Proposed Order

If adopted, Waste Discharge Requirements (WDRs) Order R5-2025-XXXX will prescribe requirements for management of waste discharged from the City of Modesto Water Quality Control Facility. The Facility consists of three components: the Sutter Plant, the Jennings Plant, and the Modesto Ranch. The components are located at 1221 Sutter Avenue in Modesto (Sutter Plant) and 7007 Jennings Road, in Modesto (Jennings Plant and Modesto Ranch). The WQCF is owned and operated by the City of Modesto (Discharger). The Discharger will be responsible for maintaining compliance with Order requirements. The WQCF collects and treats domestic and industrial wastewater. Treated wastewater (recycled water) and biosolids are used as irrigation for crops and as a soil amendment, respectively, at the Modesto Ranch. The Facility's waste discharges are currently regulated under WDRs Order 94-030 (for biosolids) and Order 99-112 (for land application of recycled water). If adopted, the proposed WDRs Order R5-2025-XXXX will rescind and replace the previous WDRs Orders and will result in revised and updated limits, inclusion of the Salt and Nitrate Control Programs, among others.

To conserve paper and reduce mailing costs, a paper copy of the proposed Order was sent only to the Discharger(s). All others may access a digital copy of the Order on the Central Valley Water Board's [Tentative Orders website](#), under the heading, "Discharger-Specific Order for Future Board Meetings," at
