil Fields.
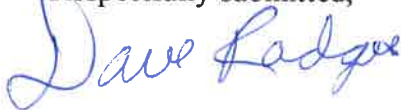

The production from the fields have declined to the point that our profit is marginal at best. Atlantic's production is dependent on the disposal of produced water to Valley Water for treatment and disposal.

The reason we are discussing Valley Water in the first place is because, as a current operator in the area, we have the environment at the top of our priorities. This can be demonstrated by the money we have invested over the years in removing sumps, replacing tanks, and laying several miles of pipeline to Valley Water to responsibly dispose of our produced water.

If we do not have the ability to treat our produced water at Valley Water, we may be forced to shut in our wells. Not only will the jobs of Atlantic employees be at risk, the paid royalties to Atlantic's approximately 125 mineral owners will end. Some of these owners are on fixed income and rely on this income.

With all the money we have spent in the past to clean up our operations we would hope you would allow us additional time to address any potential issues at Valley Water's facilities and to explore available alternatives going forward. Most importantly, the currently proposed date of August 15, 2015 to cease irrigation at the Race Track Hill Facility must be deleted from the proposed Cease and Desist Order as that will put our oil field out of production.

Respectfully submitted,

DAVID RODGERS
General Manager
