WASTE DISCHARGE REQUIREMENTS FOR DREDGED OR FILL DISCHARGES TO WATERS OF THE STATE

ORDER R7-2021-0018

Effective Date: May 11, 2021

Program Type: Fill/Excavation

Project Type: Alternative energy (Wind)

Project: Alta Mesa Wind Project
Regulatory Measure ID: 441993
WDID: 7A333225001
Place ID: 871690

Applicant: AM Wind Repower LLC (Alta Mesa)
Applicant Contact: Jonathan Kirby (Compliance Manager)
200 Liberty Street, 14th Floor
New York, NY 10281
Phone: (213) 212-0781
Email: jonathan.kirby@brookfieldrenewable.com

Applicant’s Agent: Aspen Environmental Group
Jenny Slaughter
5020 Chesebro Road, Suite 200
Agoura Hills, CA 91301
Phone: (818) 292-2328
Email: JSaughter@aspeneg.com

Regional Water Board Staff: Kai Dunn
Senior Water Resources Control Engineer
73-720 Fred Waring Drive, Suite 100
Palm Desert, CA 92260
Phone: (760) 776-8986
Email: kai.dunn@waterboards.ca.gov
Regional Water Board Contact Person:
If you have any questions, please call the Colorado River Basin Regional Water Quality Control Board (Colorado River Basin Water Board) staff contact listed above or (760) 346-7491 and ask to speak with the 401 Water Quality Certification Program Manager.

Attachment E Reporting Requirements .......................................................................................................................... 1
I. Order
This Order for Waste Discharge Requirements (Order) is issued at the request of the AM Wind Repower LLC (Alta Mesa or Permittee), a subsidiary of Brookfield Renewable Energy, for the Alta Mesa Wind Project (Project). This Order is for the purpose described in the application submitted by the Permittee. The application was received on January 11, 2021. The application was deemed complete on February 19, 2021.

II. Public Notice
The Colorado River Basin Water Board has notified the Permittee and all known interested agencies and persons of its intent to issue WDRs for this discharge and has provided them with an opportunity to submit comments and to participate in a public meeting. The Colorado River Basin Water Board, in a public meeting, heard and considered all comments pertaining to this discharge.

III. Project Purpose
The Project will repower the existing Alta Mesa Wind Project by replacing and upgrading wind energy generation equipment and facilities.

IV. Project Description
The Permittee proposes to install seven new wind turbine generators (WTG) at the Project site located approximately 11 miles northwest of the City of Palm Springs in Riverside County as shown in Figure 5, to produce up to 27 megawatts (MW) of wind energy. The new WTGs will replace 159 old WTGs, which will be decommissioned and removed. The land zoning at the site is for Wind Energy (W-E), and the nearest sensitive receptors to the new WTGs are rural residences in Bonnie Bell, the closest of which are 4,500 and 4,900 feet east of the Project.

The Permittee is planning to construct the Project in tandem with the adjacent Mesa Wind Repowering Project, which is situated on U.S. Bureau of Land Management (BLM) land and currently going through a separate but similar permitting process. Concurrent repowering and construction of the two projects would provide efficiencies and minimize total ground disturbance, traffic, and temporary impacts on environmental resources.

The Project will necessitate ground disturbance for access roads and WTG construction pads. In most cases, the new access roads will follow existing roads and new disturbance will be kept to a minimum. However, some roads will need to be widened, and some of the new turbines will be located away from existing disturbances. Additionally, some temporary roads will be added to allow access for construction equipment. Both the main access road and construction yard would be shared by the Project and the Mesa Wind Repower Project, which are being permitted concurrently.
V. Project Location
The Project site is located on private lands in unincorporated Riverside County, approximately 11 miles northwest of the City of Palm Springs and within Assessor Parcel Numbers (APNs) 516020001 and 516020002. It is west of the Whitewater River and east of Cottonwood Creek, shown on the White Water USGS 7.5-minute topographic quad (USGS, 1955). The Project site is approximately one mile west of the active Whitewater River channel. Maps showing the Project location are found in Attachment A of this Order.

VI. Project Impact and Receiving Waters Information
The Project is located within the jurisdiction of the Colorado River Basin Water Board. Receiving waters and groundwater potentially impacted by the Project are protected in accordance with the Water Quality Control Plan for the Colorado River Basin Region (Basin Plan) and other plans and policies, which may be accessed online at: http://www.waterboards.ca.gov/plans_policies/. The Basin Plan includes water quality standards, which consist of existing and potential beneficial uses of waters of the state, water quality objectives to protect those uses, and the state and federal antidegradation policies.

Project impact and receiving waters information can be found in Attachment B. Table 1 of Attachment B shows the receiving waters and beneficial uses of waters of the state impacted by the Project. Individual impact location and quantity is shown in Table 2 of Attachment B.

VII. Description of Direct Impacts to Waters of the State
The Project would permanently impact habitat considered waters of the state within onsite drainages, ditches, swales, and depressions.

Total Project fill/excavation quantities for all impacts are summarized in Table 1. Permanent impacts are categorized as those resulting in a physical loss in area and also those degrading ecological conditions only.

<table>
<thead>

<tbody>
<tr>
<td>N/A</td>
<td>0.20 acres</td>
<td>N/A</td>
</tr>
<tr>
<td></td>
<td>1,075 linear feet</td>
<td></td>
</tr>
</tbody>
</table>

¹ Includes only temporary direct impacts to waters of the state and does not include upland areas of temporary disturbance which could result in a discharge to waters of the state. Temporary impacts, by definition, are restored to pre-project conditions and therefore do not include a physical loss of area or degradation of ecological condition.
VIII. Compensatory Mitigation
As mitigation for permanent impacts to 0.20 acres of waters of the state, the Permittee has agreed to provide mitigation at a 1:1 mitigation to impact ratio.

IX. California Environmental Quality Act (CEQA)
On March 3, 2021, the Riverside County Planning Department, as lead agency, adopted an Initial Study/Mitigated Negative Declaration (IS/MND) for the Project (Environmental Assessment No. CEQ 200004) and filed a Notice of Determination (NOD) on March 4, 2021.

As a responsible agency, the Colorado River Basin Water Board has reviewed and considered the environmental documents prepared by the Riverside County Planning Department and finds that they address the Project’s water resource impacts. (Cal. Code Regs., tit. 14, § 15096, subd. (h).) Pursuant to CEQA, the Colorado River Basin Water Board has made Findings of Facts (Findings) which support the issuance of this Order and are included in Attachment C.

X. Petitions for Review
Any person aggrieved by the Colorado River Basin Water Board action may petition the State Water Board for review in accordance with Water Code section 13320 and California Code of Regulations, title 23, section 2050 et seq. The State Water Board must receive the petition by 5:00 p.m. on the 30th day after the adoption date of this Order; if the 30th day falls on a Saturday, Sunday, or state holiday, the petition must be received by the State Water Board by 5:00 p.m. on the next business day. Copies of the statutes and regulations applicable to filing petitions are available on the State Water Board’s website and can be provided upon request.

XI. Fees Received
An application fee and project fee in a total of $3,683.00 was received on January 12, 2021. The fee amount was determined as required by California Code of Regulations, title 23, sections 3833(b)(3) and 2200(a)(3) and was calculated as category A - Fill & Excavation Discharges (fee code 84) with the dredge and fill fee calculator.

XII. Conditions
The Colorado River Basin Water Board has independently reviewed the record of the Project to analyze impacts to water quality and designated beneficial uses within the watershed of the Project. In accordance with this Order, the Permittee may proceed with the Project under the following terms and conditions:

A. Authorization
Impacts to waters of the state shall not exceed quantities shown in Table 1.
B. Reporting and Notification Requirements

The following section details the reporting and notification types and timing of submittals. Requirements for the content of these reporting and notification types are detailed in Attachment E, including specifications for photo and map documentation during the Project.

Written reports and notifications must be submitted using the Reporting and Notification Cover Sheet located in Attachment E, which must be signed by the Permittee or an authorized representative.

1. Project Reporting

a. Monthly Reporting: The Permittee must submit a Monthly Report to the Colorado River Basin Water Board on the 15th day of each month for the duration of the construction phase. Monthly reporting shall continue until the Colorado River Basin Water Board issues a Notice of Project Complete Letter to the Permittee and this Order is terminated by vote of the Colorado River Basin Water Board.

b. Annual Reporting: The Permittee must submit an Annual Report including activities conducted for the previous fiscal year (July 1–June 30) to the Colorado River Basin Water Board on the 1st of September. Annual Reports must be submitted even if Project construction has not begun. Annual reporting shall continue until a Notice of Project Complete Letter is issued to the Permittee and this Order is terminated by vote of the Colorado River Basin Water Board.

c. Other Reporting: If pollutants are observed in surface water, the Permittee shall submit a report to the Colorado River Basin Water Board within 30 days after encountering the pollutants and describe actions taken to correct the problem and provide photographic documentation that supports the information in the report.

If repairs are required, the Permittee shall take pictures of the area where work needs to take place, documenting the before and after conditions of the area, and shall maintain a daily log for each site where work is taking place pursuant to this Order, while the Permittee conducts its repair activities. The log shall:

- Provide a general description of the repair work;
- Specify the date and daily starting and ending time for the repair work;
- Note key weather conditions (e.g., temperature, wind speed and direction, precipitation, if any);
- Include notes from visual observations regarding the presence/absence of construction debris/trash (e.g., discarded filter fiber) and used oil (e.g., oil that leaks from construction equipment) in the area where the work has taken place.
Within 30 days following completion of all repair work, the Permittee shall submit to the Colorado River Basin Water Board a summary report of the key daily log entries. The summary report shall include the above-mentioned before and after pictures of the conditions of the area and shall be signed by the Permittee's Project Manager.

2. Project Status Notifications

a. Commencement of Construction: The Permittee shall submit a Commencement of Construction Report at least seven (7) days prior to start of initial ground disturbance activities.

b. Request for Notice of Completion of Discharges Letter: The Permittee shall submit a Request for Notice of Completion of Discharges Letter following completion of active Project construction activities, including any required restoration and permittee-responsible mitigation. This request shall be submitted to the Colorado River Basin Water Board staff within 30 days following completion of all Project construction activities. Upon acceptance of the request, Colorado River Basin Water Board staff will issue a Notice of Completion of Discharges Letter to the Permittee which will end the active discharge period and associated annual fees.

c. Request for Notice of Project Complete Letter: The Permittee shall submit a Request for Notice of Project Complete Letter when construction and/or any post-construction monitoring is complete, and no further Project activities will occur. This request shall be submitted to Colorado River Basin Water Board staff within 30 days following completion of all Project activities. Upon approval of the request, the Colorado River Basin Water Board staff will issue a Notice of Project Complete Letter to the Permittee and prepare a draft order terminating this Order for approval by vote of the Colorado River Basin Water Board. Board approval of the termination will end the post discharge monitoring period and associated annual fees.

3. Conditional Notifications and Reports:

The following notifications and reports are required as appropriate.

a. Accidental Discharges of Hazardous Materials: Following an accidental discharge of a reportable quantity of a hazardous material, sewage, or an unknown material, the following applies (Wat. Code, § 13271):

2 Completion of post-construction monitoring shall be determined by Colorado River Basin Water Board staff and shall be contingent on successful attainment of restoration and mitigation performance criteria.

3 "Hazardous material" means any material that, because of its quantity, concentration, or physical or chemical characteristics, poses a significant present or potential hazard to human health and safety or to the environment if released into the workplace or the environment. "Hazardous materials" include, but are not limited to, hazardous substances, hazardous waste, and any material that a handler or the administering agency has a reasonable basis for believing that it would be injurious to the health and
i. As soon as (A) the Permittee has knowledge of the discharge or noncompliance, (B) notification is possible, and (C) notification can be provided without substantially impeding cleanup or other emergency measures, then:

- first call – 911 (to notify local response agency)

- then call – Office of Emergency Services (OES) State Warning Center at: (800) 852-7550 or (916) 845-8911

- Lastly, follow the required OES procedures as set forth in:

ii. Following notification to OES, the Permittee shall notify the Colorado River Basin Water Board, as soon as practicable (ideally within 24 hours). Notification may be via telephone, e-mail, delivered written notice, or other verifiable means.

iii. Within five (5) working days of notification to the Colorado River Basin Water Board, the Permittee must submit an Accidental Discharge of Hazardous Material Report.

b. Violation of Compliance with Water Quality Standards: The Permittee shall notify the Colorado River Basin Water Board of any event causing a violation of compliance with water quality standards. Notification may be via telephone, e-mail, delivered written notice, or other verifiable means.

i. Examples of noncompliance events include lack of stormwater treatment following a rain event, discharges causing a visible plume in a water of the state, and runoff from water contact with uncured concrete.

ii. This notification must be followed within three (3) working days by submission of a Violation of Compliance with Water Quality Standards Report.

c. In-Water Work:

i. The Permittee shall notify the Colorado River Basin Water Board at least 48 hours prior to initiating work in water or stream diversions. Notification may be via telephone, e-mail, delivered written notice, or other verifiable means.

---

safety of persons or harmful to the environment if released into the workplace or the environment. (Health & Saf. Code, § 25501.)
ii. Within three (3) working days following completion of work in water or stream diversions, an In-Water Work/Diversions Water Quality Monitoring Report must be submitted to Colorado River Basin Water Board staff.

d. **Modifications to Project:** Project modifications may require an amendment of this Order. The Permittee shall give advance notice to Colorado River Basin Water Board staff if Project implementation as described in the application materials is altered in any way or by the imposition of subsequent permit conditions by any local, state or federal regulatory authority by submitting a Modifications to Project Report. The Permittee shall inform Colorado River Basin Water Board staff of any Project modifications that will interfere with the Permittee’s compliance with this Order.

e. **Transfer of Property Ownership:** This Order is not transferable in its entirety or in part to any person or organization except after notice to the Colorado River Basin Water Board in accordance with the following terms:

   i. The Permittee must notify the Colorado River Basin Water Board of any change in ownership or interest in ownership of the Project area by submitting a Transfer of Property Ownership Report. The Permittee and purchaser must sign and date the notification and provide such notification to the Colorado River Basin Water Board at least 10 days prior to the transfer of ownership.

   ii. Until such time as this Order has been modified to name the purchaser as the permittee, the Permittee shall continue to be responsible for all requirements set forth in this Order.

f. **Transfer of Long-Term BMP Maintenance:** If maintenance responsibility for post-construction best management practices (BMPs) is legally transferred, the Permittee must submit to the Colorado River Basin Water Board a copy of such documentation and must provide the transferee with a copy of a long-term BMP maintenance plan that complies with manufacturer or designer specifications. The Permittee must provide such notification to the Colorado River Basin Water Board with a Transfer of Long-Term BMP Maintenance Report at least 10 days prior to the transfer of BMP maintenance responsibility.
C. Water Quality Monitoring

1. **General:** If surface water is present, continuous visual surface water monitoring shall be conducted to detect accidental discharge of construction related pollutants (e.g. oil and grease, turbidity plume, or uncured concrete).

2. **Accidental Discharges/Noncompliance:** Upon occurrence of an accidental discharge of hazardous materials or a violation of compliance with a water quality standard, Colorado River Basin Water Board staff may require water quality monitoring based on the discharge constituents and/or related water quality objectives and beneficial uses.

3. **In-Water Work or Diversions:** For projects involving planned work in water or stream diversions, a water quality monitoring plan shall be submitted to Colorado River Basin Water Board staff for acceptance at least 30 days in advance of any discharge to the affected water body. Water quality monitoring shall be conducted in accordance with the approved plan.

Sampling shall be conducted in accordance with Table 2 sampling parameters, and work in water or stream diversionary discharge(s) to waters of the state shall conform to the following water quality standards\(^4\) at a minimum.

**Table 2: Sample Type and Frequency Requirements**

---

\(^4\) Pollutants shall be analyzed using the analytical methods described in 40 Code of Federal Regulations part 136; where no methods are specified for a given pollutant, the method shall be approved by Colorado River Basin Water Board’s Executive Officer. Grab samples shall be taken between the surface and mid-depth and not be collected at the same time each day to get a complete representation of variations in the receiving water. A hand-held field meter may be used, provided the meter utilizes a USEPA-approved algorithm/method and is calibrated and maintained in accordance with the manufacturer’s instructions. A calibration and maintenance log for each meter used for monitoring shall be maintained onsite.

\(^5\) Waters shall be free of changes in turbidity that cause nuisance or adversely affect beneficial uses.

\(^6\) The natural receiving water temperature of surface waters shall not be altered by discharges of waste unless it can be demonstrated to the satisfaction of the Regional Water Board that such alteration in temperature does not adversely affect beneficial uses.
In the event that water quality sampling shows an exceedance of water quality objectives notify the Colorado River Basin Water Board in the Monthly Report.

4. **Post-Construction:** The Permittee shall visually inspect the Project site during the rainy season for five (5) years to ensure excessive erosion, stream instability, or other water quality pollution is not occurring in or downstream of the Project site. If water quality pollution is occurring, the Permittee shall contact the Colorado River Basin Water Board staff member overseeing the Project within three (3) working days. The Colorado River Basin Water Board may require the submission of a Violation of Compliance with Water Quality Standards Report. Additional permits may be required to carry out any necessary site remediation.

D. **Standard**

1. This Order is subject to modification or revocation upon administrative or judicial review, including review and amendment pursuant to Water Code section 13320, and California Code of Regulations, title 23, division 3, chapter 6 commencing with section 2050. Additionally, the Colorado River Basin Water Board reserves the right to suspend, cancel, or modify and reissue this Order, after providing notice to the Permittee, if the Colorado River Basin Water Board determines that: the Project fails to comply with any of the conditions of this Order; or, when necessary to implement any new or revised water quality standards and implementation plans adopted or approved pursuant to the Porter-Cologne Water Quality Control Act (Wat. Code, § 13000 et seq.).

2. This Order is conditioned upon total payment of any fee required under title 23 of the California Code of Regulations and owed by the Permittee.

E. **General Compliance**

1. The Colorado River Basin Water Board reserves the right to take any enforcement action authorized by law. Accordingly, failure to timely comply with any provisions of this Order may subject the Discharger to enforcement action. Such actions include, but are not limited to, the assessment of administrative civil liability pursuant to Water Code sections 13323, 13268, and 13350, a Time Schedule Order (TSO) issued pursuant to Water Code section 13308, or referral to the California Attorney General for recovery of judicial civil liability.

2. Permitted actions must not cause a violation of any applicable water quality standards, including impairment of designated beneficial uses for receiving waters as adopted in the Basin Plan by the Colorado River Basin Water Board or in any applicable State Water Board water quality control plan or policy. The source of any such discharge must be eliminated as soon as practicable.

3. In response to a suspected violation of any condition of this Order, the Colorado River Basin Water Board may require the holder of this Order to furnish, under penalty of perjury, any technical or monitoring reports the Water Boards deem appropriate, provided that the burden, including costs, of the
reports shall bear a reasonable relationship to the need for the reports and the
benefits to be obtained from the reports. Additional monitoring requirements
ensure that permitted discharges and activities comport with any applicable
effluent limitations, water quality standards, and/or other appropriate
requirement of state law.

4. The Permittee must, at all times, fully comply with engineering plans,
specifications, and technical reports submitted to support this Order; and all
subsequent submittals required as part of this Order. The conditions within this
Order and Attachments supersede conflicting provisions within Permittee
submittals.

5. The Permittee shall adhere to all requirements in the mitigation monitoring and
Report Program (MMRP) of the IS/MND, incorporated by reference, and any
additional measures outlined in Attachment C, CEQA Findings of Fact.

6. **Construction General Permit Requirement:** The Permittee shall maintain
compliance with conditions described in, and required by, the *National Pollutant
Discharge Elimination System (NPDES) General Permit for Storm Water
Discharges Associated with Construction and Land Disturbance Activities
(Order No. 2009-0009-DWQ; NPDES No. CAS000002).

**F. Administrative**

1. Signatory requirements for all document submittals required by this Order are
presented in Attachment D of this Order.

2. This Order does not authorize any act which results in the taking of a
threatened, endangered or candidate species or any act, which is now
prohibited, or becomes prohibited in the future, under either the California
Endangered Species Act (Fish & G. Code, §§ 2050-2097) or the federal
Endangered Species Act (16 U.S.C. §§ 1531-1544). If a “take” will result from
any act authorized under this Order held by the Permittee, the Permittee must
obtain authorization for the take prior to any construction or operation of the
portion of the Project that may result in a take. The Permittee is responsible for
meeting all requirements of the applicable endangered species act for the
Project authorized under this Order.

3. The Permittee shall grant Colorado River Basin Water Board staff or an
authorized representative (including an authorized contractor acting as a Water
Board representative), upon presentation of credentials and other documents
as may be required by law, permission to:

   a. Enter upon the Project or compensatory mitigation site(s) premises where a
      regulated facility or activity is located or conducted, or where records are
      kept.

   b. Have access to and copy any records that are kept and are relevant to the
      Project or the requirements of this Order.
c. Inspect any facilities, equipment (including monitoring and control equipment), practices, or operations regulated or required under this Order.

d. Sample or monitor for the purposes of assuring Order compliance.

4. A copy of this Order shall be provided to any consultants, contractors, and subcontractors working on the Project. Copies of this Order shall remain at the Project site for the duration of this Order. The Permittee shall be responsible for work conducted by its consultants, contractors, and any subcontractors.

5. A copy of this Order must be available at the Project site(s) during construction for review by site personnel and agencies. All personnel performing work on the Project shall be familiar with the content of this Order and its posted location at the Project site.

6. **Lake and Streambed Alteration Agreement** – The Permittee shall submit a signed copy of the Department of Fish and Wildlife’s lake and streambed alteration agreement to the Colorado River Basin Water Board immediately upon execution and prior to any discharge to waters of the state.

G. **Construction**

**Good Site Management “Housekeeping”**

1. The Permittee shall follow good site management “housekeeping” and implement erosion control, sediment control, and other construction-related best management practices (BMPs) depicted in Table 3 below.

2. Ground-disturbing activities in the dry washes (work area preparation, grading, clearing, grubbing, trenching, construction, and decommissioning activities) shall comply with biological monitoring standards outlined in the issued Streambed Alteration Agreement or other Department of Fish and Wildlife agreement and be subject to approval by the Colorado River Basin Water Board.

3. The area of vegetation and soil disturbance shall be restricted to the smallest extent possible.

4. After completing construction activities, any disturbed areas shall be restored to pre-existing contours and conditions to the extent feasible.

### Hazardous Materials

5. No toxic and/or hazardous materials shall be stored near or within wash/drainage areas. To the extent practicable, these materials shall be stored offsite and placed in appropriate secondary containment.

6. Spoil sites shall not be located where spoil could be washed back into the stream channel or where spoil covers aquatic or riparian vegetation. Any materials placed in seasonally dry portions of the drainage areas that could be washed downstream or could be harmful to aquatic life shall be removed from the streambed prior to inundation by high flows.

7. No fueling or maintenance of equipment or vehicles shall occur adjacent or within the wash/drainage areas.

### Roads

8. Work and staging areas and temporary access routes shall be sized, located, and flagged to limit potential impacts to natural areas. Previously-disturbed areas shall be used to the extent feasible.

### Sediment Control

9. The Permittee shall implement sediment control BMPs to remove sediment loads from runoff generated within the construction site for all disturbed areas.

10. The Permittee shall implement off-site sediment tracking control BMPs for reducing the transport of sediment on tires off of and within the construction site.

### Stabilization/Erosion Control

11. The Permittee shall implement erosion control BMPs to mitigate soil erosion, minimize soil loss from wind erosion, and to reduce air pollution during construction activities for all disturbed areas.

### Stormwater

12. Work in or around ephemeral dry washes or stream channels shall not be conducted during rain events.

13. The Permittee shall develop and implement a Stormwater Pollution Prevention Plan (SWPPP) that complies with the requirements of the State Water Board’s Construction General Permit.
14. Post-construction, the Permittee shall implement channel protection BMPs to protect banks of the channels as well as the slopes.

15. Post-construction, the Permittee shall implement outlet protection BMPs to reduce discharge/water velocity.

H. Compensatory Mitigation for Temporary and Permanent Impacts

1. Total Required Compensatory Mitigation
   a. The Permittee is required to provide compensatory mitigation for authorized permanent impacts to 0.20 acres of waters of the state by purchasing 0.20 acres (a 1:1 mitigation to impact ratio) of intermittent, riverine rehabilitation credits at the Mojave Desert Tortoise Conservation Bank.

   b. Total required, Project-compensatory mitigation information for temporary and permanent physical loss of area is summarized in Table 4:

   Table 4: Required Project Compensatory Mitigation for Permanent Impacts

<table>
<thead>
<tr>

<td>0.20 acres</td>
<td>—</td>
</tr>
</tbody>
</table>

2. Compensatory Mitigation Plan
   a. The Permittee has submitted an approved draft compensatory mitigation plan as part of a complete application.

   b. The Permittee shall provide a final compensatory mitigation plan for written acceptance by Colorado River Basin Water Board staff. The final compensatory mitigation plan shall include all plan elements as outlined in 40 C.F.R. section 230.94(c)(5)-(6).

3. Purchase of Mitigation Credits by Permittee for Compensatory Mitigation
   a. A copy of the fully executed agreement for the purchase of mitigation credits shall be provided to the Colorado River Basin Water Board within 90 days of authorized impacts.

   b. The Permittee shall retain responsibility for providing the compensatory mitigation and long-term management until Colorado River Basin Water

---

³ Compensatory mitigation types may be: In-Lieu-Fee (ILF); Mitigation Bank (MB); Permittee-Responsible (PR).

⁸ Methods of mitigation: establishment (Est.), reestablishment (Re-est.), rehabilitation (Reh.), enhancement (Enh.), preservation (Pres.). Unknown applies to advance credits with an unknown method and or location.
Board staff has received documentation of the credit purchase and the transfer agreement between the Permittee and the seller of credits.

4. Restoration of Temporary Impact Areas

The Permittee shall restore all areas of temporary impacts to waters of the state and all Project site upland areas of temporary disturbance which could result in a discharge to waters of the state.

XIII. Conclusion

I, PAULA RASMUSSEN, Executive Officer, hereby certify that the following is a full, true, and correct copy of the order adopted by the California Regional Water Quality Control Board, Colorado River Basin Region, on May 11, 2021.

The Permittee agreed to provide compensatory mitigation for impacts to waters of the U.S by purchasing credits at a mitigation bank. The Permittee has chosen to purchase credits at the Mojave Desert Tortoise Conservation Bank for a total of 0.20 acres of permanent impacts at a 1:1 ratio.

\(^9\) Compensatory mitigation types may be: In-Lieu-Fee (ILF); Mitigation Bank (MB); Permittee-Responsible (PR).
Attachment C
CEQA Findings

1. Environmental Review

On March 3, 2021, the Riverside County Planning Department, as lead agency, adopted an Initial Study/Mitigated Negative Declaration (IS/MND) for the Project (Environmental Assessment No. CEQ 200004) and filed a Notice of Determination (NOD) on March 4, 2021.

The Colorado River Basin Water Board is a responsible agency under CEQA (Pub. Resources Code, § 21069) and in making its determinations and findings, must presume that Riverside County's environmental documents comport with the requirements of CEQA and are valid (Public Resources Code, §§ 21080.1(a), 21167.2). The Colorado River Basin Water Board has reviewed and considered the environmental documents and finds that the environmental documents prepared by the Riverside County Planning Department address the Project's water resource impacts. (Cal. Code Regs., tit. 14, § 15096, subd. (f).) The environmental documents include the mitigation monitoring and reporting program (MMRP) developed by the Riverside County Planning Department for all mitigation measures that have been adopted for the Project to reduce potential significant impacts. (Pub. Resources Code, § 21081.6, subd. (a)(1); Cal. Code Regs., tit. 14, § 15091, subd. (d).)

2. Incorporation by Reference

Pursuant to CEQA, these Findings of Facts (Findings) support the issuance of this Order based on the approved IS/MND, MMRP, and other supplemental documentation.

The approved IS/MND is incorporated herein by reference and available at the Riverside County website: https://planning.rctlma.org/Home/Planning-Notices/Alta-Mesa-Wind-Energy-Project

Requirements under the purview of the Colorado River Basin Water Board in the MMRP are incorporated herein by reference.

The Permittee’s application for this Order, including all supplemental information provided, is incorporated herein by reference.

3. Findings and Determination

Having considered the whole of the record, the Colorado River Basin Water Board has determined that there is no substantial evidence that the Project or any of its aspects could result in significant adverse impacts to water
resources, when implemented in accordance with the mitigation measures required in MMRP and the conditions in this Order. (Cal. Code Regs., tit. 14, § 15096, subd. (h).)
SIGNATORY REQUIREMENTS

All documents submitted in compliance with this Order shall meet the following signatory requirements:

1. All applications, reports, or information submitted to the Colorado River Basin Water Board shall be signed and certified as follows:
   a. For a corporation, by a responsible corporate officer of at least the level of vice-president.
   b. For a partnership or sole proprietorship, by a general partner or proprietor, respectively.
   c. For a municipality, or a state, federal, or other public agency, by either a principal executive officer or ranking elected official.

2. A duly authorized representative of a person designated in items 1.a through 1.c above may sign documents if:
   a. The authorization is made in writing by a person described in items 1.a through 1.c above.
   b. The authorization specifies either an individual or position having responsibility for the overall operation of the regulated activity.
   c. The written authorization is submitted to Colorado River Basin Water Board staff contact prior to submitting any documents listed in item 1 above.

3. Any person signing a document under this section shall make the following certification:

   "I certify under penalty of law that I have personally examined and am familiar with the information submitted in this document and all attachments and that, based on my inquiry of those individuals immediately responsible for obtaining the information, I believe that the information is true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment."
Attachment E
Reporting Requirements

Copies of this Form

In order to identify your Project, it is necessary to include a copy of the Project specific Cover Sheet below with your report; please retain for your records. If you need to obtain a copy of the Cover Sheet you may download a copy of this Order as follows:

1. Go to:  
   http://www.waterboards.ca.gov/water_issues/programs/cwa401/certifications.html  
2. Find your Order in the table based on Applicant, Date, and Subject headers.

Report Submittal Instructions

1. Check the box on the Report and Notification Cover Sheet next to the report or notification you are submitting.
   a. **Part A (Annual Report):** This report will be submitted annually from the anniversary of Project effective date until a Notice of Project Complete Letter is issued and this Order is terminated by vote of the Colorado River Basin Water Board.
   b. **Part B (Project Status Notifications):** Used to notify the Colorado River Basin Water Board of the status of the Project schedule that may affect Project billing.
   c. **Part C (Conditional Notifications and Reports):** Required on a case by case basis for accidental discharges of hazardous materials, violation of compliance with water quality standards, notification of in-water work, or other reports.

2. Sign the Report and Notification Cover Sheet and attach all information requested for the Report Type.

3. **Electronic Report Submittal Instructions:**
   a. Submit signed Report and Notification Cover Sheet and required information via email to: coloradoriver@waterboards.ca.gov and cc: kai.dunn@waterboards.ca.gov
   b. Include in the subject line of the email: Subject: ATTN: Kai Dunn; Reg. Measure ID: 441993_Report
## Definition of Reporting Terms

1. **Active Discharge Period**: The active discharge period begins with the effective date of this Order and ends on the date that the Permittee receives a Notice of Completion of Discharges Letter or, if no post-construction monitoring is required, a Notice of Project Complete Letter. The Active Discharge Period includes all elements of the Project including site construction and restoration, and any Permittee responsible compensatory mitigation construction.

2. **Request for Notice of Completion of Discharges Letter**: This request by the Permittee to the Colorado River Basin Water Board staff pertains to projects that have post construction monitoring requirements, e.g. if site restoration was required to be monitored for 5 years following construction. Colorado River Basin Water Board staff will review the request and send a Completion of Discharges Letter to the Permittee upon approval. This letter will initiate the post-discharge monitoring period and a change in fees from the annual active discharge fee to the annual post-discharge monitoring fee.

3. **Request for Notice of Project Complete Letter and Order Termination**: This request by the Permittee to the Colorado River Basin Water Board staff pertains to projects that either have completed post-construction monitoring and achieved performance standards or have no post-construction monitoring requirements, and no further Project activities are planned. Colorado River Basin Water Board staff will review the request and upon approval, will issue a Project Complete Letter and prepare an order terminating the WDRs for approval by the Colorado River Basin Water Board. Termination of annual invoicing of fees will correspond with the date of termination of this Order by the Board.

4. **Post-Discharge Monitoring Period**: The Post-Discharge Monitoring Period begins on the date of the Notice of Completion of Discharges Letter and ends on the date of termination of this Order by vote of the Colorado River Basin Water Board. The Post-Discharge Monitoring Period includes continued water quality monitoring or compensatory mitigation monitoring.

4. **Effective Date**: Date of Order issuance.
Map/Photo Documentation Information

When submitting maps or photos, please use the following formats.

1. **Map Format Information:**

   Preferred map formats of at least 1:24000 (1" = 2000') detail (listed in order of preference):

   - **GIS shapefiles**: The shapefiles must depict the boundaries of all Project areas and extent of aquatic resources impacted. Each shape should be attributed with the extent/type of aquatic resources impacted. Features and boundaries should be accurate to within 33 feet (10 meters). Identify datum/projection used and if possible, provide map with a North American Datum of 1983 (NAD38) in the California Teale Albers projection in feet.

   - **Google KML files** saved from Google Maps: My Maps or Google Earth Pro. Maps must show the boundaries of all Project areas and extent/type of aquatic resources impacted. Include URL(s) of maps. If this format is used include a spreadsheet with the object ID and attributed with the extent/type of aquatic resources impacted.

   - **Other electronic format** (CAD or illustration format): When other electronic formats are used to provide a context for location (inclusion of landmarks, known structures, geographic coordinates, or USGS DRG or DOQQ). Maps must show the boundaries of all Project areas and extent/type of aquatic resources impacted. If this format is used include a spreadsheet with the object ID and attributed with the extent/type of aquatic resources impacted.

   - Aquatic resource maps marked on paper **USGS 7.5 minute topographic maps** or **Digital Orthophoto Quarter Quads (DOQQ)** printouts. Maps must show the boundaries of all Project areas and extent/type of aquatic resources impacted. If this format is used include a spreadsheet with the object ID and attributed with the extent/type of aquatic resources impacted.

2. **Photo-Documentation**: Include a unique identifier, date stamp, written description of photo details, and latitude/longitude (in decimal degrees) or map indicating location of photo. Successive photos should be taken from the same vantage point to compare pre/post construction conditions.

</tr>
</tbody>
</table>
| **Report Contents** | 1. **Construction Summary**  
Describe Project progress and schedule including initial ground disturbance, site clearing and grubbing, road construction, site construction, and the implementation status of construction storm water Best Management Practices (BMPs\(^{11}\)). If construction has not started, provide estimated start date.  
2. **Event Summary**  
Describe distinct Project activities and occurrences, including environmental monitoring, surveys, and inspections.  
3. **Photo Summary**  
Provide photos of Project activities. For each photo, include a unique site identifier, date stamp, written description of photo details, and latitude/longitude (in decimal degrees) or map indicating location of photo. Successive photos should be taken from the same vantage point to compare pre/post construction conditions.  
4. **Compliance Summary**  
a) List name and organization of environmental surveyors, monitors, and inspectors involved with monitoring environmental compliance for the reporting period.  
b) List associated monitoring reports for the reporting period.  
c) Summarize observed incidences of non-compliance, compliance issues, minor problems, or occurrences.  
d) Describe each observed incidence in detail. List monitor name and organization, date, location, type of incident, corrective action taken (if any), status, and resolution. |

---

\(^{11}\) Best Management Practices (BMPs) is a term used to describe a type of water pollution or environmental control.

<table>
<thead>
<tr>
<th>When to Submit</th>
<th>Must be received by Colorado River Basin Water Board staff within thirty (30) days following completion of all Project activities.</th>
</tr>
</thead>
</table>

**Report Contents**

| Report Contents | Part A: Mitigation for Temporary Impacts
1. A report establishing that the performance standards outlined in the restoration plan have been met for Project site upland areas of temporary disturbance which could result in a discharge to waters of the state.
2. A report establishing that the performance standards outlined in the restoration plan have been met for restored areas of temporary impacts to waters of the state. Pre- and post-photo documentation of all restoration sites.
Part B: Permittee Responsible Compensatory Mitigation
3. A report establishing that the performance standards outlined in the compensatory mitigation plan have been met.
4. Status on the implementation of the long-term maintenance and management plan and funding of endowment.
5. Pre- and post-photo documentation of all compensatory mitigation sites.
6. Final maps of all compensatory mitigation areas (including buffers).
Part C: Post-Construction Stormwater BMPs
7. Date of storm water Notice of Termination(s), if applicable.
8. Report status and functionality of all post-construction BMPs. |
**Part C – Conditional Notifications and Reports**

<thead>
<tr>
<th>Report Type 6</th>
<th>Accidental Discharge of Hazardous Material Report</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Report Purpose</strong></td>
<td>Notifies Colorado River Basin Water Board staff that an accidental discharge of hazardous material has occurred.</td>
</tr>
<tr>
<td><strong>When to Submit</strong></td>
<td>Within five (5) working days following the date of an accidental discharge. Continue reporting as required by Colorado River Basin Water Board staff.</td>
</tr>
</tbody>
</table>
| **Report Contents** | 1. The report shall include the OES Incident/Assessment Form, a full description and map of the accidental discharge incident (i.e. location, time and date, source, discharge constituent and quantity, aerial extent, and photo documentation). If applicable, the OES Written Follow-Up Report may be substituted.  
2. If applicable, any required sampling data, a full description of the sampling methods including frequency/dates and times of sampling, equipment, locations of sampling sites.  
3. Locations and construction specifications of any barriers, including silt curtains or diverting structures, and any associated trenching or anchoring. |

<tbody>
<tr>
<td><strong>Report Purpose</strong></td>
<td>Notifies Colorado River Basin Water Board staff of the completion of in-water work.</td>
</tr>
</tbody>
</table>
When to Submit | Within three (3) working days following the completion of in-water work. Continue reporting in accordance with the approved water quality monitoring plan.
---|---
Report Contents | As required by the approved water quality monitoring plan.

| Report Type 9 | Modifications to Project Report |
---|---|
Report Purpose | Notifies Colorado River Basin Water Board staff if the Project, as described in the application materials, is altered in any way or by the imposition of subsequent permit conditions by any local, state or federal regulatory authority. |
When to Submit | If Project implementation as described in the application materials is altered in any way or by the imposition of subsequent permit conditions by any local, state or federal regulatory authority. |
Report Contents | A description and location of any alterations to Project implementation. Identification of any Project modifications that will interfere with the Permittee’s compliance with the Order. |

| Report Type 10 | Transfer of Property Ownership Report |
---|---|
Report Purpose | Notifies Colorado River Basin Water Board staff of change in ownership of the Project or Permittee-responsible mitigation area. |
When to Submit | At least 10 working days prior to the transfer of ownership. |
Report Contents | 1. A statement that the Permittee has provided the purchaser with a copy of this Order and that the purchaser understands and accepts:  
   a. the Order’s requirements and the obligation to implement them or be subject to administrative and/or civil liability for failure to do so; and  
   b. responsibility for compliance with any long-term BMP\(^{12}\) maintenance plan requirements in this Order.  
2. A statement that the Permittee has informed the purchaser to submit a written request to the Colorado River Basin Water Board to be named as the permittee in a revised order. |

\(^{12}\) Best Management Practices (BMPs) is a term used to describe a type of water pollution or environmental control.
