PUBLIC NOTICE:
PROPOSED PETROLEUM UNDERGROUND STORAGE TANK CASE CLOSURE

PUBLIC COMMENT PERIOD: 16 November through 15 January 2027

EFUEL YUBA CITY; 740 N GEORGE WASHINGTON BLVD, SUTTER COUNTY;
LUST CASE #10194184, GLOBAL ID #T10000024254

The Central Valley Regional Water Quality Control Board (Central Valley Water Board) is asking for public comments. We plan to close the leaking tank case known as eFuel Yuba City. The case is located at 740 N George Washington Blvd in Yuba City, California.

In December 2025, the property owner removed two underground fuel tanks from the property. After the removal of the tanks, Central Valley Water Board staff found that diesel had leaked under the tanks and contaminated the soil.

In May 2026, the property owner conducted additional testing of the soil and groundwater at the property. Central Valley Water Board staff reviewed the results and determined that the remaining diesel fuel in the soil and groundwater does not pose a significant risk to people, the environment, or future use of the property. Because the risk is low, we plan to close case under California's Low-Threat Closure Policy. We will review all public comments before making a final decision. A map is attached that shows the property location and the where the remaining dissolved gasoline is found in groundwater.

FOR MORE INFORMATION

You can find additional information on the case's GeoTracker webpage here: eFuel Yuba City (https://geotracker.waterboards.ca.gov/profile_report.asp?global_id=T10000024254). Please contact Marissa Hartley with the Central Valley Regional Water Quality Contol Board if you have any comments or questions about this Public Notice or about the environmental investigation activities at eFuel Yuba City:
