ES. EXECUTIVE SUMMARY

The Drinking Water State Revolving Fund (DWSRF) program finances infrastructure improvements to mitigate drinking water risks and support the human right to water. This Intended Use Plan (IUP) describes the State Water Resources Control Board's (State Water Board) plan for implementing the DWSRF and its complementary financing programs for State Fiscal Year (SFY) 2021-22.

This Executive Summary is intended to provide a condensed overview of highlights and notable changes for SFY 2021-22.

A. State Water Board Guidance

The DWSRF program and associated state funding sources will be used to provide financial assistance that (1) addresses the most serious human health risks to drinking water, (2) is necessary to comply with the federal Safe Drinking Water Act (SDWA), and (3) assists eligible drinking water systems most in need on a per household basis. To meet this goal, the State Water Board will use the DWSRF and complementary funds timely and expeditiously and manage the available funding responsibly.

The State Water Board's drinking water funding priorities in SFY 2021-22 continue to stress helping small severely disadvantaged communities (SDACs) and small disadvantaged communities (DACs) solve their drinking water problems. In particular, available Small Community Grant Drinking Water (SCG DW) funds, DWSRF Principal Forgiveness (PF) funds, and Drinking Water Small Community Emergency Grant (DWSCEG) funds will be used to address the most serious health risks for these communities. The DWSRF program will be managed so that sufficient funds are available to finance the eligible drinking water projects of small SDACs and small DACs.

B. Connections to Other Plans and Goals

The Safe and Affordable Drinking Water (SADW) Fund Expenditure Plan and Safe and Affordable Funding for Equity and Resilience (SAFER) Policy are intended to work in tandem with the DWSRF Policy and this IUP where addressing drinking water capital infrastructure.

C. Application Demand

Demand on the DWSRF Program and complementary funding remains high. The State Water Board's Division of Financial Assistance (DFA) has received applications

requesting approximately \$3.4 billion as of February 2021 for drinking water planning and construction projects¹.

Priority Ranking	Description	No. of Applications	Estimated Requested Funding
A	Immediate Health Risk	29	\$76,208,831
B	Untreated or At-Risk Sources	14	\$353,201,089
C	Compliance or Shortage	95	\$317,450,775
D	Inadequate Reliability	51	\$76,036,597
E	Secondary Risks	10	\$29,628,989
F	Other Projects	146	\$2,543,194,813
Total		345	\$3,395,721,094

Given the ongoing high demand on the DWSRF, the State Water Board will not be able to fund all projects currently requesting funding in SFY 2021-22. Applicants whose projects are not on the Fundable List are encouraged to evaluate all viable, alternative financing options for their projects considering any deadlines they must meet.

D. General Funding Approach

This IUP updates the Fundable List, which represents those projects for which DFA plans to execute financing agreements by June 30, 2022.

Projects are added to the Fundable List in two ways:

1. Projects eligible for grant/PF under Appendices D and E, and all consolidation incentive projects, are considered automatically added to the Fundable List provided they submit a complete application and meet all eligibility requirements.
2. For all other applications, projects expected to receive a financing agreement in SFY 2021-22 are placed on the Fundable List with priority given to those that 1) address the most serious risk to human health, 2) are necessary to ensure compliance with the requirements of the SDWA, and 3) assist systems most in need on a per household basis.

As project application statuses are expected to change throughout the year, DFA will periodically post an updated Comprehensive List on the DWSRF website which also identifies those projects which are on the Fundable List. This updated Fundable List will include all projects eligible for grant/PF under Appendices D and E, and all

¹ This 2021-22 DWSRF IUP is being amended to incorporate mid-year amendments to grant/PF funding criteria resulting from stakeholder outreach related to the new \$650 million SFY 2021-22 Drinking Water Infrastructure Appropriation from the General Fund (Item 3940-106-0001, Provision 1, of Section 2.00 of the Budget Act of 2021). Other numeric projections and totals associated with the program are not being updated as part of this mid-year amendment, and will be updated as part of adoption of the DWSRF IUP for SFY 2022-23, during summer 2022.

consolidation incentive project, with a complete application and meeting all eligibility requirements.

E. Financing Terms

The standard interest rate for DWSRF (repayable) financing is 50 percent (50%) of California's average general obligation bond rate obtained by the State Treasurer for the previous calendar year, rounded up to the next highest ten basis points (0.10%). Therefore, the interest rate for the 2021 calendar year is 1.2%.

The standard term for a planning loan is five or ten years, at the applicant's option.

The standard term for a construction loan is the lesser of 30 years or the useful life of the financed facilities. SDAC and DAC communities may finance drinking water construction facilities over the lesser of 40 years or the useful life of the financed facilities.

Eligible community water systems (CWSs) serving a small DAC/small SDAC, eligible Non-Transient Non-Community Water Systems (NTNCs) serving a small DAC or small SDAC, Expanded Small CWSs serving a DAC/SDAC, CWSs serving a Medium DAC, CWSs serving a small non-DAC, and Public Water Systems (PWSs) implementing a consolidation project may receive grant/PF in accordance with Appendices D and E, to the extent consistent with federal and state law.

Criteria for consolidation projects are described in Section III.A.4.

F. Recent Financing Activity

The level of DWSRF and complementary financing was below average in SFYs 2018-19 and 2019-20 due to the State Water Board's transition to California's new, statewide accounting and budgeting system, the Financial Information System for California or "FI\$Cal." As of early 2021, DFA is continuing to adapt to FI\$Cal and expects that the overall pace of financing will continue to normalize in SFY 2021-22.

Number of Executed Agreements and Total Financing (\$, in millions) per SFY

SFY	Number of Agreements	\$ of Agreements (in millions)
2017-18	64	\$316
2018-19	17	\$237
2019-20	49	\$193
2020-21	24	\$167
Draft Agreements in process	33	\$173

DFA has executed 24 DWSRF agreements during SFY 2020-21 as of March 1, 2021. DFA is currently drafting agreements for another 33 DWSRF projects for an additional \$173 million in funding. Some of these agreements will be executed by June 30, 2021.

G. Available Funding

Available DWSRF and complementary financing programs for SFY 2021-22 are summarized below. The amounts included below are estimated amounts, which may fluctuate due to a number of reasons, including project cancellations, the disencumbrment of undisbursed funds, or any appropriation of additional amounts.

1. DWSRF

The Funding Target is a long-term sustainable loan capacity for the DWSRF Program, established as \$330 million for SFY 2021-22. However, the program's financing history should be viewed as a long-term average. The DWSRF has historically committed funds below its capacity. Therefore, temporarily committing funds above the sustainable funding level is justified.

2. DWSRF Principal Forgiveness (PF) and Grants for Small, Expanded Small, and Medium Disadvantaged Communities, Small Non-DACs, and Consolidation Projects

Small DACs/SDACs, expanded small DACs/SDACs, Medium DACs/SDACs with Category A-C projects, small non-DACs with Category A-C projects, and consolidation projects may be eligible for DWSRF/PF and/or grants as described in Appendices D and E. Current grant funding is provided by Prop 1, Prop 68, and the infrastructure grant appropriation under Item 3940-106-0001, Provision 1, of Section 2.00 of the Budget Act of 2021 (2021 Budget Act Infrastructure Appropriation). The funding sources are generally interchangeable but may have different eligibility requirements. DFA will allocate the most appropriate grant/PF funds for eligible projects with a complete application.

Estimated Available Grant/PF funds for SFY 2021-22

Funding Type	Total (Million)
PF	\$151.0
Prop 1 grant	\$13.4
Prop 68 grant	\$141.6
2021 Budget Act Infrastructure Appropriation	\$617.5
Total	\$923.5

3. Safe and Affordable Drinking Water (SADW) Fund

The SADW Fund was established through Senate Bill 200 in July 2019. Expenditures from the SADW Fund will be made consistent with the State Water Board's larger Safe and Affordable Funding for Equity and Resilience (SAFER)

Drinking Water program and associated annual Fund Expenditure Plan. The annual Fund Expenditure Plan is intended to complement this IUP as SADW funds are used in combination with DWSRF and SCG DW to address similar goals.

4. ASADRA funds

California's DWSRF is eligible to receive about \$46² million in supplemental funds from the "Additional Supplemental Appropriations for Disaster Relief Act of 2019" (ASADRA). The funds are available to help any DWSRF-eligible entity that was damaged, demonstrates an impact, or had a loss or disruption of a mission-essential function, including loss of function where there was potential impact to public health, from calendar year 2018 wildfires.

The DWSRF will use 30 percent of its ASADRA grant as PF to eligible recipients with the remaining funds provided as loan at zero percent (0.0%). Additional information regarding the availability of and requirements associated with ASADRA funds can be found in the ASADRA Revised Supplemental Intended Use Plan in Appendix H.

5. Other Funding

Groundwater Grant Program (GWGP) – GWGP funds may be available for projects benefitting PWS serving DACs and SDACs for projects that prevent and cleanup contamination of groundwater that serves or has served as a source of drinking water. See the guidelines and funding available from the State Water Board's Groundwater Sustainability Program for more information.

American Rescue Plan – The American Rescue Plan was signed by President Biden on March 11, 2021 and includes \$350 billion under the State and Local Fiscal Recovery Fund which can be invested in infrastructure, including water, sewer, and broadband services. Additional specifics on state allocations, funding requirements, and timing are expected in the future. It is unknown how these funds will affect the DWSRF Program at this time.

H. Fundable List

The recommended Fundable List includes approximately \$1.6 billion in estimated loans/repayable financing which is significantly greater than the Funding Target as explained above. Projects eligible for grants/PF under Appendices D and E, and all consolidation incentive project, are automatically added to the Fundable List provided they submit a complete application and meet all eligibility requirements. For readability, these projects are shown on the Comprehensive List, which includes all projects with active applications. The Comprehensive List is included as Appendix C.

SFY 2021-22 DWSRF Repayable Loan Fundable List Summary

² In addition to the \$42 million originally allocated to California, U.S. EPA recently announced that California is eligible to receive an additional \$4.2 million in funds reallocated from funds originally allocated to Alaska.

Summary	Projected Number of Projects	Estimated DWSRF Loan Amount	Estimated PF/Prop 68 Grant Amount
Small Water System Planning	1	\$108,000	\$0
Large Water System Planning	0	\$0	\$0
Small Water System Construction	4	\$37,875,770	\$3,000,000
Large Water System Construction	30	\$1,522,101,113	\$30,750,000
TOTAL	35	\$1,560,084,883	\$33,750,000

I. Set-Aside Activities

The SDWA allows each state to set aside up to 31 percent (31%) of its federal capitalization grant to support various DWSRF and Division of Drinking Water (DDW) program activities, including (1) the administration of the DWSRF, (2) SWS technical assistance, (3) PWS supervision by DDW and (4) other technical assistance to PWSs in support of technical, managerial, and financial capacity development. The Set-Asides are especially beneficial to SWSs serving SDACs and DACs.

For SFY 2021-22, the State Water Board will set-aside 26 percent (26%) of the 2021 Capitalization Grant for set-aside activities as further described below.

SFY 2021-22 Set-Aside Budget

Set-Aside Category	Max Allowed	Budgeted from FFY 2021 Grant	Estimate
Administration	4%	4%	\$3,880,000
SWS Technical Assistance	2%	2%	\$1,940,000
PWS Supervision	10%	10%	\$9,700,000
Other Local Assistance	10%	10%	\$9,700,000
Total		26%	\$25,220,000

J. Programmatic Requirements

DWSRF requirements are substantially similar to those described in the SFY 2020-21 DWSRF IUP. Any new provisions specific to the FFY Capitalization Grant will apply as directed by Congress or U.S. EPA and would take effect after receiving the Capitalization Grant.

The State Water Board is required to apply federal environmental requirements (“cross-cutters”) in addition to the requirements of the California Environmental Quality Act (CEQA), to equivalency projects. DFA will apply an alternative environmental review process for projects identified as non-equivalency projects. The selection of the non-equivalency projects is described in further detail in Section V.D.1. and Appendix F.

K. Other Activities

DFA is currently working with the Environmental Finance Center (EFC) at California State University, Sacramento on a program management review of California's CWSRF program. The findings from this review will be beneficial to the DWSRF program because DFA administers the DWSRF program using many of the same administrative staff and processes. EFC has developed a draft Program Review Work Plan, in coordination with stakeholders and State Water Board staff, and expects to deliver a final report and recommendations in Fall 2021. The report will identify potential efficiencies, improvements, or enhancements that would facilitate application reviews and execution of loan agreements and disbursements.

L. Schedule

Draft IUP with Revised Supplemental IUP posted for public comment	April 29, 2021
Informational Workshop/Webinar #1	April 29, 2021
Information Workshop/Webinar #2	May 14, 2021
Deadline for Public Comments on Draft IUPs	June 1, 2021
Submit FFY 2021 Capitalization Grant application to U.S. EPA	June 1, 2021
State Water Board considers IUP with Revised Supplemental IUP at regularly scheduled meeting	June 15, 2021
Receive FFY 2021 Capitalization Grant agreement from U.S. EPA	September 2021

I. INTRODUCTION

Clean, affordable, accessible, and safe water adequate for human consumption, cooking, and sanitary purposes is a human right³, and is essential to health and well-being. The State Water Board's DDW and DFA work cooperatively to protect California's drinking water and help ensure that all Californians have access to clean, safe, accessible, and affordable drinking water through several regulatory and financial assistance programs.

The DWSRF program finances infrastructure improvements to mitigate drinking water risks and support the human right to water. In accordance with federal rules, the DWSRF program generally prioritizes financing for projects that (1) address the most serious human health risks, (2) are necessary to comply with federal SDWA requirements and (3) assist public water systems (PWSs) most in need on a per household basis. The DWSRF program is also managed to ensure expeditious use of DWSRF funds and long-term financial strength for future generations.

The State of California (State) also periodically allocates funding to the State Water Board for programs that help provide clean and safe water. Many of these programs can be used in combination with the DWSRF program.

In July 2019, [Senate Bill 200](#) established the Safe and Affordable Drinking Water Fund (SADW Fund). The SADW Fund is one tool in the State Water Board's larger [Safe and Affordable Funding for Equity and Resilience \(SAFER\) Drinking Water program](#). The State Water Board administers the SAFER Drinking Water program primarily through DDW, DFA, and the Office of Public Participation (OPP). The SAFER Drinking Water program's goals are to provide safe drinking water in every California community, for every Californian. The [Policy for Developing the Fund Expenditure Plan for the Safe and Affordable Drinking Water Fund \(SAFER Policy\)](#) was adopted by the State Water Board on May 5, 2020. The SAFER Policy establishes the State Water Board's direction on how the Fund Expenditure Plan will be developed and implemented. The SADW Fund will be used in combination with the DWSRF program to complement the State Water Board's existing suite of financial assistance programs.

This Intended Use Plan (IUP) describes the State Water Board's plan for implementing the DWSRF and its complementary financing programs for drinking water projects to be funded in SFY 2021-22.

A. Authority and Past Achievements

In 1996, the United States Congress and the President amended the SDWA to establish the DWSRF program nationally, based in part on the success of the Clean Water State Revolving Fund (CWSRF) program. All 50 states and Puerto Rico are currently

³ Wat. Code, § 106.3.

operating DWSRF programs. The total DWSRF program financing nationwide currently exceeds \$41.0 billion.

The federal DWSRF program provides each state the opportunity to establish a drinking water public health and infrastructure bank capitalized by federal and state funds. This capital along with its earnings is used to provide financial assistance to a wide variety of drinking water planning and construction projects. The DWSRF program can also provide technical assistance (TA) to help PWSs solve their drinking water problems. States may offer a variety of financing options and customize terms to meet their drinking water public health needs. Financing options include loans, refinancing debt, purchasing or guaranteeing local debt, and purchasing bond insurance. Interest rates must be below the market rate. Repayment periods are generally the lesser of 30 years or the expected useful life of the financed asset and can be as long as 40 years for some communities. Federal statute, regulations and appropriations, as well as California law, have also authorized “additional subsidy” in the form of grants, negative interest rates, and PF on a limited basis. The State Water Board is currently authorized to manage the DWSRF program pursuant to Chapter 4.5 of Part 12 of Division 104 of the Health and Safety Code and an [Operating Agreement](#) with the United States Environmental Protection Agency (U.S. EPA), Region 9. The DFA, in cooperation with DDW, the Division of Administrative Services (DAS), and the Office of Chief Counsel (OCC), implements the DWSRF program in accordance with the [Policy for Implementing the Drinking Water State Revolving Fund](#) (DWSRF Policy) adopted by the State Water Board.

California’s DWSRF has grown since financing its first project in 2000. It has executed more than \$3.50 billion in financial assistance agreements and annual repayments to the DWSRF have recently been approximately \$97.6 million.

The DWSRF program has funded a broad range of projects since its inception. As of April 2021, approximately 85 percent (85%) of DWSRF funds have been for the benefit of large water systems, while approximately 15 percent (15%) of DWSRF funds have been awarded to small water systems (SWSs). However, approximately 69 percent (69%) of funded projects have been for the benefit of SWSs, while 31 percent (31%) of funded projects have been for the benefit of large water systems. The DWSRF has also provided approximately \$422.9 million of grants/PF to disadvantaged communities since 2000.

B. Connections to Other Plans and Goals

In establishing the terms of this IUP, the State Water Board considered statewide policy set forth in section 106.3 of the Water Code. Specifically, subdivision (a) declares it is the established policy of the State that “every human being has the right to safe, clean, affordable, and accessible water adequate for human consumption, cooking, and sanitary purposes.” Subdivision (b) requires the State Water Board to consider this state

policy when “revising, adopting, or establishing policies, regulations, and grant criteria when those policies, regulations, and criteria are pertinent to the uses of water.” State Water Board [Resolution No. 2016-0010](#) adopted the human right to water as a core value and directed its implementation in Water Board programs and activities. This IUP, in addition to the SAFER Drinking Water program, directly supports this policy.

The SADW Fund complements the DWSRF program which addresses capital infrastructure. The SADW Fund may be used for various types of assistance for Public Water Systems (PWS), state small water systems, and domestic wells with demonstrated failure or risk of failure, including but not limited to projects that: (1) provide interim access to safe water sources; (2) contract or provide a grant to an administrator to address or prevent failure to provide safe and affordable drinking water; (3) improve water delivery infrastructure; (4) provide technical assistance to disadvantaged communities; (5) consolidate systems; and (6) fund operation and maintenance for disadvantaged and low-income communities.

U.S. EPA, in cooperation with the State, has designated the State Water Board as the “primacy agency” to implement and enforce the federal SDWA. As the state primacy agency, the State Water Board, through DDW, regulates more than 7,500 PWSs located throughout the State. To assist in this effort, through DDW, the State Water Board has also delegated its primacy authority to 29 local health departments, known as local primacy agencies (LPA), to regulate PWSs serving less than 200 service connections. The State Water Board also promotes safe and reliable drinking water through drought preparedness and water conservation measures; promoting water recycling projects; certifying drinking water treatment and distribution operators; supporting and promoting water system security; providing for small water system technical assistance (SWSTA) and mandating minimum standards for PWS technical, managerial, and financial (TMF) capacity.

The DWSRF program supports the [U.S. EPA Strategic Plan](#) Goal 1 (Core Mission), Objective 1.2: Provide for Clean and Safe Water – “Ensure waters are clean through improved water infrastructure and, in partnership with states and tribes, sustainably manage programs to support drinking water, aquatic ecosystems, and recreational, economic, and subsistence activities.” Specifically, California established and is managing the DWSRF to provide affordable financing and other types of assistance to water systems to finance the cost of infrastructure projects to achieve or maintain compliance with SDWA requirements.

The DWSRF program supports the four goals of the [Water Resilience Portfolio](#) (July 2020): maintain and diversify water supplies; protect and enhance natural ecosystems; build connections and be prepared. The State Water Board is tasked as the responsible agency for 17 actions of which 8 actions require direct involvement from DFA.

Additionally, the DWSRF program supports the State Water Board [Resolution No. 2017-0012](#), which was adopted on March 7, 2017 to establish a comprehensive and

robust response to climate change that will support California's ongoing climate leadership. The State Water Board found that "given the magnitude of climate change impacts on California's hydrology and water systems, our response to climate change must be comprehensive and integrated into all Water Boards' actions." Resolution No. 2017-0012 directed the State Water Board staff to take many actions that affect the DWSRF program and this IUP. Specifically:

- By July 1, 2017, include climate change mitigation and adaptation objectives in the IUP.
- By July 1, 2017, ensure that applications and environmental reviews for potential projects account for impacts related to climate change, including potential effects of climate change on the viability of funded projects.

Similarly, U.S. EPA confirmed in recent years that DWSRF funds may be awarded to projects that address "green" infrastructure, water and energy efficiency improvements, or other environmentally innovative activities. In response to Resolution No. 2017-0012, as well as the "green" objectives of U.S. EPA, the State Water Board will continue to prioritize DWSRF funding in SFY 2021-22 for the installation of new or replacement water meters as a means of promoting effective water conservation and management and energy efficiency and sustainable energy projects. Other Green Project Reserve (GPR) projects may include ones that reduce water losses and energy consumption, reduce the environmental footprint of water treatment and distribution, help utilities adapt to climate change, adopt more sustainable solutions, and promote innovative approaches to water conservation and source protection, as long as they meet all DWSRF criteria and requirements.

The DWSRF program and its project priority approach also support the Governor's [Executive Order B-40-17](#) of April 7, 2017, which states, "The Water Board and [the Department of Water Resources] shall continue to direct actions to minimize water system leaks that waste large amounts of water. The State Water Board, after funding projects to address health and safety, shall use loans from the DWSRF to prioritize local projects that reduce leaks and other water system losses".

The DWSRF program supports the State Water Board's combined [Clean Water and Drinking Water Capacity Development Strategy](#). With DWSRF set-aside funds as well as leveraging DWSRF planning and infrastructure financing, the DWSRF program and this IUP support the following strategic goals of the combined Clean Water and Drinking Water Capacity Development Strategy:

- Strategic Goal 1 - Use available resources to continuously improve the Capacity Development program
- Strategic Goal 2 - Identify systems with low TMF capacity
- Strategic Goal 3 - Assist water systems identified in Goal 2 to improve their TMF and if they are in violation, return to compliance

- Strategic Goal 4 – Ensure all new systems, systems changing ownership and systems using public funds to construct projects have TMF capacity to remain sustainable into the foreseeable future
- Strategic Goal 5 –Strengthen existing and foster new partnerships with federal, state, local governmental entities, environmental justice organizations, local non-profits and drinking water organizations
- Strategic Goal 6 – Provide a system of technical assistance and training for operators, managers and board members to ensure that drinking water provided by public drinking water systems is consistently safe

In 2017, the Drinking Water Capacity Development program, as required by the Safe Drinking Water Act, was moved from DFA to DDW. To preserve the distinction between the capacity development program implemented by DDW and the capacity development strategy implemented by DFA, the strategy implemented by DFA will be renamed the Small Community Capacity Development Strategy when it gets updated. The updated strategy will focus on the priorities of the Office of Sustainable Water Solutions (Office), specifically on the financial and technical needs of small disadvantaged and small severely disadvantaged communities, over the next three fiscal years. The updated strategy will continue to support the above strategic goals.

Per- and polyfluoroalkyl substances (PFAS) are a class of chemicals of emerging concern (CEC). These anthropogenic chemicals may be present in drinking water sources and pose a potential human health risk. The State Water Board's Division of Water Quality and DDW are investigating, in coordination with the Regional Water Quality Control Boards (Regional Water Boards), the magnitude and distribution of PFAS. The DWSRF can provide funding to treat drinking water for the presence of PFAS and will provide funding to eligible entities with projects that are ready to proceed consistent with the "General Project Funding Approach" described in Section III.A below.

C. Intended Use Plan (IUP) and Capitalization Grant Application

This IUP contains elements required under federal law. The State Water Board will submit this IUP as part of its application for the Federal Fiscal Year (FFY) 2021 Capitalization Grant from U.S. EPA and the Revised Supplemental IUP in Appendix H for ASADRA Capitalization Grants. The SFY 2021-22 IUP also serves as guidelines for the State Water Board's administration of Proposition 1 (Prop 1) and Proposition 68 (Prop 68) Drinking Water funds - in general referred to as the "Small Community Grant Drinking Water (SCG DW) funds," and as the Implementation Plan for the 2021 Budget Act Infrastructure Appropriation. Amendments are being incorporated to outline new grant/PF funding criteria resulting from stakeholder outreach related to the \$650 million Drinking Water Infrastructure Appropriation from the General Fund.

In summary, this IUP establishes the State Water Board's business plan for the DWSRF and its associated state funding programs for SFY 2021-22 and discuss the State Water Board's general approach and ability to successfully carry out that business plan with the available financial and programmatic resources. It also describes how the State Water Board will operate the DWSRF and its associated state funding programs in conjunction with other funding sources, outside the State Water Board, that may be used to jointly finance projects.

This IUP outlines the funding and resources available for SFY 2021-22, the prioritization approach used to rank projects for DWSRF and SCG DW funding, and describes the State Water Board's plans for using the FFY 2021 Capitalization Grant and ASADRA Capitalization Grants from U.S. EPA, including a summary of applicable DWSRF federal requirements. The IUPs identify projects that the State Water Board anticipates financing in SFY 2021-22 (Appendix A – the Fundable List and Appendix H, – the ASADRA Fundable List), and forecasts the potential effect they would have on DWSRF cash flows and availability of SCG DW funds over the next several years. This IUP also describes the financing terms for SFY 2021-22, including special financing terms for small disadvantaged communities (DACs) and small severely disadvantaged communities (SDACs). The Revised Supplemental IUP describes the financing terms applicable to projects receiving ASADRA funds. Finally, this IUP details key aspects of the DWSRF program including short and long-term goals, associated performance metrics, and the methods used to achieve the DWSRF program's goals and metrics.

Federal and State laws allow a portion of federal capitalization funds to be used for specified set-aside activities in addition to providing financial assistance to PWSs for infrastructure improvements. In summary, the State Water Board intends to use 74 percent (74%) of the 2021 Capitalization Grant for financing the planning, design, and construction of drinking water infrastructure projects. The remaining 26 percent (26%) of the 2021 Capitalization Grant will be reserved for set-aside activities. Further detail about the planned use of the set-asides can be found in Section IV of this IUP.

The State Water Board may also amend this IUP and the ASADRA IUP, but only after the public and interested parties are given an opportunity to comment on the proposed amendments. The Executive Director, or designee, may update stakeholders during SFY 2021-22 on DFA's progress implementing this IUP and the ASADRA IUP and the current capacity of the DWSRF and its complementary programs to provide financing to applicants.

The State Water Board will continue to implement the DWSRF and its complementary financing programs consistent with applicable state and federal statutes, regulations and policies. These include, but are not limited to:

- [The DWSRF Policy;](#)
- [The SAFER Policy;](#)

- [The SADW Fund Expenditure Plan](#);
- [The Operating Agreement between the State Water Board and U.S. EPA](#);
- [The Clean Water and Drinking Water State Revolving Funds Debt Management Policy](#) (CWSRF/DWSRF Debt Management Policy);
- [The Clean Water and Drinking Water Capacity Development Strategy](#) (Capacity Development Strategy);
- [U.S. EPA Interpretive Guidance regarding the DWSRF](#);
- U.S. EPA's October 23, 2019, Memorandum "[Award of State Revolving Funds Appropriated by the 'Additional Supplemental Appropriations for Disaster Relief Act, 2019'](#)";
- U.S. EPA's February 23, 2021, Memorandum "Reallotment of FY 2019 ASADRA SRF Funds";
- Any additional federal requirements in the 2021 budget appropriation, the 2021 Capitalization Grant Agreement, and/or guidance from U.S. EPA.

D. Supplementary Definitions

Unless otherwise defined below, the definitions in the DWSRF Policy shall apply to funding under this IUP.

1. "Consolidation" means joining two or more public water systems, state small water systems, or affected residences not served by a public water system, into a single public water system.
2. "Medium Disadvantaged Community" means a community with a population between 20,000 and 100,000 people and with a combined median household income (MHI) less than 80 percent of the statewide MHI,
3. "Native American Tribe" means a federally recognized Indian tribe, or a State Indian tribe listed on the Native American Heritage Commission's California Tribal Consultation List.
4. "Non-transient Non-Community Water System" or "NTNC" means a public water system that is not a community water system and that regularly serves at least 25 of the same persons over six months per year.
5. "Receiving Water System" means the public water system that provides service to a Subsumed Water System through consolidation or extension of service.
6. "Subsumed Water System" means the public water system consolidated into or receiving service from the Receiving Water System.
7. "Small Disadvantaged Community" means a community with a population no more than 10,000 persons and with a combined MHI less than 80 percent of the statewide MHI.

8. “Small Non-Disadvantaged Community” means a community with a population no more than 10,000 persons and with a combined MHI greater than or equal to 80 percent of the statewide MHI.
9. “Small Severely Disadvantaged Community” means a community with a population no more than 10,000 persons and whose combined MHI is less than 60 percent of the statewide MHI.

DRAFT

II. DRINKING WATER FINANCING NEEDS

A. Drinking Water Needs Survey and Assessment

Based on the 2015 [Drinking Water Infrastructure Needs Survey and Assessment \(DWINSA\)](#), California needs approximately \$51.03 billion to adequately fund drinking water infrastructure. Based on the survey, California's greatest need is for drinking water transmission and distribution repair/replacement (\$31.2 billion), followed by drinking water treatment (\$9.2 billion), and storage (\$7.0 billion) infrastructure. The DWINSA is to be conducted every four years and results are used to determine allotment of capitalization grants for state DWSRF programs. The next DWINSA began in January 2021 and will continue for most of 2021. California is conducting its assessment during 2021 on 182 large and medium water systems selected by U.S. EPA.

In 2018, the Legislature appropriated \$3 million to the State Water Board to perform a statewide safe and affordable drinking water needs analysis (Needs Analysis). In July 2018, the State Water Board's DDW used this allocation to enter into a service contract with the University of California, Los Angeles and multiple subcontractors to do the following:

- (1) Identify PWSs in violation and at risk of failure, including the development of an interactive geographic information systems (GIS) map;
- (2) Identify state small water systems and domestic wells with known or high risk of unsafe water, including interactive GIS map; and
- (3) Develop a cost analysis for interim and long-term solutions.

The [2021 Drinking Water Needs Assessment](#) was completed in April 2021 and will be updated on an annual basis. Section XI.B. of the [SAFER Policy](#) further defines the above three elements of the Needs Analysis with up to date information available online at: https://www.waterboards.ca.gov/drinking_water/certlic/drinkingwater/needs.html.

B. Comprehensive List of Financing Requests

As a result of California's statewide need, the State Water Board currently has approximately 345 funding requests totaling approximately \$3.4 billion for drinking water planning and construction funding on its Comprehensive List. The Comprehensive List (Appendix B) identifies PWSs seeking financial assistance for specific drinking water infrastructure projects. The funding applications and the due diligence reviews by DFA vary in completeness. A summary of the total funding requested is shown in Table 1 below.

The Comprehensive List includes all funding requests submitted to DFA as of February 2021 and is used to identify potentially eligible projects for the Fundable List. Placement of a project on the Comprehensive List does not constitute a commitment to provide financing. The Deputy Director of the Division will periodically post an updated Comprehensive List on the DWSRF website that will include all projects eligible for grant/PF under Appendices D and E, and all consolidation incentive projects, for which applications were received by DFA after the development of this IUP.

Table 1: SFY 2021-22 DWSRF Comprehensive List Loan Funding Request Summary by Priority Ranking

Priority Ranking	Description	No. of Applications	Estimated Requested Funding
A	Immediate Health Risk	29	\$76,208,831
B	Untreated or At-Risk Sources	14	\$353,201,089
C	Compliance or Shortage	95	\$317,450,775
D	Inadequate Reliability	51	\$76,036,597
E	Secondary Risks	10	\$29,628,989
F	Other Projects	146	\$2,543,194,813
Total		345	\$3,395,721,094

III. PROJECT FUNDING CAPACITY AND DISTRIBUTION OF FUNDS

A. General Project Funding Approach

A primary goal of DFA is to use the DWSRF program and its associated state funding sources to provide drinking water project financing that (1) addresses the most serious human health risks, (2) is necessary to comply with the SDWA, and (3) assists the PWSs most in need on a per household basis. To meet this goal, the State Water Board will use the DWSRF and its complementary funds timely and expeditiously and manage the available funding responsibly.

The State Water Board's drinking water funding priorities in SFY 2021-22 will stress helping small SDACs and small DACs solve their drinking water problems. In particular, available SCG DW funds, DWSRF PF funds, and Drinking Water Small Community Emergency Grant (DWSCEG) funds will be prioritized to address the most serious health risks for these communities. The State Water Board also directs DFA to manage the DWSRF program so that sufficient funds are available under all circumstances to meet the repayable financing needs of small SDACs and small DACs for drinking water projects.

This IUP establishes for SFY 2021-22 a Fundable List (Appendix A) of projects. The Fundable List was developed from applications in process⁴ as of February 2021 and includes those projects DFA believes will achieve the most favorable drinking water results in California during SFY 2021-22 with the financial and programmatic resources available to the DWSRF and its complementary financing programs. All grant/PF eligible projects under Appendices D and E, and all consolidation incentive project, are automatically added to the Fundable List based on this IUP but will be prioritized based on their public health ranking. All other projects were ranked for potential placement on the Fundable List as described in Section VI.B. of the [DWSRF Policy](#). DFA's objective is to execute financing agreements for all eligible projects on the Fundable List for which sufficient funds are available by June 30, 2022.

Grant/PF eligible projects under Appendices D and E, and consolidation incentive projects, are automatically added to the Fundable List, provided they submit a complete application and meet all eligibility requirements. If one of these projects is not on the Comprehensive List at the time this IUP is approved by the State Water Board, it will be added automatically to the Comprehensive List when the applicant starts an application. DFA will periodically post an updated Comprehensive List on the DWSRF website which identifies all projects on the Fundable List, including all grant/PF eligible projects under Appendices D and E, and all consolidation incentive project, for which applications were received by DFA after the development of this IUP. All other projects identified on the Fundable List may receive financing during SFYs 2021-22 and 2022-

⁴ "In process" means that some portion of the [DWSRF application](#) was submitted to the State Water Board.

23, and other projects not included on the Fundable List may be added to the List consistent with the Bypass Procedure in the DWSRF Policy.

Appended to this IUP is a supplementary ASADRA IUP that establishes for SFY 2021-22 a Fundable List (Appendix H) of projects. The ASADRA Fundable List was developed from applications submitted by eligible water systems that were adversely affected by wildfires and earthquakes in calendar year 2018. The Revised Supplemental IUP describes the opportunities to use ASADRA funds and the additional requirements associated with the funds. DFA's objective is to commit all ASADRA funds by June 30, 2022.

Applications for the DWSRF program and associated funding are accepted on a continuous basis. After DFA receives a complete application, a detailed technical, environmental, legal, and financial review is conducted to determine the applicant's eligibility for DWSRF and associated drinking water funding. On a case-by-case basis, the Deputy Director of DFA may approve a limited review of the credit application for general obligation grant funded projects instead of the credit review set forth in the DWSRF Policy. Eligible projects are funded as applications are completed and approved in accordance with the applicable federal and state rules and requirements, including the DWSRF Policy. The online portal to submit an application for the DWSRF and its associated drinking water funding sources can be found at:

<https://faast.waterboards.ca.gov/>.

DWSRF projects, including projects receiving state match funds, will be consistent with the [DWSRF Policy](#)⁵, the [SRF Debt Management Policy](#), the [Operating Agreement](#), U.S. EPA's October 23, 2019, Memorandum "[Award of State Revolving Funds Appropriated by the 'Additional Supplemental Appropriations for Disaster Relief Act, 2019](#)," federal capitalization grant conditions, and applicable federal and state statutes, regulations, and guidance. Any guidelines applicable to the complementary funding sources that may be used to fund a project jointly with DWSRF program funds may also apply.

In addition, funding will be consistent with the requirements of the DWSRF program's Master Trust Indenture and associated bond documents to ensure compliance with the U.S. Securities and Exchange Commission, Internal Revenue Service, and Municipal Securities Rulemaking Board (MSRB) rules and regulations and ensure that all DWSRF revenue bonds are secure and repaid in full and on time.

The funds available to fund drinking water projects generally consist of:

- State bond funds;
- Capitalization Grants from U.S. EPA, potentially including PF;
- Repayments of DWSRF principal and interest on past loans and investment earnings;
- Proceeds from revenue bond sales secured by past DWSRF loans and approved by

⁵ Please refer to Section V.F. of this IUP for an exception to the [DWSRF Policy](#) regarding reimbursement of eligible construction costs.

- the State Water Board;
- SADW Fund; and
- State general fund allocations, including the 2021 Budget Act Infrastructure Appropriation.

DFA may also regulate project commitment or cash disbursement levels, suspend project approvals, or do some combination of these actions to ensure prior commitments are fulfilled. A detailed financial analysis is described in Section III.C.

The State Water Board's disbursement priorities for the DWSRF program during SFY 2021-22 will be:

- Liquidating revenue bond proceeds;
- Liquidating capitalization grants once awarded; and
- Liquidating repayments and investment earnings.

Without restricting the approach described in this IUP, the Executive Director (or designee), should update the State Water Board members and the public at State Water Board meetings or by other appropriate communications regarding the finances of the DWSRF and its complementary financing programs. They should also recommend appropriate adjustments to this IUP or other changes in policy or procedure necessary to achieve the maximum drinking water benefit in California.

General provisions applicable to financing projects in SFY 2021-22 may include, but are not limited to:

1. Best Use of Available Financing Sources and Terms

DFA will consider the requirements associated with all available sources of funds, and pair available funds with projects to achieve the maximum drinking water benefits. In order to provide the best funding package for an applicant, DFA will combine funding sources where appropriate. This includes the use of PF and grant funds, reduced interest rates, match financing, other state sources of funds appropriated to the State Water Board, and other state and federal funding sources managed by other agencies to the extent they are available and compatible with the State Water Board's funding to maximize the financing of drinking water projects.

2. Financing Terms in General

Unless otherwise noted below, the terms established in the DWSRF Policy will be used for drinking water funding.

The State Water Board will provide funding for the planning, design, and construction of eligible drinking water improvements to publicly and privately-owned CW and non-profit, non-community water systems. Eligible planning, preliminary engineering studies, environmental review, project design, and construction costs are described in the [DWSRF Policy](#), Sections X.B. and XI.B. An eligible applicant may apply solely for planning funding with the option to later apply for construction

funding. An eligible applicant may also apply for construction funding with the option to be reimbursed for eligible planning costs as part of the construction financing agreement.

The standard interest rate for repayable planning and construction financing is 50 percent (50%) of California's average general obligation bond rate obtained by the State Treasurer for the previous calendar year. The term for repayable planning projects is a maximum of five or ten years at the applicant's request. Repayable construction financing can be amortized for the lesser of 30 years or the useful life of the financed facilities for all communities; SDAC and DAC communities may finance drinking water construction facilities over the lesser of 40 years or the useful life of the financed facilities.

Privately-owned water systems that serve small, expanded small or medium DACs/SDACs may be eligible for grant/PF based on the following criteria:

- a. Consolidation projects are eligible for 100% grant/PF funding, regardless of project category. The system owner's ability to pay will not be considered in determining funding for reasonable connection fees and constructed facilities that will be owned and operated by the Receiving Water System. The system owner's ability to pay will be considered for any other work occurring on private property. In most cases, funding will be provided to the Receiving Water System. To the extent that the Receiving Water System requires infrastructure improvements (e.g., pipelines, storage tank, new well, treatment) for the consolidation, those improvements may be eligible for 100% grant/PF. The Deputy Director of DFA may reduce or limit reimbursement of connection fees if infrastructure improvements are being funded with grant/PF.
- b. For non-consolidation Category A-C projects, work on private property may be eligible for up to 100% grant/PF. The system owner's ability to pay is considered when determining the grant/PF amount to be provided for construction projects. Planning projects may receive 100% grant/PF or be funded through Technical Assistance.
- c. For non-consolidation Category D-F projects, the system owner's ability to pay will be considered in determining whether to provide any financial assistance.

For projects that consist of consolidation of homes not currently served by a PWS, work on private property including items such as laterals, well destruction, or backflow prevention, can qualify for grant/PF if the community being consolidated is a DAC. If available MHI data for the community doesn't appear representative for some or all of the households served by the consolidation project, household income verification may be required. Exceptions to grant eligibility may apply if the total cost per connection for specific households is significantly higher than others in the community being consolidated.

The State Water Board will prioritize funding to systems or households experiencing serious drinking water public health issues (Category A-C) and consolidation projects. Grant/PF criteria for projects serving small, expanded small, and medium communities addressing Categories A-F, as defined in the DWSRF Policy, and consolidation projects, can be found in Appendix D and Appendix E of this IUP.

3. Financing Terms and Limitations for Specific Applicants

a. MHI Determinations for CWS, NTNC & Communities Not Currently Served by a PWS

In general, the MHI determination for a CWS will be based on the entire permitted service area of the CWS. The MHI is determined using the Census geography that best represents the community (i.e., city/Census Designated Place [CDP] or block group). DFA utilizes the American Community Survey (ACS) data set to determine the MHI of a community. ACS data is updated annually using a five-year rolling average. New ACS data is utilized by DFA as of April 1st of each year. If the MHI cannot be determined due to unavailable ACS data or the available data is not considered representative based on consultation with DDW or Regional Board staff, an income survey may be conducted. An impartial third party must conduct an income survey in accordance with the current Multiagency Income Survey Guidelines.

A NTNC owned by a K-12 public school district is deemed to serve a severely disadvantaged community because the primary users are minor students. Minors generally have incomes below 60 percent (60%) of the statewide MHI. All other eligible NTNCs and the MHI of the small community they serve will be evaluated on a case-by-case basis based upon the intended customer base.

If DWSRF funding is used to finance a project for the extension of water service by a PWS to a small community not currently being served by a PWS, then for purposes of providing reduced interest rates and PF, the MHI of the PWS extending service will be considered. If state funds are used for a project, then the MHI of the small community not currently being served by a PWS may be considered for the evaluation of DAC status and grant eligibility.

In making DAC determinations, the State Water Board will consider whether the households benefitting from the project are primary residences. If a community includes secondary homes in an amount that is greater than 50 percent of the total number of dwellings, the community will not be considered a DAC. A community with between 25 percent and 50 percent secondary homes will be evaluated on a case-by-case basis to determine eligibility for grant/PF or partial grant/PF, except Category A-C projects or consolidation projects do not require a case-by-case analysis to qualify as DAC for purposes of grant eligibility, so long as all other criteria are met. Typically, permanent residents are those residing in the community at least six months out of the year; however, seasonal, migrant laborers can also be counted as permanent residents.

If a project will benefit a system that has industrial/commercial connections that account for greater than ten percent of the total water consumption, then grant/PF funding may be reduced for costs attributable to industrial/commercial use. In addition, project components that are solely for industrial/commercial use (e.g., water meters) are not grant/PF eligible.

b. Subsidized Planning Financing

Eligible small CWSs (SCWSs) serving a small DAC/small SDAC, eligible NTNCs serving a small DAC or small SDAC, and eligible PWSs extending service to small DACs and small SDACs may receive grant/PF in accordance with Appendix D. Repayable financing will also be made available if grant/PF funding is insufficient to fully fund a planning project.

c. Subsidized Construction Financing

The following PWSs may be eligible for reduced interest rates and PF, grant, or a combination of PF and grant for a construction project in accordance with the terms in Appendix E, to the extent consistent with state and federal law.⁶

1. A SCWS serving a small DAC, small SDAC, or small non-DAC.
2. A SCWS serving a small DAC, small SDAC, or small non-DAC that is owned by a Native American Tribe.

⁶ Eligibility for non-repayable financing varies depending on funding source, and is only available to the extent consistent with state and federal law.

3. A NTNC that serves a small DAC or a small SDAC, if the system serves solely the following:

- a public K-12 school⁷; and/or
- a not-for profit K-12 private school; and/or
- a not-for-profit daycare facility, and/or
- a not-for profit labor camp; and/or
- a not-for-profit elder care facility; and/or
- a not-for-profit health care facility

Grant/PF funds will only be awarded to an eligible NTNC to the extent the NTNC cannot afford the full cost of repayable financing. With the exception of a PWS owned by a public school district, the current operating budget shall be evaluated when determining an eligible NTNC's ability to afford repayable financing. As stated in the DWSRF Policy, a PWS eligible NTNC owned by a public school district is deemed to have no ability to repay any financing, and is therefore eligible for 100% grant/PF, subject to all other eligibility rules and requirements. To determine the equivalent service connections for a school, the total number of staff and students is divided by 3.3.

4. A PWS that is extending service to a small DAC, small SDAC, or a small non-DAC not currently served by a PWS.

5. An Expanded SCWS that serves a DAC or SDAC.

6. A Medium CWS that serves a DAC or SDAC with a Category A-C project.

The Prop 1 and Prop 68 Drinking Water local cost share may be reduced for a SCWS, Expanded SCWS, or Medium CWS that serves a DAC or SDAC and a NTNC that serves a small DAC or small SDAC and a PWS extending service to a small DAC or small SDAC.

⁷ Notwithstanding the definition of "not-for-profit" in the DWSRF Policy, NTNCs owned by public schools are deemed to be not-for-profit and may be eligible for PF.

In evaluating project eligibility, DFA will consider any drinking water-related settlement funds received by or due to the applicant, including those related to 1,2,3- Trichloropropane (1,2,3-TCP), when determining grant/PF eligibility. Pending or unrestricted funds must either be allocated to a capital improvement project related to the settlement or placed in a restricted account (e.g., escrow or other restricted account) reserved specifically for operation and maintenance of the portion of the system that removes or treats the contaminant. If neither of these options is available, a condition of State Water Board funding will be that settlement funds are held in a capital reserve and/or emergency reserve account to help bolster the financial capacity of the system.

4. Consolidation

It is the intent of the State Water Board to promote consolidation where appropriate and feasible, especially among SCWS serving DACs and SDACs. Many SCWSs struggle to meet minimum state and federal requirements to provide safe and reliable drinking water. Due to their smaller scale and limited resources, SCWSs face many TMF challenges and have difficulty maintaining long-term compliance. Infrastructure projects are increasingly costly, the technical complexity of compliance grows, and economic constraints are especially onerous for these systems. Consolidation is a promising solution to many difficulties faced by SCWSs, particularly when confronted with compliance-related problems or depleted water sources. To support consolidation, DFA, in coordination with DDW, will continue to emphasize consolidation opportunities by providing project financing and technical assistance.

DFA will continue to require that all funding applicants evaluate the feasibility of consolidation to be eligible for DWSRF construction funding. If planning funding is being provided to a SCWS, DFA may also require a consolidation assessment prior to reimbursement of other planning activities under the planning funding agreement. For SCWS applicants proximal to another community water system within 1.5 miles, the feasibility assessment or study shall include a consolidation assessment with an analysis of consolidation alternatives, including estimates of consolidation costs. For SCWS applicants proximal to another community water system at a distance greater than 1.5 miles, DFA may determine that a consolidation assessment is necessary. The consolidation assessment shall also include an assessment of the cost-effectiveness of consolidation over at least a period of 30-years.

If the applicant determines consolidation is infeasible, the applicant will be required to discuss the reasons supporting that determination. If consolidation is determined to be feasible and the most sustainable solution by DFA based on the consolidation assessment or other supplemental factors, DFA may provide grant/PF for the applicable consolidation project only, and not any alternative to consolidation. Loan funding may be available for alternative projects when consolidation is determined to be feasible but is not the preferred solution identified by the applicant. There may be unique cases where a non-consolidation improvement project is necessary as an interim step to support future consolidation opportunities, and grant/PF eligibility for such projects will be evaluated on a case-by-case basis.

Consolidation projects will be prioritized for DWSRF and associated drinking water funding. As part of a consolidation project, reasonable and necessary connection fees or source capacity fees may be eligible for grant/PF. If a Receiving Water System does not have sufficient capacity to serve the additional customers of the Subsumed Water System, grant/PF funding may be available to increase a Receiving Water System's water supply capacity. The Deputy Director of DFA may approve grant funding for necessary improvements to recently consolidated systems for good cause.

During SFY 2021-22, the State Water Board may continue to offer incentives to encourage the consolidation of PWSs, especially those systems experiencing serious drinking water public health issues. The incentives the Division is authorized to offer a Receiving Water System for consolidation (Consolidation Incentives) include, but are not limited to:

- A PWS fully consolidates an existing water system(s) or a community not currently served by a PWS (at least 15 residential service connections or a year round population of at least 25 people).
 - Up to \$10 million in zero percent (0%) interest rate financing per consolidated community/water system from available sources for a construction project that solely benefits a Receiving Water System (Incentive Project); and
 - Grant/PF funding for an Incentive Project of up to \$3,000 per connection when consolidating a community water system that does not qualify as a small DAC, \$5,000 per connection when consolidating a small DAC, or up to \$10,000 per connection when consolidating a small SDAC water system. Maximum of \$5 million grant/PF per consolidated community/water system.
- A PWS either managerially consolidates or provides water via an interconnection (where separate water system permits still exist), or a master meter agreement to one or more SCWS (where separate water system permits still exist).
 - Up to \$2 million in zero percent (0%) interest rate financing for an Incentive Project; and
 - Grant/PF funding of up to \$2,500 per connection when managerially consolidating or providing water via an interconnection/master meter to a small DAC water system or up to \$5,000 per connection for a small SDAC

water system for an Incentive Project. Maximum of \$1 million grant/PF per water system.

- PWS acts as an administrator to one or more SCWSs.
 - Up to \$5 million in zero percent (0%) interest rate financing for an Incentive Project; or
 - Grant/PF funding of up to \$2,500 per connection when acting as an administrator for a small DAC water system or up to \$5,000 per connection for a small SDAC water system for an Incentive Project. Maximum of \$1 million grant/PF per water system.

The Consolidation Incentive may be applied to one or more DWSRF- or SADW-eligible projects chosen by a Receiving Water System. Consolidation Incentives may include, but aren't limited to, infrastructure improvements to mitigate drinking water risks and support the human right to water, O&M support, refinancing existing loans, and/or loan forgiveness to the extent allowed by applicable statutes. Incentive Project financing may be combined with other DWSRF or SADW financing options to fully fund an Incentive Project. The subsidized financing for the Incentive Project is in addition to any subsidized financing for the associated Consolidation Project.

Additional criteria and application requirements for the Consolidation Incentive include:

- The Receiving Water System is a voluntary participant in the consolidation project. Consolidation Incentive will not be available to Receiving Water Systems completing a [mandatory consolidation](#), unless the Executive Director or designee approves a case-by-case exception for good cause.
- The Receiving Water System should submit, at minimum, a [DWSRF General Application Package](#) or [Urgent Drinking Water Needs \(UDWN\) Application](#) for the Incentive Project(s) to DFA before the execution of the funding agreement for the associated Consolidation Project(s).
- The DWSRF or UDWN application must indicate that it is for an Incentive Project associated with a specific Consolidation Project or group of Consolidation Projects.
- The Receiving Water System must complete and submit a full DWSRF or UDWN application for the Incentive Project(s) within one year of the execution of the funding agreement for the associated Consolidation Project. The Deputy Director of the Division can allow for additional time for good cause.
- In the case where the Consolidation Project has been designed to include the Incentive Project, then up to \$10 million in zero percent (0%) funding shall apply to those proportional costs that are part of the Incentive Project. The Consolidation Project may also receive up to \$5 million grant/PF funding towards the Incentive Project as described above. The remaining costs associated with the Consolidation Project shall be funded in accordance with the repayable and financing terms discussed in Section V of this IUP. For example, the Receiving Water System may choose to replace some of its distribution system pipeline at the same time as the Consolidation Project. If the distribution system replacement that solely benefits a Receiving Water System is estimated to cost

\$15 million, then that portion of the project may receive up to \$5 million incentive grant/PF (depending on the community that is being consolidated) and up to \$10 million in 0% financing.

5. Small Water System Reserve

Federal rules require that at least 15 percent (15%) of available DWSRF funding be provided to PWSs that serve less than 10,000 people to the extent that projects for these PWSs are eligible and ready to proceed to a funding agreement (Small Water System Reserve). Based on the DWSRF SFY 2021-22 Funding Target of approximately \$330 million, the minimum that must be reserved for small water systems (SWSs) is approximately \$49.5 million. Regardless of the minimum federal funding requirements for SWSs, the State Water Board will prioritize DWSRF funding for eligible SWSs that are ready to proceed to a funding agreement, to the maximum extent practicable, bearing in mind all other federal and State requirements regarding the prioritization of DWSRF funding.

6. Green Project Reserve (GPR)

Like prior years' capitalization grants, the FFY 2021 Capitalization Grant may provide for an optional reserve of DWSRF funds for projects to address green infrastructure, water or energy efficient improvements, or other environmentally innovative activities (Green Project Reserve). While DWSRF funding is to be prioritized first for "ready-to proceed" projects that address risks to human health and ensure compliance with safe drinking water standards, the State Water Board also acknowledges the importance of the Green Project Reserve, especially in cases of promoting water conservation through the installation of water meters. The SFY 2021-22 Fundable List includes at least four projects with water meter installations for more than \$35 million that may be ready-to-proceed to funding in SFY 2021-22. Other Green Project Reserve (GPR) projects may include ones that reduce water losses and energy consumption, reduce the environmental footprint of water treatment and distribution, help utilities adapt to climate change, adopt more sustainable solutions, and promote innovative approaches to water conservation and source protection, as long as they meet all DWSRF criteria and requirements.

7. Match Financing Option

California is required to contribute to the DWSRF at least one dollar of matching funds for every five federal dollars contributed to the program. Section V.C. provides a more detailed discussion of California's matching contribution to the DWSRF. Offering match financing in accordance with Section VII of the [DWSRF Policy](#), where the applicant provides the funds to match the federal grants, is one way California meets the match requirement.

DFA may offer local match financing to eligible DWSRF program applicants in accordance with Section VII of the DWSRF Policy. DFA will generally use the state's contribution ratio, i.e., one matching dollar for every five federal dollars, for each participating project. If the current interest rate makes a local match loan at the state's contribution ratio uncompetitive, DFA may lower the contribution ratio on any

given project so that the imputed interest rate is competitive with the standard DWSRF interest rate for construction financing.

8. Advance Payment

Proposition 1 and Proposition 68 state that, “not more than 25 percent of a grant may be awarded in advance of actual expenditures.” (Wat. Code, § 79724, subd. (a)(1), incorporated in Pub. Resources Code, § 80140, subd. (a).) An advance payment program will be established and approved by the Deputy Director of the DFA and will be posted to the DFA webpage at a later date.

B. Recent Financing Activity⁸

From July 1, 2020 to March 1, 2021 the State Water Board has provided the following financing from the DWSRF and complementary financing programs.

Table 2: SFY 2020-21 DWSRF Financing to March 1, 2021

	DWSRF Repayable Loan	DWSRF PF	SCG DW	Other ⁹	DWSCEG	Totals
Number of Agreements¹⁰	4	7	23	1	0	26
\$ in millions	\$111	\$6	\$49	\$30	\$0	\$196

DFA is currently drafting agreements for another 33 projects for an additional \$173 million in funding. Some of these agreements will be executed by June 30, 2021. DFA estimates that cumulative SFY 2020-21 financing through the DWSRF and complementary financing programs will be approximately \$350 million.

Table 3: Recent DWSRF and Complementary Financing

SFY	Number of Agreements, Estimated	\$ of Agreements (in millions), Estimated
2017-18	72	\$336
2018-19	24	\$250

⁸ Prop 1 funding activity can be found at http://www.waterboards.ca.gov/water_issues/programs/grants_loans/proposition1.shtml.

⁹ City of San Diego's Pure Water Project received funds from Prop 68, but is not considered a SCG DW project.

¹⁰ Seven projects received funding from more than one source. Therefore, the number of unique financing agreements was 26.

2019-20	49	\$193
---------	----	-------

C. Financial Outlook

1. DWSRF Cash Flow¹¹ and Funding Target

Appendix C shows the forecasted cash flow (sources and uses) of the DWSRF program as of April 2021. Except for capitalization grants, the future cash flow of the DWSRF program can be predicted with reasonable certainty. The estimated cash flow includes:

- The cash balance at the beginning of SFY 2020-21;
- U.S. EPA capitalization grants¹²;
- Principal and interest payments on outstanding receivables;
- Investment earnings;
- Disbursements to projects with executed financing agreements; and
- Debt service payments.

The DWSRF estimated year-end cash balances through June 30, 2024 generally range from approximately \$31 million to \$467 million as seen in Appendix C. The DWSRF's Municipal Advisor, in cooperation with DFA staff, has analyzed the DWSRF's lending capacity as part of developing this IUP. Given current capitalization and debt levels, and assuming conservative future capitalization, loan terms and earnings levels, and bond and coverage terms, the DWSRF can operate at an estimated sustainable financing level of approximately \$330 million per year. The capacity is the amount of new lending that could be done per year with the existing loan pool and new loans pledged to potential bonds. The annual capacity is a level amount that could be originated each year for the next 20 years. The Funding Target, therefore, for SFY 2021-22 will be \$330 million in new financing.

2. DWSRF Additional Subsidy (PF)

The SDWA allows states to award up to 35 percent (35%) of the federal capitalization grants as "additional subsidy" to PWSs serving disadvantaged communities in the form of PF, negative interest rates, or grants. As with the FFY 2020 DWSRF Capitalization Grant, the FFY 2021 Capitalization Grant also mandates that states provide an additional 14 percent (14%) of the capitalization grant as Additional Subsidy to eligible projects/recipients. This additional 14 percent (14%) allocation of Additional Subsidy is not restricted to PWSs serving DACs.

¹¹ The overall cash flow includes the available PF funds.

¹² Based on the recent adoption of the federal budget for FFY 2021, the 2021 Capitalization Grant is estimated at \$97,047,000, of which \$71.8 million will be available for project funding and the remainder \$25.2 million reserved for set-asides. Future Capitalization Grants are based on the historical annual average of \$85 million per grant and the maximum reservation of DWSRF set-asides allowed.

Given the foregoing, and subject to the final FFY 2021 Capitalization Grant terms and conditions, the State Water Board will provide the maximum Additional Subsidy allowed by the FFY 2021 Capitalization Grant. The Additional Subsidy will be provided as PF to eligible PWSs that serve small DACs/SDACs, expanded small DACs/SDACs, and small non-DACs with projects in Categories A-C, to the extent authorized by state law. Current estimates suggest that the FFY 2021 Additional Subsidy will be approximately \$47 million. Any prior year Additional Subsidy will also be committed to fund eligible projects. The total PF available for projects in SFY 2021-22 is estimated at \$151 million.

It is the intent of the State Water Board to provide for the effective and equitable use of the limited amount of grant/PF funds. Therefore, the Additional Subsidy shall be prioritized in accordance with the DWSRF Policy and be awarded in accordance with the affordability criteria detailed in Section III.A.3. The eligible grant/PF funding amount for any project may also be reduced by the Deputy Director of DFA for good cause.

DFA will administer available PF consistent with the conditions and limitations in Appendices D and E.

3. Small Community Grant Drinking Water (SCG DW)

The Office of Sustainable Water Solutions (Office) was established on March 27, 2015 as a result of the Governor signing [Assembly Bill 92](#). The Office is part of the State Water Board's DFA. The Office was created to promote permanent and sustainable drinking water and wastewater treatment solutions to ensure effective and efficient provision of safe, clean, affordable, and reliable drinking water and wastewater treatment services, focusing on addressing financial and technical assistance needs, particularly for small disadvantaged communities. The Office provides small DACs and small SDACs low interest loans and PF through the DWSRF program and grants through the Small Community Grant Drinking Water (SCG DW) program, 2021 Budget Act Infrastructure Appropriation, and Safe and Affordable Drinking Water Fund utilizing state and federal funds. The Office administers the funds consistent with this IUP and the DWSRF Policy to the extent allowed by federal regulations and state law and consistent with the conditions and limitations in Appendices D and E.

a. Prop 1 grant

[Proposition 1, the Water Quality, Supply, and Infrastructure Improvement Act of 2014 \(Assembly Bill 1471, Rendon\)](#) authorized \$7.545 billion in general obligation bonds for water projects including surface and groundwater storage, ecosystem and watershed protection and restoration, and drinking water protection. Section 79724 of Prop 1 allocated \$260 million for drinking water grants and loans for PWS infrastructure improvements and related actions to meet safe drinking water standards, to ensure affordable drinking water, or both.

b. Prop 68 grant

[Proposition 68, the California Drought, Water, Parks, Climate, Coastal Protection, and Outdoor Access for All Act of 2018 \(Senate Bill 5, De León\)](#) authorizes \$4 billion in general obligation bonds for water projects including surface and groundwater storage, ecosystem and watershed protection and restoration, and drinking water protection. Section 80140 of Prop 68 allocates \$220 million for drinking water and clean water grants and loans for PWS infrastructure improvements and related actions to improve water quality or help provide clean, safe, and reliable drinking water.

The SCG DW funds from Prop 1 and Prop 68, as well as Props 13, 50, 84 and future state funds, will be administered consistent with this IUP and the DWSRF Policy to the extent allowed by federal regulations and state law. The joint administration of the DWSRF and SCG DW funds allows the State Water Board to leverage the low-interest and PF financing available through the DWSRF program with additional subsidies provided through state bond funds. Projects that receive only state general obligation bond funds or other non-federally sourced funding may be exempted by the Deputy Director from having to comply with certain federal cross-cutting

requirements. This does not include projects receiving funds serving as state match for federal capitalization grants, which cannot be exempted from applicable federal cross-cutting requirements.

To the maximum extent practicable, the State Water Board will direct available SCG DW funds for grants to SWSs serving DACs and SDACs. To further assist DACs and SDACs in addressing drinking water emergencies, the State Water Board may also provide SCG DW grants to state agencies that act on behalf of disadvantaged communities where a PWS has been identified as an otherwise eligible applicant.

As of SFY 2017-18 all Prop 1 drinking water funds were substantially committed to eligible projects. If existing encumbrances of Prop 1 funds are de-obligated because projects are completed under budget, then these funds will be made available to eligible projects consistent with State budget authority. See Table 4 below for Prop 1 and Prop 68 fund appropriations and uncommitted balances.

Table 4: Status of SCG DW Funds

As of March 1, 2021

Source	Enactment Year	Appropriation* (in Millions)	Uncommitted (in Millions)	Encumbrance End Date	Liquidation End Date
Prop 1 DW	2014-15	\$67.5	\$6.6	6/30/2021	6/30/2023
Prop 1 DW	2015-16	\$174.3	\$6.8	6/30/2021	6/30/2023
Prop 68 DW	2018-19	\$62.2	\$0	6/30/2021	6/30/2023
Prop 68 DW	2019-20	\$169	\$141.6	6/30/2022	6/30/2024

*Includes projects serving as state match for the DWSRF and administration of Prop 1 funds

- c. 2021 Budget Act Infrastructure Appropriation** – The Budget Act of 2021 (Senate Bill 129 and Senate Bill 170) appropriated \$1.55 billion to the State Water Board in item 3940-106-0001. The budget bill specified that \$650 million is for drinking water projects, with priority given to disadvantaged communities. Up to five percent of the funds may be used for State Water Board administrative costs (leaving \$617.5 million for drinking water grants). Up to ten percent may be utilized for technical assistance and capacity building in DACs. Projects receiving only 2021 Budget Act Infrastructure Appropriation grant funds or other non-federally sourced funding may be exempted by the Deputy Director from having to comply with certain federal cross-cutting requirements. This does not include projects receiving funds

serving as state match for federal capitalization grants, which cannot be exempted from applicable federal cross-cutting requirements.

The Deputy Director of DFA has authority to direct 2021 Budget Act Infrastructure Appropriation grant funds to qualified technical assistance providers to support DACs.

d. Drinking Water Small Community Emergency Grant (DWSCEG)

The State Water Board may apply a DWSCEG charge as a charge-in-lieu of interest¹³ to any eligible DWSRF repayable financing in an amount not to exceed the standard interest rate of the financing. Once the charge is applied to an agreement, the rate shall remain unchanged for the duration of the agreement, unless the Deputy Director of DFA determines any of the following:

- The DWSCEG charge is no longer consistent with federal requirements regarding the DWSRF; or
- The DWSCEG charge is no longer necessary; or
- The DWSCEG charge is negatively affecting DFA's ability to fund projects that support the State Water Board's goals.

The revenue generated by this charge shall be deposited into the DWSCEG Fund and used for small SDAC and small DAC drinking water projects after SCG DW and DWSRF PF funds are fully encumbered.

DFA did not have any DWSCEG available during SFY 2020-21 and is not currently collecting a DWSCEG charge on any active projects.

The State Water Board may apply the DWSCEG charge to eligible loans in SFY 2021-22 subject to the availability of eligible loans and any projected demand for grant funding that exceeds all other available funding sources. If applied to an eligible loan then the DWSCEG charge will be set so that it does not jeopardize the long-term growth of the DWSRF, the State Water Board's ability to leverage the DWSRF, or the State Water Board's ability to collect sufficient revenue to administer the DWSRF.

4. Groundwater Grant Program (GWGP)

Groundwater Grant Program (GWGP) Chapter 10 of Prop 1 provides \$670 million to the State Water Board for grants for projects to prevent or clean up the contamination of groundwater that serves or has served as a source of drinking

¹³ Like the administrative service charge (see Section III.G.3. below), the DWSCEG charge is also a fee "other than program income not included as principal in DWSRF financing" for federal purposes. The DWSCEG charge is collected, as is the administrative service charge, in-lieu of an equal amount of interest that would otherwise be due on the outstanding balance of the financing agreement so that the annual payment stays the same.

water. The third and final solicitation is planned for 2021. GWGP funds may be available for projects benefitting PWS serving DACs and SDACs for projects that prevent and cleanup contamination of groundwater that serves or has served as a source of drinking water. GWGP funds will be administered consistent with Appendices D and E, except that: (1) GWGP funds may be available for projects benefitting SDACs, and for DACs with water rates at least 1.5% of MHI, regardless of the number of service connections or population served, and (2) GWGP grants may be awarded in addition to grants or principal forgiveness awarded through the DWSRF/SCG DW. DFA staff will coordinate with applicants to determine if projects meet the applicable requirements for GWGP funds. See the guidelines and funding available from the State Water Board's Groundwater Sustainability Program for more information.

5. Additional Supplemental Appropriations for Disaster Relief Act of 2019 (ASADRA)

California's DWSRF is eligible to receive \$46,339,000 in supplemental funds from ASADRA. The funds are available to help any DWSRF-eligible entity that was damaged, demonstrates an impact, or had a loss or disruption of a mission-essential function, including loss of function where there was potential impact to public health, from calendar year 2018 disasters.

The ASADRA Fundable Project List has an estimated total of \$60,015,239 in requested financing for an available \$46,339,000 in ASADRA loan and principal forgiveness. The Deputy Director of DFA is authorized to offer DWSRF loan at 0% interest for the difference in requested and available ASADRA financing.

ASADRA application demand, availability, and Fundable Project List are described in Appendix H.

6. Other Programs

The actions taken to address the current Covid-19 pandemic have had a dramatic economic impact on millions of Californians. The potential exists for additional state or federal stimulus funding for water infrastructure to aid in the economic recovery from the Covid-19 pandemic. The American Rescue Plan was signed by President Biden on March 11, 2021 and includes \$350 billion under the State and Local Fiscal Recovery Fund which can be invested in infrastructure, including water, sewer, and broadband services. Additional specifics on state allocations, funding requirements, and timing are expected in the future.

Other sources of funds may become available to the State Water Board that are similar in nature to the DWSRF and its complementary funding sources. If additional state or federal funding becomes available during SFY 2021-22, the State Water Board will commit the funds consistent with any guidelines or requirements associated with their authorization and may be committed consistent with this IUP if

appropriate. Alternatively, additional funding sources may require an amendment to this IUP or additional guidance from the State Water Board.

D. Development and Implementation of the Fundable List

To the maximum extent practicable, priority for funding and placement on the Fundable List is given to projects which: 1) address the most serious risk to human health, 2) are necessary to ensure compliance with the requirements of the SDWA, and 3) assist systems most in need on a per household basis. Projects eligible for grant/PF under Appendices D and E, and all consolidation incentive projects, are automatically on the Fundable List but grant funding will be prioritized based on their public health ranking. All other projects were ranked and placed on the Fundable List in accordance with Section VI.C. of the DWSRF Policy.

The State Water Board acknowledges that the grant/PF applications currently exceed the estimated balance of grant/PF funds. Therefore, projects requesting grant/PF will be prioritized based on their public health ranking and their actual readiness to proceed to a funding agreement per the DWSRF Policy and this IUP. DFA intends to commit funds to Category A-C projects or consolidation projects.

State Water Board staff resources and eligibility reviews will be prioritized for Project Categories A-C from small DACs or SDACs prior to other projects included on the Fundable List. The DWSRF Policy directs staff to review and approve financing for eligible projects that have complete applications in the order they are ranked and are ready to proceed to a financing agreement. DFA's goal is to execute financing agreements for all eligible projects on the Fundable List for which sufficient funds are available by June 30, 2022.

The SFY 2021-22 DWSRF Loan Fundable List includes both planning and construction projects. There are 35 projects from non-disadvantaged PWSs or large PWSs on the Fundable List for a total request of approximately of \$1.6 billion in repayable financing (Appendix A). Of these, three construction projects may receive an estimated total of \$33.7 million in ASADRA principal forgiveness or grant funding. Table 5 shows a summary of funding requested by system size and type of project.

Table 5: SFY 2021-22 DWSRF Repayable Loan Fundable List Summary by System Size and Project Financing Type

Summary	Projected Number of Projects	Estimated DWSRF Loan Amount	Estimated PF/Prop 68 Grant Amount
Small Water System Planning	1	\$108,000	\$0
Large Water System Planning	0	\$0	\$0
Small Water System Construction	4	\$37,875,770	\$3,000,000
Large Water System Construction	30	\$1,522,101,113	\$30,750,000
TOTAL	35	\$1,560,084,883	\$33,750,000

Several projects on the Fundable List have been approved for financing as of February 2021 and may receive an executed agreement by June 30, 2021. One project may be co-financed with the Clean Water State Revolving Fund because it appears to be eligible for both programs¹⁴.

E. Financing Forecast

Past experience indicates that many of the SWS applicants will require technical assistance and that not all of the SWS planning and construction projects will be ready for a funding agreement by SFY 2021-22. DFA will execute financing agreement with as many SWS as possible and continue to assist the remaining communities toward a financing agreement so they are ready to sign an agreement quickly when funds do become available.

Although the SFY 2021-22 Fundable List includes projects that cumulatively exceed the repayable Funding Target, the Deputy Director of DFA, or designee, may add projects to the Fundable List in accordance with the bypass procedure in the DWSRF Policy. Average financing over the previous five years has been approximately \$276 million.

¹⁴ The amounts on the Fundable List for projects or interrelated programs that are recommended for partial repayable funding may be allocated or reallocated to multiple financing agreements at the request of the applicant. The Deputy Director of DFA is authorized to coordinate or limit the cash draws for projects or interrelated programs identified for partial funding to limit the collective impact of these financing agreements on the DWSRF. The Deputy Director of DFA is also authorized to coordinate or limit the cash draws for projects or interrelated programs identified for funding with a combination of the CWSRF and DWSRF to control the impact of these financing agreements on those programs. The funding amounts are subject to increase in a future IUP. Each applicant recommended for partial funding appears capable of obtaining the remaining financing necessary to successfully complete the projects or interrelated programs.

dollars annually - below the estimated sustainable capacity of \$330 million per year. In addition, given the recent slowdown in new commitments, the Fundable List should promote ready to proceed projects. Past experience also indicates that not all of the projects on the Fundable List will be ready for a financing agreement this fiscal year. Having a larger Fundable List allows DFA to better manage the DWSRF loan financing, and the flexibility to add projects that are ready for a loan allows the State Water Board to make full use of the repayable financing capacity of the DWSRF.

F. Future Financing Trends

The current application/commitment trends suggest that the State Water Board can fund additional projects with DWSRF program repayable financing. The ability of the DWSRF program to leverage current assets remains underutilized and DFA continues to emphasize projects that are “ready-to-proceed to a financing agreement.”

If DFA is successful at making a substantial portion of the commitments on the recommended SFY 2021-22 Fundable List, additional capital through the sale of DWSRF debt may be required. DFA will continue to evaluate the need for additional debt relative to average long-term funding levels and the State Water Board’s direction in the *SRF Debt Management Policy*.

Grants/PF will be available in SFY 2021-22, but it will be necessary this year to prioritize the requests for this funding due to their limited availability. PF is expected to continue to be available from the capitalization grants. However, it is likely that requests for PF and grant funds will continue to outpace the availability of those non-repayable funds. Therefore, DFA and DDW will continue to prioritize projects receiving those funds based on projects addressing the most pressing public health risks and readiness to proceed to a financing agreement.

G. DWSRF Resources and Workload

1. Organization, Program Resources, and Skills

Approximately 36.6 Personnel Years (PY) are budgeted for the DWSRF Program¹⁵ in SFY 2021-22 and the number of positions is not expected to change substantially. These positions are distributed between DFA and the Office of Chief Counsel (OCC) as follows:

- 3.9 PYs for Environmental Scientists to ensure compliance with state and federal environmental and cultural resources requirements (DFA);

¹⁵ In addition to positions funded directly by the DWSRF, the State Water Board has other state-funded positions associated with its complementary funding programs as noted earlier. Many projects may be financed by a combination of DWSRF and state funds. Staff is trained to help applicants receive financing for their projects regardless of the funding sources; therefore, state-funded positions indirectly provide benefit to the DWSRF program and vice versa.

- 16.2 PYs for Water Resources Control Engineers and Sanitary Engineers to manage project applications (DFA), and provide technical assistance, with approximately 10 PYs dedicated to processing applications from SDACs and DACs and providing associated technical assistance¹⁶;
- 7.4 PYs for administrative support (DFA);
- 7.8 PYs for Program management and staff oversight (DFA);
- 2.0 PYs for legal support (OCC); and
- 0.9 PYs for other environmental and engineering support of project eligibility reviews

Additional indirect cost support is provided by accounting, personnel, budget, and contract support staff in the Division of Administrative Services.

The DWSRF program relies on some contracted services that (i) cannot be provided economically by Water Boards staff, (ii) require skills not available in the State Water Boards, or (iii) require independence from the DWSRF program. Approximately \$750,000 is budgeted for the following contract services:

- Independent accounting firm for annual audits;
- Outside legal counsel for specialized tax and bond advice;
- Vendor to provide maintenance for the Loans and Grants Tracking System (LGTS); and
- Independent Municipal Advisor

2. Servicing and Program Administration

Servicing existing agreements and fulfilling ongoing program requirements represents a significant workload for the DWSRF staff. There are approximately 211 DWSRF program agreements in repayment. Payments on these agreements are generally collected two times per year, and DFA conducts regular surveillance on many of these recipients. At present, the DWSRF is servicing approximately 125 agreements in disbursement. On average, staff typically process 300 to 400 DWSRF disbursement requests per year. Staff also oversee and perform periodic construction inspections of financed projects to ensure that work is performed consistent with previous approvals, and to ensure that work is being performed in conformance with program requirements, including but not limited to, Davis-Bacon wage rates, American Iron and Steel procurement requirements, Disadvantaged Business Enterprise solicitation rules, and environmental special conditions.

The DWSRF program sold revenue bonds in SFY 2018-19 and may sell additional bonds in the future. The outstanding revenue bonds require separate accounting of payments from pledged obligations, semi-annual bond payments, and specific

¹⁶ These DWSRF staff members are part of the Office of Sustainable Water Solutions within DFA, which includes two supervising engineers, six senior engineers, and 34 technical staff dedicated to addressing both drinking water and wastewater funding and technical assistance needs of small SDACs and small DACs.

monitoring, reporting, and continuing disclosure actions. The DWSRF program prepares annual financial statements that are audited independently. The DWSRF program is subject to yearly review by U.S. EPA and is periodically subject to audit or oversight by other federal or state agencies.

3. Administrative Funding

Administrative funding for the DWSRF program currently comes from the capitalization grants awarded yearly by U.S. EPA via the DWSRF Administration Set-Aside. See Section IV.A. below for budgeted use of the 2021 DWSRF Administration Set-Aside. The DWSRF Administration Set-Aside is limited to the greatest of: \$400,000, one-fifth percent of the current valuation of the fund, or an amount equal to four percent (4.0 %) of all grant awards to the fund for the fiscal year. Since the inception of the DWSRF program, the DWSRF Administration Set-Aside from U.S. EPA capitalization grants has provided a reliable source of funding for the administration of the DWSRF program.

Similarly, Section 116761.70 of the Health and Safety Code allows the State Water Board to apply an annual service charge¹⁷ on a financing agreement. Revenue generated by this service charge is deposited into the DWSRF Administrative Fund and may be used for administration. Under state law, the service charge rate cannot exceed one percent (1.0 %) of the outstanding balance of a financing agreement. Once the service charge is applied to an agreement, the rate remains unchanged for the duration of the agreement.

Since the service charge is a percentage of the outstanding principal on each agreement, it produces a declining amount of revenue each year. Each year, the State Water Board must evaluate the need for the service charge revenue and establish an appropriate rate. The service charge will then be applied to additional agreements to maintain the Administrative Fund revenue consistent with the budget established by the Governor and the Legislature for the DWSRF program.

¹⁷ For federal purposes, the DWSRF Administrative Fund service charge is a fee “other than program income not included as principal in DWSRF financing.” The service charge is collected in lieu of an equal amount of interest that would otherwise be due on the outstanding balance of the financing agreement. The service charge is offset by the reduction in the interest rate so that financing recipients’ payments remain the same whether or not they pay the service charge.

The State Water Board will continue an Administrative Service charge rate of one percent (1.0 %); this shall be the effective rate until the State Water Board establishes a different rate. The State Water Board also anticipates applying this charge to agreements in SFY 2021-22 to eventually provide further administrative funding for the DWSRF program and thereby make DWSRF Set-Aside funds available for other eligible purposes. The Administrative Service charge may also eventually offset declining administration funds from Prop 1 and Prop 68 and the need to continue supporting the administration of projects jointly funded by those propositions and the DWSRF. However, the actual expenditure of funds from the DWSRF Administrative Fund is still dependent upon appropriation from future State budgets.

H. Risks

The following are financial or programmatic risks to the DWSRF Program. DFA management will focus on identifying potential problems and acting early to maintain the integrity and success of the DWSRF Program.

1. Application Demand vs. Resources

Demand for financing exceeds the administrative resources needed to review, approve, and finance all complete applications. Staff resources are the most inflexible aspect of the DWSRF program. Additional staff cannot be quickly added to address high demand because they must be approved through the State's budget process. In addition, hiring may be frozen or work hours reduced due to State budget concerns. DFA will prioritize applications consistent with this IUP and the DWSRF Policy. DFA may also adjust its review procedures and work with U.S. EPA or other agencies to resolve delays, schedule financing with applicants, or seek additional resources. DFA can also work with stakeholders to evaluate changes to the DWSRF Policy or further adjustments to its application and the application review process.

2. Applicants' Schedule Changes or Delays in Executing Agreements

Beneficial and eligible projects may not be financed if the applicants' schedules change or are delayed. To minimize and avoid delays, DWSRF program staff will coordinate regularly with applicants identified in this IUP, and with others that submit applications during the year, to maintain a consistent demand on the program. As project schedules shift, lower priority projects may be funded if they are ready for financing, bearing in mind the PF and GPR requirements established in this IUP. This funding flexibility maximizes the use of the DWSRF and increases the number of projects funded.

Beneficial and eligible projects may not be financed if DFA encounters delays completing its reviews of the applications. To minimize and avoid delays, DWSRF program staff will internally coordinate regularly during the year to expeditiously complete its reviews and maintain consistent progress toward the goal of executing agreements for all projects on the Fundable List by June 30, 2022. As delays are

encountered, other projects on the Fundable List should continue to move forward, bearing in mind the PF and GPR requirements established in this IUP and the amount of leveraging authority approved by the State Water Board. This funding flexibility maximizes the use of the DWSRF and increases the number of projects funded.

After financing is approved, the recipient must start and complete planning or construction promptly. Applicants are required by their financing agreements to report delays to DFA staff so that appropriate action can be taken to address those delays.

3. Cash Balance

The amount of disbursements requested may exceed the DWSRF program's cash balance. DFA staff will maintain accurate account balances and prepare forecasts regularly to identify potential cash shortages in advance. If additional cash is needed, the DWSRF has several options. The DWSRF program has considerable assets it can leverage through revenue bond sales in the municipal bond market or through the Water Infrastructure Finance and Innovation Act (WIFIA) program to obtain additional cash. The State Water Board can prioritize or limit new commitments or potentially negotiate disbursement schedules with applicants. The DWSRF program can also investigate alternative financing (e.g., providing bond insurance) to reduce cash outlays.

Excess cash may accumulate if applications, and the associated disbursements, are too low. Holding excess cash provides no water quality benefit for California and tends to reduce the DWSRF's earnings. DFA will use its marketing, customer assistance, and project development resources to maintain a pipeline of projects ready for financing. It will closely monitor undrawn balances on outstanding financing agreements to ensure that financing recipients request funds expeditiously.

4. Defaults and Late Payments

Pursuant to the DWSRF Policy, DFA will implement prudent lending standards and borrower surveillance practices that safeguard the DWSRF program's equity. The State Water Board also contracts with a professional financial advisor to provide additional financial expertise.

The DWSRF program has many tools to reduce the risk of default, including loan monitoring and surveillance, as well as enforcement remedies. For example, DFA collects and reviews audited financial statements of all borrowers for the first five years of repayment and may request audited financials for some borrowers for longer periods of time. DFA has an agreement with independent accounting firm CliftonLarsonAllen to audit select borrowers identified as having a higher risk of experiencing financial difficulties. These audits can be conducted to evaluate the financial and management capacities of an entity and provide recommended solutions. The State Water Board will also continue to provide SCG DW funds in SFY 2021-22 to reduce debt service and default risk for small SDACs and small

DACs or projects that regionalize water infrastructure. Additional subsidies for small SDACs and small DACs will reduce borrowing costs and the risk of default. Additionally, the State Water Board can offer water-related technical assistance to SDACs and DACs in areas such as evaluating project alternatives, financial management, rate setting, and operation and maintenance.

5. Accountability and Oversight

The DWSRF is capitalized with public funds, and the State Water Board is responsible for using them lawfully and effectively.

The State Water Board regularly reports to U.S. EPA through the National Information Management System (NIMS) and the Project Benefits Reporting (PBR) system on use of the funds. Among other parameters, the reporting systems will evaluate the number of California DWSRF program projects that provide the following public health benefits:

- Achieve compliance with SDWA;
- Maintain compliance with SDWA; and
- Meet future requirements of SDWA.

The State Water Board will enter project benefits information into PBR by the end of the quarter in which a funding agreement is signed and will enter NIMS data by U.S. EPA's annual deadline (generally end of August).

The State Water Board will also use the Federal Funding Accountability and Transparency Act (FFATA) reporting system to report on all DWSRF program equivalency projects (i.e., projects meeting all the federal cross-cutting requirements whose sum is at least equal to or greater than the capitalization grant amount less any non-applicable set-aside funds).

In addition, U.S. EPA reviews the management and performance of the DWSRF annually. The results are summarized in its annual [Program Evaluation Reports](#). The DWSRF Program produces an [annual report and audited financial statements](#).

Additional actions are required of the State Water Board to comply with provisions of the Internal Revenue Code applicable to the DWSRF outstanding bond debt. The DWSRF program's [Post-Issuance Tax Compliance Policy for Tax-Exempt Bond Issues](#) provides further detail about actions required of the program's staff to help ensure that its bonds remain exempt from federal income taxes. Additional reporting is required by the program's Continuing Disclosure Agreement; information on the program's bonds can be found on the [Electronic Municipal Market Access](#) system maintained by the Municipal Securities Rulemaking Board.

DFA staff will continue to oversee projects to ensure that they meet the terms of the financing agreements by conducting periodic site visits during construction or implementation. All projects are subject to a “Final Project Inspection,” and a final summary report is submitted on each project to confirm that it was completed. DFA maintains copies of inspection and final summary reports in the project files.

DRAFT

IV. SET-ASIDE ACTIVITIES

In addition to the project funding discussed in Section III, the SDWA allows each state to set aside up to 31 percent (31%) of its federal capitalization grant to support various DWSRF and DDW program activities, including (1) the administration of the DWSRF, (2) SWS technical assistance, (3) PWS supervision by DDW and (4) other technical assistance to PWSs in support of technical, managerial, and financial capacity development. The Set-Asides are especially beneficial to SWSs serving SDACs and DACs. The Office of Sustainable Water Solutions in DFA uses the technical assistance, in conjunction with subsidized project financing from the DWSRF and state sources, to help SWSs achieve compliance with safe drinking water standards, establish and maintain TMF compliance, and foster consolidation.

For SFY 2021-22, the State Water Board will set-aside 26 percent (26%) of the 2021 Capitalization Grant for set-aside activities as further described below. The State Water Board will submit detailed work plans to U.S. EPA for approval in accordance with federal requirements; the Deputy Director of DFA may adjust the 2021 Capitalization Grant budget between these activities for good cause. DFA will report on the progress of set-aside activities to U.S. EPA in its DWSRF Annual Report. The State Water Board is also committed to maintaining a set-aside spending rate in accordance with U.S. EPA Memorandum from Peter Grevatt, Director, Office of Ground Water and Drinking Water, dated April 14, 2014, [Drinking Water State Revolving Fund \(DWSRF\) Unliquidated Obligations \(ULO\) Reduction Strategy](#).

A. Administration Set-Aside

The DWSRF Administration Set-Aside will fund administration of the DWSRF program in SFY 2021-22. This will include the review and processing of drinking water funding applications, project management and general oversight of DWSRF construction and planning projects. The DWSRF Administration Set-Aside will also cover the costs for accounting, legal, budgetary, and general management and oversight of the DWSRF, and may be used for the contracts listed below. The DWSRF Administrative Set-Aside Work Plan for SFY 2021-22 will contain detailed information about the specific tasks and full-time equivalent personnel that will be supported in DFA by the DWSRF Administration Set-Aside.

Max Allowed:	4%	
Budgeted from FFY 2021 Grant:	4%	\$3,880,000 (estimate)

Contracts:	DWSRF Annual Audit of Financial Statements including Single Audit		\$150,000 (estimate)
	U.S. EPA/Northbridge Environmental Management Consultants Maintenance Contract for the State Water Board's Loans and Grants Tracking System (LGTS)		\$250,000 (estimate)

B. Small Water System Technical Assistance Set-Aside

The SWSTA Set-Aside will fund DFA technical assistance to small PWSs serving less than 10,000 people, particularly those systems with fewer than 200 service connections. SWSTA will help SWS applicants establish eligibility for DWSRF or complementary funding and provide other technical assistance necessary for project development. The SWSTA Set-Aside may also fund technical assistance contracts to SWSs in support of project environmental documentation. The DWSRF Small Water Systems Technical Assistance Work Plan for SFY 2021-2022 will contain detailed information about the specific tasks and full-time equivalent personnel that will be supported in DFA by the DWSRF SWSTA Set-Aside.

Max Allowed:	2%	
Budgeted from FFY 2021 Grant:	2%	\$1,940,000 (estimate)

C. State Program Management Set-Aside

The State Program Management Set-Aside will be used to partially fund DDW's administration of the State Water Board's PWSS program. The set-aside will supplement the annual PWSS grant from U.S. EPA and the charges paid by California's regulated PWSs. The Set-Aside will provide funds for DDW's permitting, inspection, compliance, and monitoring activities in accordance with the SDWA and delegated PWSS responsibilities by U.S. EPA. The DWSRF State Program Management Set-Aside Work Plan for SFY 2021-22 will contain detailed information about the specific tasks and full-time equivalent personnel that will be supported in DDW by the DWSRF State Program Management Set-Aside.

Max Allowed:	10%	
Budgeted from FFY 2021	10%	\$9,700,000 (estimate)

D. Local Assistance Set-Aside

The Local Assistance Set-Aside will be used in SFY 2021-22 to fund personnel costs of the Office of Sustainable Water Systems within DFA and DDW. These staff costs are associated with State Water Board's implementation of its Capacity Development

Strategy and providing direct technical assistance to PWSs in support of this strategy. Historically, the State Water Board has used the Local Assistance Set-Asides to provide third-party technical assistance to small SDACs and DACs to support technical, managerial, and financial (TMF) capacity development. Beginning in SFY 2021-22, the State Water Board intends to utilize the new Safe and Affordable Drinking Water (SADW) Fund to provide third-party technical assistance to help SDACs and DACs achieve compliance with the State Water Board's Capacity Development Strategy.

Max Allowed:	10%	
Budgeted from FFY 2021	10%	\$9,700,000 (estimate)

V. FINANCING AND PROGRAMMATIC REQUIREMENTS

A. Technical, Managerial and Financial (TMF) Capacity

A PWS generally must demonstrate TMF capacity to be eligible for construction funding, regardless of the amount or type of funding provided, and to receive a permit to operate a drinking water facility from DDW. The State Water Board conducts TMF capacity assessments of all drinking water construction applicants to ensure sustainability, resilience, and responsible use of public funds. Where a state agency applicant acts on behalf of a disadvantaged community in applying for state grant funding, the State Water Board will analyze the TMF capacity of the appropriate PWS.

For Project Categories A-C and consolidations, construction funding may be provided even if a system does not have adequate TMF capacity, subject to funding requirements. In these cases, a TMF capacity evaluation and implementation of an improvement plan will be required as a condition for funding. For Project Categories D-F, construction funding will not be provided if a system does not have adequate TMF capacity.

1. Technical Capacity

To demonstrate technical capacity, PWSs must show that their systems' drinking water sources are adequate; that the treatment, distribution, and storage infrastructure are adequate; and that system personnel have the technical knowledge to properly and efficiently operate and maintain the system. As part of reviewing a funding application, the State Water Board staff will review the engineering reports, plans and specifications, and the PWS's records to verify that the system is being properly operated and maintained.

2. Managerial Capacity

To demonstrate managerial capacity, the PWS must have personnel with expertise to manage the operation of the entire water system. The State Water Board staff will review the PWS's managerial capacity to assure that management is (1) involved in the day-to-day supervision of the water system, (2) compliant with all required regulations, (3) available to respond to emergencies, and (4) capable of identifying and addressing all necessary capital improvements and assuring financial viability. The State Water Board staff will also review records to ensure that the PWS is staffed with a qualified water operator in accordance with the State's Operator Certification Program.

3. Financial Capacity

A PWS generally must demonstrate it has the financial capacity to own and operate its water system, including the proposed construction project, as a condition for the award of construction financing. The PWS must show that the system has sufficient revenues to cover necessary operation and maintenance costs and demonstrate credit worthiness with adequate fiscal controls. The PWS must also demonstrate

financial planning for future capital improvements, including providing any water rate studies to demonstrate overall financial capacity. The State Water Board staff will review the PWS's project budget, audited annual financial reports, and other financial information to determine whether the PWS has adequate financial capacity to operate and maintain its system, including the proposed infrastructure project.

A PWS is generally not required to demonstrate financial capacity to operate and maintain its system, or a proposed construction project, to receive planning funding, or if it will be consolidated into another PWS. Planning funding may be provided to a PWS to assist it with establishing its financial capacity to operate and maintain its system, and undertake a construction project, in preparation for an eventual construction funding agreement. Examples of tasks financed with planning funds may include, but are not limited to, water rate studies, budget development, Prop 218 technical assistance, and capital improvement planning.

B. Cap Grant Payments and draws

1. Federal DWSRF Capitalization Payments

Based upon the State Water Board's cash flow for SFY 2021-22, the State Water Board has requested the following federal payment schedule from U.S. EPA for the 2021 Capitalization Grant, as detailed in Table 6.

Table 6: 2021 Capitalization Grant Payment Schedule

FFY	Payment Date	Percentage of Cap Grant	Estimated Amount	Description	Site Code*
2021	Award Date	4%	\$3,880,000	DWSRF Administration Set-Aside	DD
2021	Award Date	2%	\$1,940,000	SWS Technical Assistance Set-Aside	DE
2020	Award Date	10%	\$9,700,000	State Program Management Set-Aside	DF
2021	Award Date	10%	\$9,700,000	Local Assistance & Other Programs Set-Aside	DG
2021	Award Date	74%	\$71,780,000	Loan Fund	DA

*Site Codes reference the federal accounts in which the various loan and set-aside funds of a capitalization grant are deposited and made available for liquidation by the State Water Board.

2. DWSRF Federal Draw Schedule and Estimated DWSRF Project Disbursements

Appendix G represents the State Water Board's anticipated federal draw schedule for SFY 2021-22 as well as the anticipated liquidation of the 2021 Capitalization Grant in SFY 2021-22. The federal draw schedule assumes U.S. EPA's "first-in-first-out" policy for liquidating DWSRF capitalization grants. Therefore, the draw schedule

includes the anticipated liquidation of the balances of the 2018, 2019 and 2020 DWSRF capitalization grants.

Current cash flow projections suggest that the 2021 DWSRF Capitalization Grant may not be liquidated until late calendar year 2023, due to the expenditure rate of the set-asides. The State Water Board will also disburse the 2021 State Match in accordance with procedures detailed in Section V.C of this IUP.

C. 2021 State Match Source and Proportionality Draw

The State Water Board must provide one dollar of match for each five dollars received through U.S. EPA capitalization grants. California's DWSRF has been capitalized with a variety of state match sources including general fund appropriations, general obligation bonds not repaid by the DWSRF, short-term financings with the California Economic and Infrastructure Bank, and local match funds.

The State Water Board has allocated a portion of the Prop 1 Drinking Water funds for use as state match. Both DWSRF repayable and PF funds may be counted as match consistent with federal DWSRF rules so long as such financing is funded with associated Prop 1 Drinking Water funds through the DWSRF. The balance of Prop 1 Drinking Water funds may be awarded as repayable financing, grants, technical assistance, and Drinking Water Capital Reserve funds.

The 2021 State Match will be provided through an existing \$241.8 million state budget appropriation from Prop 1. A portion of the \$241.8 million Prop 1 appropriation will be allocated as 2021 State Match for repayable financing or PF to eligible drinking water projects under the DWSRF and Prop 1. As of June 30, 2021, an estimated \$102.3 million of Prop 1 drinking water funds will have been allocated and encumbered as state match for repayable financing and grant/PF funding to drinking water projects eligible under both the DWSRF and Prop 1, as set forth in this IUP. When considering the estimated \$20.3 million in Prop 1 state match for the 2021 Capitalization Grant and the additional ASADRA funding, Prop 1 will have also provided an additional \$3.9 million in over-match for future capitalization grants. Table 7 below documents the state match provided from the SFY 2014-15 and SFY 2015-16 Prop 1 drinking water appropriations.

Table 7: SFY 2014-15 and SFY 2015-16 Prop 1 \$241.8 million Prop 1 Local Assistance Appropriation Allocation for DWSRF State Match

California Prop 1 Drinking Water Appropriation	Prop 1 Drinking Water Appropriation Allocation for DWSRF State Match
2014	\$32,659,747
2015	\$69,606,190
Total	\$102,265,937

Based on a projected 2021 Capitalization Grant of \$97 million, the 2021 set-aside amount of \$25.2 million and the 2021 state match of \$19.4 million, the disbursement proportionality for the 2021 Capitalization Grant is 78.72% / 21.28% (Federal/State). However, the State Water Board will have disbursed the entire state match for the 2021 Capitalization Grant prior to drawing funds from the grant. Therefore, the draw ratio of federal capitalization funds for the 2021 capitalization grant will be 100%.

D. Application of Federal Cross-Cutters

Construction projects partially or fully funded by the DWSRF program must generally comply with federal laws¹⁸ commonly known as “cross-cutters.”¹⁹ The State Water Board will ensure that DWSRF financing recipients comply with applicable federal laws through a variety of program procedures. The DWSRF financing agreements will generally include a list of applicable federal statutes and requirements taken from the most recent capitalization grant. Described below are those federal cross-cutters that often require greater efforts of compliance by DWSRF/ SCG DW funding recipients.

All projects and set-aside activities will be performed in accordance with the Civil Rights Act of 1964, section 504 of the Rehabilitation Act of 1973, and the Age Discrimination Act of 1975. All other cross-cutters applicable to the set-aside activities will be adhered to.

1. Environmental Cross-Cutters

Under the DWSRF Operating Agreement, all projects must undergo an environmental review process prior to funding. The State Water Board will use its U.S. EPA-approved State Environmental Review Process (SERP) to review project applications submitted for funding during SFY 2021-22.

The SERP sets forth a process including compliance with federal environmental cross-cutters and SRF requirements, in addition to the requirements of the California Environmental Quality Act. State Water Board staff will consult with the appropriate federal agencies on projects as required by the SERP.

All applicants must provide a completed Environmental Package as part of their DWSRF Construction Applications. State Water Board staff will conduct an initial review to verify a complete package has been received and identify any missing information. Once all required environmental documents have been received, State Water Board staff will conduct a thorough review of all items to determine whether 1) sufficient information has been provided to enable the State Water Board to make

¹⁸ See also Appendix O of the DWSRF Policy.

¹⁹ Projects that are receiving non-federally sourced funding only may be exempted by the Deputy Director from having to comply with certain federal cross-cutting requirements. This does not include Projects receiving funds serving as state match for federal capitalization grants, which cannot be exempted from having to comply with applicable federal cross-cutting requirements.

environmental determinations, 2) consultation(s) are required with relevant state and federal agencies, and/or 3) if any additional information is needed.

Non-equivalency Environmental Review

The State Water Board must apply the additional federal environmental cross-cutters to equivalency projects (i.e., projects identified as having a cumulative amount equal to the amount of the federal DWSRF capitalization grant and designated as “equivalency projects” for compliance purposes, minus certain set-aside activities). In March 2020, DFA temporarily exempted small DAC and small SDAC projects designated as non-equivalency from federal cross-cutters, and instead applied CEQA-only environmental review to those projects. On September 30, 2020, DFA extended CEQA-only environmental review to include planning projects; expanded small DAC and SDAC construction projects; certain non-transient non-community water system projects serving small DACs/SDACs; small non-DAC construction projects in Categories A through C; and ASADRA projects. The 2021-22 IUP adopts this procedure. For consistency with construction grant/PF eligibility as outlined in Appendix E, DFA is also exempting medium DAC construction projects in Categories A through C and consolidation, and small non-DAC consolidation projects. These categories of projects, set forth in Appendix F, will be designated as non-equivalency projects that will undergo a CEQA-only review, unless the Deputy Director determines that additional projects are required to satisfy the equivalency requirement. Other projects funded only by state funds may be subject to CEQA-only environmental review at the discretion of the Deputy Director.

DFA staff will continue applying federal environmental cross-cutter review requirements to equivalency projects reportable to the U.S. EPA. DFA treats all applications not identified as a non-equivalency project, as an equivalency project. There are currently 24 complete DWSRF applications requesting \$1.3 billion in funding. DFA staff have historically selected projects for equivalency as funding agreements are executed. Based on the current list of potential equivalency projects on the fundable list, DFA staff expect to fulfill all equivalency requirements without the non-equivalency projects for SFY 2021/22.

2. Davis-Bacon

Federal [Davis-Bacon Act](#) rules apply to the construction activities carried out in whole or in part with assistance made available by the DWSRF. The State Water Board, therefore, will continue to require that DWSRF recipients comply with Davis-Bacon rules. Recipients of DWSRF financing must also agree to provide information necessary to show compliance with Davis-Bacon requirements as a condition of DWSRF funding.

3. Generally Accepted Accounting Principles (GAAP)

Federal rules require that recipients of DWSRF financing maintain project accounts in accordance with generally accepted government accounting standards, including standards relating to the reporting of infrastructure assets. Recipients must agree to comply with GAAP. For governmental entities, the Government Accounting

Standards Board establishes these standards. The State Water Board, therefore, will require as a condition of financing that governmental applicants maintain project accounts in accordance with generally accepted government accounting standards.

4. American Iron and Steel (AIS)

Federal rules require DWSRF recipients, absent an exclusion or waiver, to use iron and steel products that are produced in the United States for treatment works projects.

U.S. EPA implementation of these provisions is described on its [State Revolving Fund American Iron and Steel \(AIS\) Requirement](#) website.

5. Disadvantaged Business Enterprise

DWSRF funding recipients will generally be required to seek and encourage the “fair share” employment of businesses categorized as [Disadvantaged Business Enterprises \(DBE\)](#) for the DWSRF funded project. This requirement will apply to all sub-agreements of the DWSRF funded project for equipment, supplies, construction, and services. Additional reporting to the State Water Board on the outcomes of DBE activities will also generally be required of DWSRF funding recipients. However, recipients with planning projects funded by the DWSRF will not be required to comply with federal DBE requirements.

6. Single Audit Act

Federal rules require DWSRF recipients to comply with applicable provisions of the federal Single Audit Act of 1984, OMB Circular No. A-133 and 2 CFR Part 200, subpart F, and updates or revisions, thereto. The State Water Board will include applicable Single Audit Act provisions in all DWSRF funding agreements and require Single Audit Act reporting by recipients if they receive more than \$750,000 in combined federal funds for a given fiscal year.

E. Capitalization Grant Conditions and Other Federal Requirements

The State Water Board will comply with all conditions included in the 2021 Capitalization Grant agreement and will require that DWSRF financing recipients also comply with applicable federal pass-through requirements. Provisions specific to the FFY 2021 appropriation will take effect only if the State Water Board receives the FFY 2021 Capitalization Grant and will apply only as directed by Congress or U.S. EPA. The State Water Board will require that recipients of DWSRF financing must agree to provide information necessary to show compliance with all applicable federal requirements.

F. Other State and State Water Board Requirements

Other State laws not specific to the DWSRF/SCG DW may also apply to projects²⁰ funded in SFY 2021-22. These may include but are not limited to laws affecting urban water suppliers, charter cities, agricultural water users, projects located in the Delta and debt reporting.

Commencing with construction of a project and continuing throughout the reasonably expected useful life of the project, recipients must implement water conservation practices consistent with compliance obligations under governing statutes, regulations, and Executive Orders. More information about water conservation can be found at the State Water Board's website at

https://www.waterboards.ca.gov/water_issues/programs/conservation_portal/california_statutes.html.

To be eligible for DWSRF and SCG DW funding, a project proposed by a PWS owned by a private entity, including utilities regulated by the Public Utilities Commission, shall have a clear and definite public purpose and shall solely benefit the customers of the PWSs.

The costs of purchasing water systems may be eligible under the DWSRF/SCG DW, including associated water rights. However, acquisition of real property, right-of-way, and easements are eligible only if integral to the project. The eligible cost is limited to the fair market value as determined by a California licensed appraiser. DFA will determine real property eligibility.

As a condition of eligibility for planning funding, DWSRF/SCG DW applicants shall submit evidence to DFA of a contract for professional engineering services between the funding recipient and its engineering consultant(s) unless waived for good cause as determined by the Deputy Director of DFA. This agreement shall include the scope of work, cost, and deliverable due dates. DFA will review the budget and identify costs that are ineligible or raise questions related to waste, fraud, or abuse. DFA will also review the professional services agreement(s) for compliance with applicable DWSRF federal and state requirements.

DFA will continue to evaluate all planning/design expenditures and deliverables of funding recipients to ensure the most cost-effective project is developed and to protect against potential waste, fraud or abuse of DWSRF/SCG DW funds. Suspected cases of waste, fraud or abuse of DWSRF/SCG DW funds may be forwarded to the U.S. EPA Office of Inspector General, the California Department of Finance, the State Water Board's Office of Enforcement, and/or the California Bureau of State Audits for further audit and investigation.

DWSRF/SCG DW construction funding recipients will be required to submit construction contracts to DFA for review of their compliance with applicable state and federal funding requirements. DFA will incorporate the approved construction budget into the funding agreement.

²⁰ See also Appendix O of the [DWSRF Policy](#).

Although the DWSRF Policy authorizes reimbursement of eligible construction costs for projects on the Fundable List going back to the notice to proceed date for the project, applicants should note that **CONSTRUCTION COSTS INCURRED BEFORE EXECUTION OF A FINANCIAL ASSISTANCE AGREEMENT ARE AT THE APPLICANT'S RISK**. Various factors may restrict reimbursement of costs incurred prior to execution of a funding agreement, including, but not limited to failure of the applicant to adopt a satisfactory reimbursement resolution, appropriations limits of funding sources, and other factors. **Further, starting construction before the State Water Board has completed its environmental review may render the project ineligible for funding**. Additionally, changes to laws or requirements that occur prior to execution of a financial assistance agreement may affect some or all funding eligibility.

G. Other Assurances and Certifications

1. The State has the authority to establish a fund and to operate the DWSRF program in accordance with the SDWA

In California, the responsibility for regulating PWSs and overseeing the safety of drinking water has been assigned to the State Water Board. U.S. EPA recognized California's primacy status beginning in 1978, and has acknowledged the State Water Board's primacy authority, effective July 1, 2014.

2. The State will comply with state statutes and the DWSRF Policy handbook

State statutes governing California's DWSRF program are set forth in California's Health & Safety Code, Division 104, Part 12, Chapter 4.5, commencing with section 116760. The state statutes and DWSRF Policy conform to federal requirements. California will implement its DWSRF program in compliance with all applicable state and federal laws, regulations, and guidelines.

3. The State will deposit all capitalization grant funds in the DWSRF or Set-Aside Accounts

The State Water Board will maintain identifiable and separate accounts for all portions of the capitalization grant to be used. The capitalization grant will be deposited into either the DWSRF or the set-aside accounts.

4. The State will deposit revenues generated from the DWSRF Administration Charge and the DWSCEG Charge into their respective funds

In accordance with Health and Safety Code § 116761.70, the State Water Board will deposit revenues generated from the DWSRF Administration Charge into the Safe Drinking Water State Revolving Fund Administration Fund. The State Water Board will also deposit revenues generated from the DWSCEG Charge into Safe Drinking Water Small Community Emergency Grant Fund, in accordance with Health and Safety Code § 116760.46.

5. The State will deposit net bond proceeds, interest earnings, and repayments into the DWSRF

All interest, earnings, principal repayments, and other proceeds will be deposited into the DWSRF.

6. The State will adopt policies and procedures to ensure that borrowers have a dedicated source of revenue for repayments (or in the case of a privately-owned system, demonstrated that there is adequate security)

The State Water Board has developed policies and procedures for ensuring that borrowers have a dedicated source of repayment and that privately owned systems have adequate security. These policies and procedures are contained in the State Water Board's DWSRF Policy.

7. The State will commit and expend funds as efficiently as possible, and in an expeditious and timely manner

The IUP explains how the State Water Board will use DWSRF funds. The State Water Board will commit and expend both 2021 Capitalization Grant and associated state match funds as efficiently as possible, and in an expeditious and timely manner. The State Water Board will enter into binding commitments with recipients equal to the total amount of each 2021 Capitalization Grant payment and proportional 2021 State Match within one year of each 2021 Capitalization Grant payment. Additionally, the State Water Board will use cash-flow modeling to over-commit cash and undrawn federal funds to continually and timely disburse 100 percent (100%) of those funds.

8. DWSRF funds will be used in accordance with this SFY 2021-22 IUP

The State Water Board will use DWSRF funds in SFY 2021-22 in accordance with this IUP.

9. The State will provide the U.S. EPA with an Annual Report on the performance of the DWSRF

The State Water Board will publish a SFY 2021-22 DWSRF Annual Report on the uses of the DWSRF funds during SFY 2021-22 and provide a final draft of the SFY 2021-22 DWSRF Annual Report to U.S. EPA Region 9. The report will document the projects funded through the DWSRF; financial and programmatic outcomes of the DWSRF; and summarize the accomplishments of the DWSRF program as it relates to the long-term and short-term goals contained within this IUP and the tasks included in the associated DWSRF work plans.

H. Cross-Collateralization

The State Water Board will implement cross-collateralization between the DWSRF and the CWSRF loan programs as necessary to support the goals and objectives of the State Water Board as documented in the [Operating Agreement for Implementing and Managing the Drinking Water State Revolving Fund Program between the State of California and the United States Environmental Protection Agency Region IX](#), as amended March 2020.

VI. OUTCOMES, GOALS, ACTIVITIES, AND MEASURES

The following are the short-term and long-term goals of the State Water Board for its administration of the DWSRF. These goals will help the State Water Board maximize and prioritize its staff and funding resources.

A. Prioritizing DWSRF Funds for Public Health Benefits

Long-Term Goals

1. **Address Significant Risks to Public Health:** DFA will coordinate with DDW to ensure that DWSRF and all available drinking water funding is targeted to address the most significant public health and compliance issues.
2. **Promote SDWA Compliance:** DFA will continue to provide and prioritize subsidized financing for planning and construction that addresses SDWA compliance. DFA will also coordinate with DDW on the use of set-asides to promote the development of TMF capacity for all PWSs (especially small CWSs) to achieve or maintain compliance with State drinking water standards and federal SDWA requirements.
3. **Improve Affordability and Sustainability:** DFA will continue to strategically use the DWSRF additional subsidy, set-aside funds and all available Drinking Water funds to achieve affordable compliance, especially for small severely disadvantaged and small disadvantaged communities. Also, DFA will continue to use DWSRF funds to maximize opportunities for consolidation, in coordination with DDW, to increase economies of scale to improve project affordability and PWS sustainability.

Short-Term Goals

1. Identify public health issues and evaluate solutions for SWSs, including technical assistance and consolidation where feasible.
2. Reduce instances of noncompliance with drinking water standards by providing technical and consolidation assistance to SWSs with significant SDWA violations, including those PWSs that are violating the arsenic maximum contaminant level (MCL).

B. Managing the DWSRF Responsibly to Ensure Its Perpetuity

Long-Term Goals

1. **Use revenue and capital effectively:** Maximize the funding capacity of the DWSRF while minimizing long-term costs to the DWSRF to maximize safe drinking water results. In accordance with the CWSRF/DWSRF *Debt Management Policy*, the State Water Board may also consider leveraging the DWSRF for greater funding capacity. However, additional debt should be balanced against the long-term financial health of the program and the federal requirement to maintain the DWSRF in perpetuity.

2. **Maintain financial integrity:** Financial integrity is a core value of the DWSRF program. Effective internal controls ensure that the program's finances are dependable and trustworthy. Prudent lending practices and reasonable interest rates ensure the stability and continued growth of the DWSRF program.
3. **Provide good customer service with a special emphasis on assisting DACs.** Ensure that the application forms and review procedures are clear, flexible, up-to-date, and efficient. Ensure staff is well trained and ready to help applicants resolve technical, legal, environmental, and financial issues needed to receive financing. Effectively communicate the status of funding applications as well as the general availability of DWSRF funding through a variety of channels.

Short-Term Goals

1. Continue marketing and outreach efforts to PWSs, including application status reports, Spanish translation services, newsletters, and social media to advertise the availability of technical assistance to assist small, and disadvantaged communities as well as large PWSs.
2. Continue regular staff level finance/audit coordination meetings to ensure the immediate and long-term health of the DWSRF.
 - a. Review cash flow forecasts of existing and potential commitments to assess the State Water Board's ability to meet its DWSRF commitments and to evaluate the need for leveraging or actions to regulate cash flows.
 - b. Compare actual performance with targeted performance measures.
 - c. Verify compliance with post-issuance tax compliance and continuing disclosure requirements associated outstanding DWSRF bonds.
 - d. Review audit issues, program control issues, and prepare for any anticipated audits.
3. Continue to maximize all available DWSRF state match sources for future capitalization grants, including DWSRF Local Match financing options.
4. Coordinate with Environmental Finance Center and stakeholders on completing a program management review of the CWSRF and DWSRF Programs to identify potential efficiencies, improvements, or enhancements that would facilitate review processing, and execution of loan agreements and disbursements. (Fall 2021).

C. Ensuring Timely and Expeditious Use of DWSRF Funds

Long-Term Goals

1. **Ensure the timely commitment and disbursement of DWSRF funds:** Prioritize staff and financial resources to the maximum extent possible to ensure that the State Water Board can timely disburse DWSRF funds on existing obligations before considering new obligations.

2. **Maximize cash flow and the disbursement of funds:** Engage in the over-commitment of DWSRF funds based upon cash-flow modeling of projected disbursements relative to anticipated receipt of repayments and other funding sources, including leveraged funds.

Short-Term Goals

1. Apply for and accept the anticipated 2021 Capitalization Grant from U.S. EPA. Upon award, commit funds from the 2021 Capitalization Grant, including the associated state match, by June 30, 2021, so that the federal funds can be utilized in an efficient and timely manner in accordance with 40 Code of Federal Regulations (CFR) §35.3550(c). The anticipated allotment amount of the 2021 Capitalization Grant provided to the State Water Board from U.S. EPA dated March 1, 2021 is \$97,047,000. To maximize available federal funding, the State Water Board will be applying for \$150 million for the 2021 Capitalization Grant but will assume an estimate of \$97 million for the 2021 Capitalization Grant for all other financial forecasts in this IUP (June 30, 2021).
2. Continue to liquidate DWSRF capitalization grants within two to three years of their award by prioritizing disbursements for federal funds to the maximum extent possible.
3. Review cash flow forecasts of existing and potential commitments to assess the State Water Board's ability to satisfy its obligations timely and to also evaluate the need for leveraging or other actions to regulate cash outflows.

D. DWSRF Performance Metrics

The following constitute performance metrics and targets for DFA to enable the timely and efficient processing of applications and disbursements:

1. One-hundred percent (100%) of complete disbursement requests should be fulfilled in 45 days or less.²¹
2. DWSRF Fund utilization rate > 105 percent (105%) of available funds.

The [SAFER Policy](#) establishes additional metrics that DFA will be tracking and for which goals will be set (see Section XI.I of the SAFER Policy). The [SAFER Fund Expenditure Plan](#) will identify the specific numeric goals and include a summary of progress made. These performance metrics will be used across programs.

E. Response to Climate Change

DFA will support and provide technical assistance where appropriate water systems' efforts to prepare for and mitigate the impacts of climate change including preparing and

²¹ Disbursement fulfillment time is the time from receipt of a complete disbursement request to warrant date.

implementing climate adaptation plans, implementing drought resiliency and preparedness efforts, improving public health outcomes and providing access to safe and affordable drinking water, and efficiently and sustainably managing their drinking water systems and resources.

DFA will ensure that applications and environmental reviews for potential projects evaluate the impacts related to climate change and account for potential mitigation measures, including potential effects of climate change on the viability of funded projects and will work with applicants to ensure that mitigation and adaptation measures are implemented as fully as practicable.

DRAFT

VII. SCHEDULE

The estimated schedule for public comment and State Water Board adoption of the SFY 2021-22 DWSRF IUP, and the application, award, and acceptance of the 2021 DWSRF Capitalization Grant is as follows:

Draft IUP with Revised Supplemental IUP posted for public comment	April 29, 2021
Informational Workshop/Webinar #1	April 29, 2021
Informational Workshop/Webinar #2	May 14, 2021
Deadline for Public Comments on Draft IUPs	June 1, 2021
Submit FFY 2021 Capitalization Grant application to U.S. EPA	June 1, 2021
State Water Board considers IUP with Revised Supplemental IUP at regularly scheduled meeting	June 15, 2021
Receive FFY 2021 Capitalization Grant agreement from U.S. EPA	September 2021

VIII. ACRONYMS

AIS	American Iron and Steel
ARRA	American Recovery and Reinvestment Act of 2009
CWS	Community Water System
DAC	Disadvantaged Community
DBE	Disadvantaged Business Enterprise
DDW	Division of Drinking Water
DFA	Division of Financial Assistance
DWSRF	Drinking Water State Revolving Fund
ESCWS	Expanded Small Community Water System
FFATA	Federal Funding Accountability and Transparency Act
FFY	Federal Fiscal Year
GPR	Green Project Reserve
GWUDI	Groundwater Under the Direct Influence
IUP	Intended Use Plan
LPA	Local Primacy Agency
MCL	Maximum Contaminant Level
MHI	Median Household Income
NIMS	National Information Management System
NTNC	Non-Transient Non-Community Water System
PBR	Project Benefits and Reporting
PWS	Public Water System
PWSS	Public Water System Supervision
SCG DW	Small Community Grant Drinking Water
SCWS	Small Community Water System
SDAC	Severely Disadvantaged Community
SDWA	Safe Drinking Water Act
DWSCEG	Drinking Water Small Community Emergency Grant
SFY	State Fiscal Year
SWIFIA	State infrastructure financing authority Water Infrastructure Financing and Innovation Act
SWS	Small Water System
SWSTA	Small Water Systems Technical Assistance
TMF	Technical, Managerial and Financial
ULO	Unliquidated Obligation
U.S. EPA	United States Environmental Protection Agency

IX. APPENDICES

APPENDIX A: SFY 2021-2022 DWSRF Fundable List

Sort Order: Applicant, Project Number

Project Number	District Number	Project Type	Applicant	Project Title / Description	Priority Class	Population	Service Connections	Water System Size	Estimated Project Costs	Estimated PF/Grant Amount	Estimated DWSRF Loan
0110001-001C	04	Construction	Alameda County Water District	Advanced Metering Infrastructure Phase-3 Project	F	324,796	79,362	LWS	\$ 36,375,767	\$ -	\$ 19,500,000

Total Fundable List									Projects = 35	\$ 1,719,685,542	\$ 33,750,000	\$ 1,560,084,883

Notes:

1. Small DAC/SDAC, expanded small DAC/SDAC, and Category A-C projects are considered automatically on the Fundable List provided they submit a complete application and meet all eligibility requirements. These projects are included on the Comprehensive List.
2. Project numbers and project names are for administrative purposes only. DFA may assign or reassign project numbers and names as necessary to administer projects.
3. SWS = Small Water System; LWS = Large Water System.
4. Casitas Municipal Water District and Montecito Water District have requested Principal Forgiveness from ASADRA funds. Stanislaus Regional Water Authority was identified to receive Prop 68 grant.

APPENDIX B: SFY 2021-22 DWSRF Comprehensive List

Sort Order: Consolidation Project, Applicant, Project Number

Notes:

1. Small DAC/SDAC, expanded small DAC/SDAC, and Category A-C projects are considered automatically on the Fundable List provided they submit a complete application and meet all eligibility requirements.
2. Project numbers and project names are for administrative purposes only. DFA may assign or reassign project numbers and names as necessary to administer projects.

APPENDIX C: SFY 2021-22 DWSRF IUP Fiscal Impact Summary²²

	Projected SFY 2020-21	Projected SFY 2021-22	Projected SFY 2022- 23	Projected SFY 2023-24	Projected SFY 2024-25
Beginning Balance (Cash + Undrawn Federal Capitalization Grants)	\$251,664,871	\$165,567,980	\$31,165,373	\$137,191,590	\$300,425,305
Estimated Principal Payments + Interest Earnings	\$144,937,973	\$108,864,226	\$114,526,521	\$114,318,336	\$113,016,357
Estimated SMIF ²³ Interest Earnings	\$500,000	\$500,000	\$500,000	\$500,000	\$500,000
Estimated Federal Capitalization Grants Received ²⁴ (Loan Fund)	\$71,879,160	\$62,900,000	\$62,900,000	\$62,900,000	\$62,900,000
DWSRF Revenue Bond Debt Service	(\$9,290,450)	(\$9,320,000)	(\$9,376,750)	(\$9,435,500)	(\$9,100,375)
Estimated Disbursements ²⁵	(\$294,123,575)	(\$297,346,833)	(\$62,523,554)	(\$5,049,121)	\$0
Estimated Year-End Balances ²⁶	\$165,567,980	\$31,165,373	\$137,191,590	\$300,425,305	\$467,741,287

	SFY 2020-21	SFY 2021-22	SFY 2022-23	SFY 2032-24	SFY 2024-25
Estimated Yearly Cash Flows ²⁷	(\$86,096,891)	(\$134,402,606)	\$106,026,217	\$163,233,715	\$167,315,982

²² Forecast as of April 2021.

²³ SMIF means Surplus Money Investment Fund.

²⁴ These numbers include a final amount for the FFY 2020 grant that the State Water Board received on September 10, 2020. The amounts for all grants after FFY 2020 are estimated. The forecasted capitalization grants are listed in the aggregate amounts. Principal forgiveness, if available, is included in the aggregate grant amount in the forecast.

²⁵ Estimated disbursements are a forecast of the cash disbursements for projects with executed financing agreements.

²⁶ Estimated Year End Balances represent a running total based on the previous year's ending balance.

²⁷ Estimated Yearly Cash Flows represent the projected difference between revenues and capitalization grants (inflows) and disbursements and expenses (outflows) for each year, and do not include the previous year's ending balance. Positive numbers indicate that inflows are projected to be greater than outflows for that year. Negative numbers indicate that outflows are projected to be greater than inflows for that year.

APPENDIX D: Planning Project Grant and PF for an Eligible PWS

Affordability Criteria		Grant Amount	
Size	Community MHI ²⁸	Percent of Total Project Cost	Maximum Grant/PF Per Project ²⁹
<3,300 connections or <10,000 persons	<80% of Statewide MHI	Up to 100%	N/A
To the extent consistent with state law, this grant/PF may be awarded to the extent that DFA reasonably believes that there may be subsequent construction financing resulting from this planning/design that will be considered for repayable financing per the affordability criteria included in this IUP or subsequent IUPs. DFA may deny SCG DW grant funding if the planning project has already been funded in part by other drinking water funding sources, including DWSRF and/or SCG DW funding.			

²⁸ The Deputy Director of DFA may approve planning grants/PF for small, non-DAC Category A-C and/or consolidation projects for good cause to the extent authorized under state law.

²⁹ The maximum grant/PF for a community is based on all funding the community receives in a five-year period. This includes planning, TA, and construction funding for all DWSRF projects for the community. Funds disbursed to the community under planning will be subtracted from the maximum eligible construction grant.

APPENDIX E: Construction Project Grant and PF Limitations for an Eligible PWS

Maximum PF, Grant or Combination Thereof Per Construction Project			
Type of Community ³⁰	Residential Water Rates as a Percentage of MHI ³¹	Percentage of Total Eligible Project Cost ³²	Maximum Amount Per Connection ^{33,34, 35}
Category A – C and/or Consolidation Projects ³⁶			
Small DAC, Small SDAC, Eligible NTNC That Serves a Small DAC, Expanded Small DAC/SDAC, Medium DAC ³⁷ , or Small Non-DAC with MHI < 150% of Statewide MHI ³⁵	N/A	up to 100%	\$60,000 ³⁸
Category D – F Projects ³³			
Small DAC/SDAC or Eligible NTNC That Serves a Small DAC	N/A	up to 100%	\$45,000 ³⁹
Expanded Small DAC/SDAC	>=1.5%		
	<1.5%		

³⁰ See Section I.D. of this IUP for the specific definitions of each type of community. Eligibility is subject to limitations depending on the funding source. For example, to be eligible for PF, California Public Utilities Commission (CPUC)-regulated water systems must serve DACs and have fewer than 3,300 service connections, and DFA will consider the water system's rate of return for three fiscal years.

³¹ For the purposes of a consolidation project, the residential water rate of the Receiving Water System may be considered. For systems that do not charge monthly wastewater rates, including, but not limited to, migratory labor camps, mobile home parks, or tribes, residential water rates as a percentage of MHI is considered not applicable and DFA may approve grant/PF funding per other limitations specified above.

³² A water system that is not a water corporation regulated by CPUC and serves a SDAC with fewer than 200 service connections is deemed to have no ability to repay any financing for a project serving the SDAC.

³³ The Deputy Director of DFA may approve financing for construction projects with a total eligible project cost up to \$2,500,000 regardless of the amount per connection.

³⁴ The maximum grant/PF is based on all funding the community receives in a five-year period. This includes planning, TA, and construction funding for all DWSRF projects for the community.

³⁵ Construction projects that receive only Prop 1 and Prop 68 grant funds shall be limited to \$5,000,000 per project (\$20,000,000 limit for projects that provide regional benefits or are shared among multiple entities).

³⁶ Funding priority will be given to Category A-C Projects and consolidation projects.

³⁷ Funding priority will be given to projects that serve small DACs and expanded small DACs. Projects for Medium DACs and eligible small non-DACs may receive a maximum grant of \$20 million per project, unless the Deputy Director of DFA approves a case-by-case exception for good cause.

³⁸ The Deputy Director of DFA may approve up to \$80,000 per connection for good cause.

³⁹ The Deputy Director of DFA may approve up to \$60,000 per connection for good cause.

Repayable Construction Financing Terms				
Type of Community ²⁸	Residential Water Rates as a Percentage of MHI ³¹	Interest Rate	Maximum Financing Term ⁴⁰	Local Cost Share ⁴¹
Small SDAC or Eligible NTNC That Serves a Small DAC	N/A	0%	40 Years	Waived
Small DAC or Expanded Small DAC/SDAC	>=1.5%			
	<1.5%	½ General Obligation Bond Rate		
Regardless of population/connection criteria applicable to SCG DW Grant Funds, the following may be eligible for Groundwater Grant Funds: CWS serving SDACs of any size; and CWS serving DACs of any size if residential water rates as a percentage of MHI>+1.5%. Eligible projects include drinking water treatment projects that treat groundwater for direct potable use, with no cleanup or remediation of the aquifer. Eligible drinking water treatment projects generally address regional contamination, ongoing discharge, or naturally elevated levels of the contaminant.				
NOTE: DFA may deny DWSRF/SCG DW grant, PF or a combination thereof if the construction project has already been funded in part by other drinking water funding sources, including DWSRF and SCG DW funding. Where a PWS is privately owned by an entity, DFA may also consider the private owner’s assets and ability to afford a loan before otherwise awarding PF, grant or combination thereof.				

⁴⁰ Financing Term shall not exceed the useful life of the facilities being financed.

⁴¹ The applicant may choose to fund the remainder of the total project cost (Local Cost Share) from other sources (e.g. repayable DWSRF/Prop 1/Prop 68 financing; grant funding from sources other than the State Water Board; or other sources).

APPENDIX F: Non-Equivalency Environmental Review

Non-equivalency drinking water projects excluded from federal environmental cross-cutters, include the following⁴¹⁴²:

- 1) Planning projects;
- 2) Construction projects that serve one of the following community types, as defined in this IUP:
 - a. Small DAC/SDAC;
 - b. Non-transient non-community water system that serves a small DAC/SDAC, if the system serves solely the following:
 - i. A public K-12 school;
 - ii. A not-for-profit K-12 private school;
 - iii. A not-for-profit daycare facility;
 - iv. A not-for-profit labor camp;
 - v. A not-for-profit elder care facility; and/or
 - vi. A not-for-profit health care facility.
 - c. Expanded small DAC/SDAC; or
 - d. Medium DACs or small non-DAC with a Category A-C and/or consolidation project.
- 3) Additional Supplemental Appropriations for Disaster Relief Act, 2019 projects.

Applying CEQA-only review to these categories of projects will promote operational efficiency. Consultation under federal environmental cross-cutters can add time to the State Water Board's review of projects that might never receive DWSRF funding, are not viable equivalency projects, or are not needed to fulfill the equivalency requirement. A non-equivalency project consistent with categories identified above would undergo CEQA-only review, and the State Water Board would not undertake federal environmental cross-cutter review on these projects, resulting in a more expedited environmental review process for non-equivalency projects.

CEQA-only review of all non-equivalency drinking water projects includes projects that are in one of the categories listed above and are in the following groups:

- Projects in the planning phase during the term of this IUP (either in an existing planning agreement or completing planning work through an approved technical

⁴² The Deputy Director may designate projects in these categories as equivalency projects subject to federal cross-cutters to the extent necessary to satisfy the equivalency requirement.

assistance [TA] workplan) regardless of whether federal environmental cross-cutters are listed in the existing scope of work.

- If federal environmental cross-cutters are part of the scope of work, the applicant/TA provider will be notified by DFA Project Manager (PM) not to prepare the relevant federal environmental cross-cutters documents.
 - PM will also notify DFA Contracts Staff of the changes to the scope of work, to amend the project financing agreement to relieve the applicant/TA provider of the obligation to prepare the relevant federal environmental cross-cutter documents.
- Projects with a complete planning application submitted to DFA or with an environmental review requested by the PM by June 30, 2022.
- Projects with complete construction applications submitted by June 30, 2022 (including environmental documents). This may include projects in which the applicant has self-funded the environmental documents.
- Projects with construction applications submitted by June 30, 2022, that had environmental review completed under a planning agreement or TA workplan with CEQA-only review.

APPENDIX G: FFY 2021 Estimated Federal Capitalization Grant Cash Draw Schedule

FFY 2021 DWSRF Capitalization Grant/Accounts	Total Amount (Date of Award)	SFY 2021-22 Federal Draws				SFY 2022-23 Federal Draws				SFY 2023-24 Federal Draws			
Project Loan Fund		Q1	Q2	Q3	Q4	Q1	Q2	Q3	Q4	Q1	Q2	Q3	Q4
2021 Loan Funds	\$71,780,000			\$35,890,000	\$35,890,000								
Set-Aside Accounts													
2021 DWSRF Administration	\$3,880,000					\$970,000	\$970,000	\$970,000	\$970,000				
2021 SWS Administration	\$1,940,000								\$485,000	\$485,000	\$485,000	\$485,000	
2021 PWSS	\$9,700,000					\$4,850,000				\$4,850,000

APPENDIX H: Additional Supplemental Appropriations for Disaster Relief Act, 2019 (ASADRA) Revised Supplemental Intended Use Plan

DRAFT

California State Water Resources Control
Board
Division of Financial Assistance

Drinking Water State Revolving Fund (DWSRF)
& Clean Water State Revolving Fund (CWSRF)

Additional Supplemental Appropriations for Disaster Relief
Act, 2019 (ASADRA)

**REVISED
SUPPLEMENTAL
INTENDED USE PLAN**

I. BACKGROUND AND PURPOSE

Over 8,500 wildfires burned in California during calendar year 2018, with devastating effects for the residents and the environment. The fire season started early, and many large and destructive fires occurred between June and November. In addition to drought and climate change, the wildfires negatively impacted drinking water systems across the state.

The “Additional Supplemental Appropriations for Disaster Relief Act, 2019” (ASADRA) became law on June 6, 2019 to provide additional funding for water and wastewater infrastructure to aid in recovery from specific natural disasters. The U. S. Environmental Protection Agency (U.S. EPA) section of the ASADRA includes \$349.4 million in supplemental funding for the State Revolving Fund (SRF) programs. There are \$53.3 million for Clean Water State Revolving Fund (CWSRF) and \$296.1 million for the Drinking Water State Revolving fund (DWSRF).

The ASADRA funds are available only to states or territories in U.S. EPA Regions 4, 9, 10 for wastewater treatment works and drinking water facilities impacted by Hurricanes Florence and Michael, Typhoon Yutu, and calendar year 2018 wildfires and earthquakes. The states of Alabama, Alaska, California, Georgia, Florida, North Carolina, South Carolina, and the Territory of the Northern Mariana Islands are eligible to apply for these supplemental funds. The allocation of the ASADRA funds between the states and the CWSRF and DWSRF programs on a state-by-state basis was determined by U.S. EPA based on its analysis of each state’s needs.

The State Water Resources Control Board (State Water Board) applied for the full ASADRA funds of \$41,903,000 and \$183,000 that are allocated to the California DWSRF and CWSRF respectively. The State Water Board will also be applying for the reallocation of Alaska’s ASADRA funds. This Revised Supplemental Intended Use Plan (Revised Supplemental IUP) describes the State Water Board’s plan for administering the funds in accordance with the ASADRA specific requirements noted in U.S. EPA’s October 23, 2019, memorandum “[Award of State Revolving Funds Appropriated by the ‘Additional Supplemental Appropriations for Disaster Relief Act, 2019’](#)” and February 23, 2021, memorandum “Reallocation of FY 2019 ASADRA SRF Funds.”

II. TRANSFER OF CLEAN WATER STATE REVOLVING FUNDS

Due to the extensive fire damage to Public Water Systems (PWS) in California from the 2018 wildfires, the State Water Board transferred California's \$183,000 CWSRF allocation from the CWSRF program to the DWSRF program. The DWSRF statutes allow for the transfer of up to 33% of the DWSRF capitalization grants from the CWSRF to the DWSRF or vice versa. The resulting total amount of available supplemental funds for the DWSRF program, therefore, will be \$42,086,000.

III. ADDITIONAL APPROPRIATION FROM REALLOTMENT

In July 2020, the State of Alaska declined its \$26,272,000 ASADRA DWSRF allotment. California's portion of the appropriation reallocation is \$4,253,000 and the State Water Board will apply for the full amount. DFA has received more demand for ASADRA funds than has funds available. Assuming California receives the full reallocation, the resulting total amount of available ASADRA funds will be \$46,339,000.

IV. PROGRAM GOALS

California's ASADRA funds will be "used for eligible projects whose purpose is to reduce flood or fire damage risk and vulnerability or to enhance resiliency to rapid hydrologic change or natural disaster at ...any eligible facilities under section 1452 of the Safe Drinking Water Act, and for other eligible tasks at such ... facilities necessary to further such purposes ..."

The State Water Board's Division of Financial Assistance (DFA) will offer ASADRA funds to eligible PWS in California that were affected by the calendar year 2018 wildfires and earthquakes for the repair, replacement, rehabilitation, and otherwise DWSRF-eligible projects that involve infrastructure improvements and emergency preparations to increase system resiliency.

The ASADRA program goals are in concert with the long-term and short-term goals listed in the 2021-2022 DWSRF IUP for public health benefits, ensuring its perpetuity, and expeditious use of funds under section VI. Outcomes, Goals, Activities, and Measures.

V. PROGRAM REQUIREMENTS

All existing requirements for implementation of the DWSRF program and execution of a DWSRF funding agreement apply to projects receiving ASADRA funds and remain in effect unless such requirements are inconsistent with the statutory requirements of the

ASADRA. Applicants' ASADRA funded projects must meet the requirements of the DWSRF program and be otherwise eligible DWSRF projects. In addition, projects receiving ASADRA funds must meet the specific requirements noted in U.S. EPA's October 23, 2019, memorandum "Award of State Revolving Funds Appropriated by the 'Additional Supplemental Appropriations for Disaster Relief Act, 2019.'"

VI. ELIGIBLE ENTITIES AND PROJECTS

PWS that experienced negative impacts as a result of the calendar year 2018 wildfires and earthquakes are eligible to apply for ASADRA funding.

An ASADRA eligible entity is any otherwise DWSRF eligible entity that was damaged, demonstrates impact, or had a loss or disruption of a mission-essential function, including loss of function where there was potential impact to public health, caused by the listed natural disasters.

ASADRA is made available for 1) preparations for, adaptation to, or recovery from rapid hydrologic change or any other type of natural disaster for a drinking water system or related facility; 2) reduction of the likelihood of physical damage to a drinking water system; 3) reduction to a drinking water system's susceptibility to physical damage or ancillary impacts caused by floods, earthquakes, and fires.

PWS can apply for ASADRA funding without affecting their FEMA funding eligibility. Refer to details in the "Memorandum of Understanding between U.S. EPA and FEMA Regarding Coordination between U.S. EPA and FEMA Pertaining to State Revolving Fund Programs from May 2019" (https://www.epa.gov/sites/production/files/2019-05/documents/mou_between_epa_and_dhs.pdf). If a PWS is awarded FEMA grant after an ASADRA funding agreement has been executed, the ASADRA funding amount may be adjusted based on the FEMA grant received for the same project. There is no penalty for early repayment of an ASADRA funding agreement.

Examples of eligible projects related to wildfire or earthquakes are listed in the October 23, 2019 U.S. EPA memo.

VII. PROGRAM SCHEDULE AND FUNDING APPROACH

The schedule for public comment, application to the U.S. EPA, State Water Board adoption of this ASADRA Revised Supplemental IUP, and award of the ASADRA funds is the same as the schedule for the FY 2021-2022 DWSRF IUP as presented in Section VII of the FY 2021-2022 DWSRF IUP.

The existing DWSRF application process and forms were used for ASADRA applications. Applicants can refer to the State Water Board's website https://www.waterboards.ca.gov/drinking_water/services/funding/SRF.html and the

FAAST portal <https://faast.waterboards.ca.gov/> where details of the application and supporting documentation are described in order to complete the DWSRF application. Based on the initial ASADRA Supplemental IUP, applications were submitted to the State Water Board by September 30, 2020, with additional submittals and documentation provided by January 31, 2021. ASADRA applications were received from seven water agencies affected by natural disasters in the calendar year 2018 for drinking water projects. Based on this level of interest, the Fundable List in Section XX was developed to determine how best to allocate the ASADRA funds.

The Deputy Director of DFA is authorized to bypass any project with a complete application and fund any other ASADRA eligible project that is ready to proceed to an agreement if the applicant is non-responsive to DFA's request for information or consultation after notifying the applicant and giving the applicant a reasonable opportunity to respond.

Any ASADRA funds that are uncommitted as of June 30, 2022 may be committed to any eligible project on the basis of readiness for an agreement.

VIII. FUNDING AVAILABILITY AND TERMS

The State Water Board will provide 30 percent of the available ASADRA funds as principal forgiveness to eligible PWS regardless of their size or median household income levels. ASADRA funds will be provided to each eligible PWS for ASADRA eligible activities under the following terms: 70 percent repayable financing funds at zero percent (0%) and 30 percent principal forgiveness.

As with a standard DWSRF financing, ASADRA financing will have a repayment period of up to 30 years for non-disadvantaged PWS, or up to 40 years for disadvantaged PWS, so long as the repayment period is no longer than the useful life of the financed project. In contrast to standard DWSRF and CWSRF financing conditions that require the consent of the Deputy Director of DFA for prepayment, ASADRA financing may be prepaid at any time without penalty.

The first principal and interest payment will be due 18 months after project completion for the disadvantaged PWS, and 12 months for non-disadvantaged PWS. Thereafter, DWSRF repayments are due annually.

ASADRA project funding will be capped at a maximum of \$10 million per PWS. Partial project funding may also be offered to applicants if the requested funding exceeds the available ASADRA funds. Base program DWSRF low-interest financing funds may be used in conjunction with ASADRA funds to fully fund the remaining portions of the ASADRA projects.

Section XX provides a summary table of ASADRA applications – the ASADRA Fundable Project List. Currently, the ASADRA project list includes seven entities, 18 projects for a total cost of \$60,015,239. The requested funding amount exceeds the available ASADRA funding of \$46,339,000 from the U.S. EPA (including the reallocation funds). The total amount of ASADRA funding requested is \$48,499,909, given the \$10 million cap per PWS. The requested total of ASADRA funding to be provided as principal forgiveness is \$14,549,973, and the total to be provided as repayable financing is \$33,949,936, given the \$10 million cap per PWS.

The State Water Board anticipates all funding available from the U.S. EPA ASADRA Program to be provided to eligible drinking water projects in the current applications we have received. Other funding needed to meet the total requested project costs of \$60,015,239 is \$13,676,239. Additional funding from other funding sources will be sought and offered to PWSs where ASADRA funds available are less than the total project costs requested. The Deputy Director of DFA may offer DWSRF financing at 0% interest to fully fund projects on the ASADRA Fundable List. The Deputy Director of DFA may add to the list any additional projects that request ASADRA funds and appear

to be eligible and to adjust ASADRA funding amounts above \$10 million per PWS, should additional funding become available.

IX. ADMINISTRATION AND SET-ASIDE FUNDS

The State Water Board does not plan to take any set-asides from the ASADRA capitalization grant.

X. REPORTING

The State Water Board's DFA will report on ASADRA projects to the Drinking Water Project and Benefits Reporting System (PBR) and the Federal Funding Accountability and Transparency Act of 2010 (FFATA) Subaward Reporting System. ASADRA project characteristics and milestone information will be reported to PBR, and the PWS receiving federal dollars will be reported in the FFATA Subaward Reporting System.

DRAFT

XI. ASADRA FUNDABLE PROJECT LIST

Project Number	Applicant	Project Name	Amount Requested	Amount Funding Capped at \$10m	PF	Loan at 0%	Other Funding Sources	Population	Small WS	DAC / SDAC	DDW District Number
