Subject: Notice of Proposed Rulemaking - 1,2,3-Trichloropropane Maximum Contaminant Level - SBDDW-17-001
Attachments: Notice of Proposed Rulemaking-SBDDW-17-001.pdf

This is a message from the State Water Resources Control Board.

The State Water Resources Control Board (State Water Board) has proposed regulations to establish a Maximum Contaminant Level (MCL) of 5 parts per trillion (ppt) for 1,2,3-Trichloropropane (1,2,3-TCP). In 2009, the Office of Environmental Health Hazard Assessment (OEHHA) established a Public Health Goal (PHG) for 1,2,3-TCP of 0.7 ppt which is based on cancer risk. 1,2,3-TCP has been detected in numerous drinking water sources in California.

The State Water Board intends to adopt an Initial Study/Mitigated Negative Declaration (IS/MND) for the proposed regulations. Based on the contents of the [draft IS/MND](#) and proposed mitigation measures, the State Water Board anticipates that the proposed regulations will have less than significant effects on the environment.

The **Comment Periods** on the proposed regulations and the IS/MND will run concurrently from **March 4, 2017** through **April 21, 2017 (5:00 pm)**.

An Administrative Procedure Act (APA) **Public Hearing** will be held at **9:00 a.m.** on **April 19, 2017** during a Board Workshop to receive comments on the draft regulations and draft IS/MND. The State Water Board will review, consider, and respond to all comments received during the public comment period. The State Water Board tentatively anticipates adoption of the proposed regulations and approval of the IS/MND in the summer 2017. A separate notice for the adoption of the proposed regulations and IS/MND will follow.

The Notice of Proposed Rulemaking is attached. Additional information on the proposed regulations can be found at: www.waterboards.ca.gov/drinking_water/certlic/drinkingwater/123TCP.shtml
