**Project Name:**

Imperial Valley Solar 2, LLC - Mount Signal Solar 2 Project, WDID No. 7A133143001  
(Combination of two projects previously known as Calexico Solar Farm 1A and Calexico Solar Farm 1B)

**Receiving Water:**

Wells Drain and Wistaria Spill Drain. Both feed into Greeson Wash, the New River and the Salton Sea

**Location:**

**City or area:** Calexico, Imperial County, California  
**Longitude/ Latitude:** 32.667636 -115.62024825071373

**Township/Range:**

K Bishop Portions of: S15, T17S, R13E  
B Brandenburg Portions of: S14, T17S, R13E  
M Dessert Portions of: S13 & S14, T17S, R13E

**Project Description:**

The purpose of the proposed project is to provide access to the Mount Signal Solar 2 project via four driveways crossing Imperial Irrigation District (IID) agricultural drains.

The proposed project would involve placing culverts and fill in four separate locations of Imperial Irrigation District drains that were deemed jurisdictional waters in order to provide access to the Mount Signal Solar Farm 2.

These irrigation drains include Wells Drain and Wistaria Spill Drain. All four crossings will be culvert crossings that will result in no permanent obstruction of downstream flows.

The drainages being crossed are 7-12 feet wide and the driveways will be up to 75 feet. Specific equipment required to complete the construction of culvert crossings will be determined by the contractor in charge of construction. Heavy dirt-moving equipment, heavy lift equipment, and light vehicles are anticipated to be required.

**Action:**

Pending
