Concerning

An Amendment to the Water Quality Control Plans for the Sacramento River and San Joaquin River Basins and the Tulare Lake Basin to Incorporate a Process into the Basin Plans for Determining Appropriate Designation and Level of Protection of Municipal and Domestic Supply (MUN) in Agriculturally Dominated Water Bodies

NOTICE IS HEREBY GIVEN THAT the Central Valley Water Board will accept comments regarding a proposed amendment (the "Proposed Amendment") to the Water Quality Control Plans for the Sacramento River and San Joaquin River Basins and the Tulare Lake Basin (Basin Plans). The Proposed Amendment will establish a region-wide process for evaluating the Municipal and Domestic Supply (MUN) beneficial use in agriculturally dominated surface water bodies.

The Board's Basin Planning Program is considered a certified regulatory program, which means that the Board is exempt from the requirement to prepare an environmental impact report for basin planning activities under the California Environmental Quality Act. (Pub. Res. Code, § 21080.5; Cal. Code Regs., tit. 14, § 15251(g).) The Board's environmental review of the proposed Basin Plan Amendment is instead contained in a draft Staff Report, which is considered part of the "substitute environmental documentation" or "SED", and which will be posted on the Board's website (below) along with the Proposed Amendment no later than **23 January 2017**:
