

Central Valley Regional Water Quality Control Board

PUBLIC NOTICE

Natomas Air Park Parcel 32
3801 Airport Road, Sacramento, CA

PENDING

**No Further Action Determination
Public Comment Period:**
1 August 2025 – 31 August 2025

PUBLIC NOTICE:

The Central Valley Regional Water Quality Control Board (Central Valley Water Board) invites public comment on consideration of a *No Further Action Determination* (NFA) for the Site Cleanup case located at 3801 Airport Road (the Site). The property owner has removed contaminated soil. Soil was contaminated with aviation fuel and pesticides. The Site use to be part of the Natomas Air Park. Planes that sprayed pesticides on crops were cleaned at the Site many years ago.

NOTICE TO THE HEARING IMPAIRED:

TDD users can obtain information about the Site by using the California State Relay Service (800) 735-2929 to reach the Public Participation Specialist. Ask them to contact the Central Valley Water Board at (916) 464-3291 regarding consideration of a No Further Action Determination for Natomas Air Park Parcel 32 – 3801 Airport Road.

CASE SUMMARY:

The Natomas Air Park formerly used the Site and surrounding areas. In 2009 and 2016, other areas formerly operated by the Natomas Air Park received No Further Action determinations under other Site Cleanup Program cases. Soil excavation at Parcel 32 and the areas surrounding Parcel 32 removed over 40,000 cubic yards of contaminated soil in total. Recent soil sampling indicated that a few pesticides are present at concentrations below the residential Environmental Screening Level (ESL). Small amounts of heptachlor epoxide remain in shallow groundwater and is expected to continue decreasing in concentration over time. Central Valley Water Board staff consider the remedial actions at the Site have been effective and there is not an ongoing threat to human health, water quality, or the environment. It should be noted that tap water in the area is provided by the City of Sacramento, which sources its water from areas outside of and away from the Site. Tap water is not affected by the Site.

Central Valley Water Board staff have reviewed the soil and groundwater conditions at the Site and concur that an NFA determination is appropriate.

NICHOLAS AVDIS, CHAIR | PATRICK PULUPA, EXECUTIVE OFFICER
