

CALIFORNIA REGIONAL WATER QUALITY CONTROL BOARD
CENTRAL VALLEY REGION

TENTATIVE ORDER NO. R5-2020-XXXX

RESCINDING WASTE DISCHARGE REQUIREMENTS

The California Regional Water Quality Control Board, Central Valley Region, finds that the Board adopted the following Order, which is no longer applicable for the reasons shown.

**UNITED STATES DEPARTMENT OF INTERIOR, NATIONAL PARK SERVICE,
SEQUOIA AND KINGS CANYON NATIONAL PARKS; CLOVER CREEK
WASTEWATER TREATMENT FACILITY; WASTE DISCHARGE REQUIREMENTS
ORDER 88-031; TULARE COUNTY**

Waste Discharge Requirements Order (WDRs) Order 88-031, adopted on 26 February 1988, prescribes requirements for the United States Department of Interior, National Park Service, Sequoia and Kings Canyon National Parks (Discharger), Clover Creek Wastewater Treatment Facility (WWTF) for a monthly average discharge of 170,000 gallons per day (gpd) to spray fields (summer disposal) and 82,000 gpd to leach fields (winter disposal).

On 18 December 2019, a Report of Waste Discharge was submitted requesting coverage under the State Water Resources Control Board Water Quality Order 2014-0153-DWQ, *General Waste Discharge Requirements for Small Domestic Wastewater Treatment Systems* (General Order). On 12 August 2020, a Notice of Applicability was issued to the Discharger for coverage under the General Order. The Discharger was assigned enrollee number 2014-0153-DWQ-R5342. The Notice of Applicability establishes a flow limitation of 95,000 gpd to the spray fields and 82,000 gpd to the leach field. Therefore, it is appropriate to rescind WDRs Order 88-031.

IT IS HEREBY ORDERED that the above Order is rescinded.

I, PATRICK PULUPA, Executive Officer, do hereby certify the foregoing is a full, true, and correct copy of an Order adopted by the California Regional Water Quality Control Board, Central Valley Region on XX October 2020.

TENTATIVE

PATRICK PULUPA, Executive Office
