

Failing and At-Risk SAFER Project and Funding Snapshot

Report Tool Summary:

This snapshot tool combines data from several sources to provide a summary of system engagement and funding at the Division of Drinking Water (DDW) and the Division of Financial Assistance (DFA). The inclusion date and refresh rate of the data vary, and more recent or detailed information can be obtained by contacting SAFER or DFA directly. For data errors or issues with the tool itself please contact Suzanne.Kline@waterboards.ca.gov

The **Water System Details Section** includes water system inventory information and state-produced assessment data on the socio-economic and health hazard status of the service area (*DAC Status, MHI, and CalEnviroScreen Score*).

The **SAFER Project Overview and Engagement Section** includes the Failing or At-Risk status of the system, relevant violations, and Engagement Unit activity from the SAFER Clearinghouse. If a system has Consolidation or Administrator projects, those sections will include additional project details.

The **State Assistance Section** includes three different types of funding data. The **Funding Projects subsection** includes Planning, Construction, Administrator (master funding agreements), and most Interim Solution funding agreements from DFA's main database. The **Technical Assistance (TA) subsection** provides information on TA categories and providers, also from LGTS. Funding projects and Technical Assistance shown in this section are associated with the selected system if the funding database indicates they are a water system benefitting from a project. The funding amounts shown are the total funding package and may not reflect an allocated portion of the total funding. The **Interim CAA Funding subsection** includes interim projects that are found only in the Cleanup and Abatement Account (CAA).

State Assistance

*Please note that the funding amounts are the total for an individual funding project, not the total allocated to this individual system. Many funding and Technical Assistance projects benefit multiple parties. Project Amounts for Executed projects reflect approved funding totals, whereas Project Amounts for Planned projects are requested amounts and subject to change prior to approval.

Associated Funding Projects
