Project Name:

Coachella Valley Water District - Jefferson Street Grade Control and Sewer Pipeline Replacement & Protection Project, WDID No. 7A333123001

Receiving Water:

Coachella Valley Stormwater Channel

Location:

City or area: La Quinta, Riverside County, California

Project Description:

To stabilize the invert elevation of the channel and limit sediment transport downstream and to enhance sewer pipeline protection during storm events.

To construct a 394' long x 70' wide grade control structure perpendicular to channel; replace two existing sewer pipelines (15" and 18") with one 24" steel-encased sewer pipeline; extension of two cut-off walls associated with existing concrete slope protection, all within the Coachella Valley Stormwater Channel at the Jefferson Street Bridge in La Quinta.

Action:

Pending
