Project Name:

Coachella Valley Water District - Whitewater Groundwater Replenishment Facility Improvements Project, WDID No. 7A333124001

Receiving Water:

Whitewater River Stormwater Channel

Location:

City or area: Palm Springs, Riverside County, California

Project Description:

The primary goals of the project are to replace deteriorated facilities, provide additional flood protection, and provide additional operational flexibility at Whitewater Groundwater Replenishment Facility.

The main activities of this construction project include a new intake/slucing structure in the Whitewater River Stormwater Channel, a new 12,200-linear-foot-long diversion channel to convey 800 cfs flows, and two division structures at existing Percolation Ponds 1 and 10.

Action:

Pending
