Tentative Time Schedule Order Information

The City of Williams (Discharger) is the owner and operator of the Wastewater Treatment Plant (Facility), located at 501 N. Colusa Cut Opf Road, Williams, California. The Facility provides sewerage service to the community of Williams and serves a population of approximately 5,487. The Facility discharges tertiary treated wastewater to Salt Creek, a water of the United States.

Discharges from the Facility are proposed to be regulated by Notice of Applicability R5-2023-0025-009 (NOA), authorizing coverage under the Municipal Wastewater Dischargers That Meet Objectives/Criteria at the Point of Discharge to Surface Water Order R5-2023-0025 (Municipal General Order), with an effective date of 1 January 2026. A Time Schedule Order is proposed to allow the Discharger time to comply with the proposed final effluent limitations for electrical conductivity contained in the NOA. The Discharger has made diligent efforts to comply with the final effluent limitations for electrical conductivity but has demonstrated that additional time is needed to comply. Therefore, a Time Schedule Order is proposed to allow additional time for compliance with these final effluent limitations until 31 December 2030.
