Project Name:

Southern California Edison - Hubble 12 kV DSP Project

Receiving Water:

Garnett Creek, White Water River, Salton Sea

Location:

City or area: Iris, Imperial County, California
Longitude/ Latitude:
Township/Range:

Project Description:

SCE proposes to install a new underground electrical utility conduit system of six 5-inch ducts and the installation of 2 new 7 by 14 by 8 foot concrete vaults. Four ephemeral desert washes exist within the immediate project vicinity. The project will cross three of these drainages.

The two new vaults will be located south of an existing vault along the north-west alignment on Diablo Road at Estrada Road. A back-hoe will be utilized to dig the trench for the conduit and excavate for the vault placement. Additional equipment will include a line truck, bucket truck, dump truck and excavator. All site access will be from existing paved or dirt roads.

Action:

Pending
