

State Water Resources Control Board Division of Drinking Water

April 25, 2022

System No. CA1500455

William Fisher Memorial Water Company
c/o Dennis Gatson, McMor Chlorination, Inc.
4700 District Blvd.
Bakersfield, CA 93313

**RE: NOTICE – 1st STEP OF ADMINISTRATOR PROCESS
William Fisher Memorial Water Company (CA1500455)**

Dear Mr. Gatson,

The purpose of this letter is to inform you that the State Water Resources Control Board (State Water Board) is taking the first step to designate William Fisher Memorial Water Company (“William Fisher Memorial WC”) as a public water system in need of an Administrator because it has not consistently provided an adequate supply of affordable, safe drinking water to its customers. The State Water Board recognizes that McMor Chlorination, Inc. is a court-appointed receiver for the water system and that you are the authorized representative of McMor Chlorination, Inc. You have expressed difficulty in obtaining adequate revenue to maintain your services based solely on water revenues, due in part to a lack of payment. If an administrator is appointed, the State Water Board will coordinate with the Kern County Superior Court to ensure that the transfer of authority to the administrator is properly processed.

The State Water Board is taking this step now for two reasons: 1) a State-funded administrator will be able to take on many of the tasks that will be required to assist the water system to come into compliance with applicable drinking water laws and regulations sustainably into the future, and 2) it may take some time to go through the required steps to appoint an administrator. A summary of the designation process, responsibilities of a full-scope administrator, applicable regulatory sections, and policies are provided as attachments.

The legally required formal first step in this process is for the State Water Board to give William Fisher Memorial WC notice of its intended action and provide the water system an opportunity to show either of the following:

E. JOAQUIN ESQUIVEL, CHAIR | EILEEN SOBECK, EXECUTIVE DIRECTOR

- a. It has consistently provided an adequate supply of affordable, safe drinking water, or
- b. It has taken steps to timely address its failure to provide an adequate supply of affordable, safe drinking water.

If William Fisher Memorial WC has evidence and wishes to show that the violations listed below have been resolved, please provide that information by **May 23, 2022** via email to our staff member Andrew Forbes at andrew.forbes@waterboards.ca.gov.

List of Violations

William Fisher Memorial WC has failed to:

- Comply with CCR, Title 22, Section 64431, Maximum Contaminant Levels-Inorganic Chemicals. Compliance Order No. 03_19_17R_014 was issued to William Fisher Memorial WC on November 3, 2017.
- Comply with Compliance Order 03_19_17R_014. Citation No. 03_19_21C_039 was issued to William Fisher Memorial WC on October 27, 2021, for failing to comply with the directives of the Compliance Order.

California Health and Safety Code Section 116530 authorizes the State Water Board to request financial capacity information. In order to help facilitate the State Water Board to more quickly respond to any impending need to support William Fisher Memorial WC's customers, please provide three (3) years of the William Fisher Memorial WC's financial statements, preferably audited financial statements if available, any accounting and financial policies, rate structures, and current capital improvement plan, if available. The financial statements should include the current year (if available) and the two previous years, or three previous years if the current year has not yet been completed. Additionally, identification of any restricted funds and the reason for the restrictions could better facilitate assistance from the State Water Board. The State Water Board is requesting this information be submitted by **June 22, 2022**.

If you have any questions regarding this letter, please contact my staff member, Andrew Forbes at Andrew.Forbes@waterboards.ca.gov.

Sincerely,

[Web accessible version; original signed by Michelle Frederick]

Administrator Process

Section 116686 of the California Health and Safety Code and the Administrator Policy Handbook, adopted by the State Board in September 2019, requires that the State Board must find that the System's public water system is a "designated water system" and take other specific actions before it can issue an order to the System to accept a full-scope administrator. A "designated water system" is defined in section 116686(m)(2) as a public water system that serves a disadvantaged community, and that the State Water Board finds consistently fails to provide an adequate supply of affordable, safe drinking water. A copy of section 116686 and the Administrator Policy Handbook are provided in subsequent attachments. The actions required of the State Water Board are summarized below.

1. The State Board must give the water system notice of its actions and provide it with an opportunity to show either of the following:
 - a. It has not consistently failed to provide an adequate supply of affordable, safe drinking water, or
 - b. It has taken steps to timely address its failure to provide an adequate supply of affordable, safe drinking water.
2. Conduct a public meeting in a location as close as feasible to the affected community.
 - a. Provide 30-day notice of the public meeting to affected ratepayers, renters, and property owners.
 - b. Provide an opportunity for representatives of the System, affected ratepayers, renters, property owners, and the public to present oral and written comments at the meeting.
 - c. Provide an opportunity to submit comments by mail or electronically during the 30-day notice period and for at least one week after the public meeting
3. Make a reasonable effort to provide notice to all ratepayers, renters, and property owners who receive water service from the designated water system of the following:
 - a. The name and qualifications of the administrator being considered by the State Board
 - b. The scope of the appointment and the particular services to be provided by the administrator being considered by the State Board, and
 - c. Any conflict of interest
4. Issue an order to the System requiring it to accept a full-scope administrator to take complete management control of its public water system.

Attachment 2

Responsibilities of a Full-Scope Administrator

All actions taken by an administrator are required to be in the best interest of the community served by the water system and must be intended to develop the water system's capability to sustainably deliver an adequate supply of affordable, safe drinking water so that the services of the administrator are no longer necessary. Section 116686 and the Administrator Policy Handbook requires the State Water Board to enter into a contract or grant agreement with an appointed administrator and fund the cost of the administrator to provide the agreed upon service to the System.

The Administrator is required to provide reports in order to keep the governing board or owner of the water system and the customers served informed about actions taken and status of the system. In addition, the Administrator Policy Handbook includes a process that allows any ratepayer, renter, or property owner who receives water from a designated water system to submit a petition to the State Water Board for the reversal or modification of an administrator decision or replacement of an administrator. A complete description of an administrator's obligations is contained in section 116686 of the Health and Safety Code and in the Administrator Policy Handbook.

The authority and scope of work of an administrator is established on a case by case basis in the contract/grant agreement executed between the State Water Board and the administrator and in the order issued to the public water system to accept the services of the administrator. **In the case of William Fisher Memorial WC, the full-scope administrator appointed to it will have authority to exercise complete managerial control over its public water system, including but not limited, to financial reviews, responding and representing William Fisher Memorial WC to regulatory agencies, entering into contracts, establishing operational budgets and rates, acceptance of water rate payments to pay water system expenses, system operation, and keeping customers informed of the status of the water system.**
