CITY OF WOODLAND
WATER POLLUTION CONTROL FACILITY
YOLO COUNTY

Discharger and Tentative Order Information

The City of Woodland (Discharger) is the owner and operator of the Water Pollution Control Facility (Facility), located at 42929 County Road 24, Woodland, California. The Discharger provides sewerage service for the City of Woodland and serves a population of approximately 59,000. The design daily average flow capacity of the Facility is 10.4 million gallons per day (MGD). From August 2021 through July 2024, the average surface water discharge was 3.5 MGD. The Facility receives wastewater from domestic sources and one permitted non-domestic discharger. The Facility discharges tertiary-treated municipal wastewater to Tule Canal, a water of the United States within the Yolo Bypass, and primary and secondary treated municipal wastewater in the Facility's algae production ponds to groundwater.

Discharges from the Facility are currently regulated by Waste Discharge Requirements Order R5-2020-0015, issued by the Central Valley Regional Water Quality Control Board (Central Valley Water Board) on 16 April 2020. An Order is proposed to renew the NPDES permit. The tentative Order includes new or updated effluent limitations for ammonia, nitrate plus nitrite, total selenium, and chronic toxicity. The tentative Order removes effluent limits for acute toxicity and the performance-based effluent limitation for electrical conductivity. The tentative Order also expands groundwater monitoring and includes pond monitoring in lieu of monitoring the wastewater water being discharged to the ponds.
