

Date:

November 7, 2008

Applicant:

County of Imperial, Department of Public Works

Project Name:

Worthington Road Intersection Improvements

Receiving Water:

Imperial Irrigation District Drainage System, tributary to the Alamo River and Salton Sea

Location:

The Worthington Road Intersection Improvement Project is located at the intersection of Worthington Road and McConnell Road, southeast of the City of Brawley, in Imperial County, California. The project site is located in Township 15 South, Range 15 East, San Bernardino Baseline and Meridian at 32° 48' 12" N Latitude by 115° 28' 51" W Longitude.

Project Description:

The County of Imperial proposes to improve the intersection of Worthington Road and McConnell Road. Worthington Road is a two-lane road that does not have a turn lane or stop sign at the intersection with McConnell Road. Improvements to the intersection consists of widening each side of Worthington Road and constructing an eastbound left turn lane off Worthington Road onto McConnell Road. The widening of Worthington Road will require the extension of existing Imperial Irrigation District pipes approximately 16 feet on each side of the Mesquite Drain. The pipes located within this drain will be extended in a northerly and southerly direction along Worthington Road. In combination with the old age of the Mesquite Drain Pipe Crossing and road widening, the IID has required the replacement and extension of the Mesquite Drain Pipe Crossing. Since these additional operation and maintenance activities are a direct result of the proposed action by the County of Imperial, the County of Imperial will be paying the full cost of these improvements as part of the Worthington Road intersection improvements.
