Discharger and Tentative Order Information

The Central Valley Regional Water Quality Control Board (Central Valley Water Board) adopted Order R5-2022-0006, General Waste Discharge Requirements for Limited Threat Discharges to Surface Water (Limited Threat General Order), on 17 February 2022. The Limited Threat General Order was amended to R5-2022-0006-01 by Order R5-2023-0015 on 27 April 2023. The Limited Threat General Order applies to individuals, public agencies, private businesses, and other legal entities discharging limited threat wastewater to waters of the United States within the Central Valley Region.

A tentative Order is proposed to amend the Limited Threat General Order to include an enrollment discharge category and an associated fee specific to ambient streamflow augmentation projects. The amendment also proposes minor edits and corrections, consistent with applicable water quality control plans and regulations, including language related to the implementation of Secondary Maximum Contaminant Levels (MCLs) for protection of the Municipal and Domestic Supply (MUN) beneficial use, temperature criteria in the Sacramento-San Joaquin Delta and dissolved oxygen criteria in water bodies designated as cold freshwater habitat (COLD) and/or spawning, reproduction, and/or early development (SPWN). Finally, the amendment clarifies Notice of Intent requirements for existing discharges.
