The Winters Landfill is an inactive municipal solid waste (MSW) landfill facility on a about one-mile northwest of downtown Winters. The landfill operated from 1962 to 1975, accepting primarily MSW and agricultural wastes. The 29.5-acre site previously operated as a burn dump. A 1989, elevated concentrations of general minerals indicative of landfill impacts were detected in groundwater at the site. In June 2000, surface ash and other debris from historical operations were excavated and consolidated into the landfill as a corrective action measure. A two-foot thick interim soil cover was also placed over the landfill.

Further information about the facility and the proposed requirements can be found in the Findings and Information Sheet of the tentative WDRs available on the Central Valley Water Board's website at:
