**Project Name:**

NextEra Energy Resources - WPP-91 Wind Energy Facility Decommission Project

**Receiving Water:**

Whitewater River

**Location:**

City or area: Palm Springs, Riverside County, California

Longitude/Latitude: -116 34'56.77"/33 54'02.43"

Township/Range: 3 South/4 East

**Project Description:**

Decommissioning of the WPP-91 wind facility will involve the removal of 73 turbines. The turbines proposed for removal are currently inactive and are scheduled to remain that way. Decommissioning of the turbines will not only remove the turbines from the project site, but will eliminate human disturbance of the Whitewater River caused by maintenance activities associated with the turbines. Decommissioning of the WPP-91 wind facility will involve the removal of 73 turbines. Currently, all blades and nacelles have been removed and the project site consists of towers and foundations, or foundations only. Decommissioning of the turbines will occur within two distinct phases: tower removal and foundation burial.

**Proposed Schedule:**

Decommissioning activity is expected to begin in September, 2012 and will require four weeks to complete, with an anticipated completion date in October 2012.

**Action:**

Pending
