Hello, Community Water Systems and Non-Transient Non-Community Water Systems.

The State Water Resources Control Board’s Division of Drinking Water (DDW) will be hosting an informational workshop and webcast on **Wednesday, January 31, 2018, from 1:00 to 3:00 pm**, for the recently adopted **1,2,3-trichloropropane (1,2,3-TCP) MCL and regulation package**. The workshop and webcast is intended for managers, operators and water quality staff of Community (CWS) and Non-Transient Non-Community (NTNC) water systems, to which this regulation applies. The information provided will focus on the initial monitoring requirements for 123-TCP, provisions for data substitution (grandfathering), acceptable analytical method for 123-TCP, process for requesting a waiver for initial monitoring, compliance determinations, public notification requirements and resources available. Initial monitoring must begin by CWS and NTNC water systems for each active source during the first quarter of 2018 (January 1st through March 31st).

To attend the workshop in person, it will be held in the Byron Sher Auditorium located in the CalEPA Building at 1001 I Street, Sacramento, CA. Questions will be engaged from the live audience.

To join the webcast, follow this link to [CalEPA Live Webcasts](https://video.calepa.ca.gov/), and select the link to the live webcast for either the video (if you are at a computer), or audio only. To submit a question during the webcast, please email it to Auditorium@CalEPA.ca.gov.

No reservations are required. We encourage as many representatives as possible join the workshop or webcast to stay informed on the initial monitoring requirements, since the first quarterly initial sample is due in the January - March 2018 quarter.

The webcast will be recorded and will be available for future viewing by those that are not able to attend. It will be posted, along with a Frequently Asked Questions, at this website: [1,2,3-Trichloropropane (1,2,3-TCP)]

DDW looks forward to sharing this information with our regulated public water systems as California moves forward with implementation of this groundbreaking MCL adopted for 1,2,3-TCP.

For questions only regarding access to the webcast, you may contact Ms. Betsy Lichti at Betsy.Lichti@waterboards.ca.gov or (916) 322-9598.
