

# STATE OF CALIFORNIA STATE WATER RESOURCES CONTROL BOARD DIVISION OF DRINKING WATER

**Issued**: July 21, 2022

## ORDER DDW\_HQ\_22D\_001 REQUIRING TECHNICAL REPORTING IN RESPONSE TO DROUGHT

The State Water Resources Control Board (State Water Board), acting by and through its Division of Drinking Water (Division), and pursuant to California Health and Safety Code section 116530, hereby issues Order No. DDW\_HQ\_22D\_001 (Order), as set forth below.

## **FINDINGS AND AUTHORITIES**

- 1. WHEREAS on October 19, 2021, Governor Gavin Newsom issued a Proclamation of a State of Emergency declaring that California is in a second consecutive year of dry conditions, resulting in drought throughout the state and extreme or exceptional drought in most parts of the state, and that these extreme conditions present a significant risk of water shortages in communities.
- WHEREAS since Governor Newsom's State of Emergency Proclamation was issued, the drought situation has worsened, with January, February, and March of E. JOAQUIN ESQUIVEL, CHAIR | EILEEN SOBECK, EXECUTIVE DIRECTOR

1001 | Street, Sacramento, CA 95814 | Mailing Address: P.O. Box 100, Sacramento, CA 95812-0100 | www.waterboards.ca.gov

2022 having the least rain and snow in over a century of state records for these months, resulting in the Governor's proclamation on March 22, 2022, stating that California is in a third consecutive year of dry conditions, resulting in continuing drought in all parts of the State.

- WHEREAS public water systems are required at all times to have source capacity available to meet their maximum day demand, in accordance with section 64554 of title 22 of the California Code of Regulations.
- 4. WHEREAS in response to the drought, the Division developed a data model to assist Division staff in identifying public water systems at risk of future water shortages. The model considers multiple factors including but not limited to: system size, number of sources, source type, location, groundwater basin status, surface water availability, source capacity violation history, risk assessment score, and water system self-reported drought risk in the Electronic Annual Report.
- 5. **WHEREAS** using the data model and staff expertise, the Division determined that certain public water systems are at risk of future water shortages.
- 6. WHEREAS California Health and Safety Code section 116530 authorizes the State Water Board to require a public water system to submit a technical report in a form and format and at intervals specified by the State Water Board, which may include without limitation: water quality information, physical descriptions of the existing water system, information related to drinking water accessibility, and information related to technical, managerial, and financial capacity and sustainability.

3

7. WHEREAS the Division will mail Notices of Applicability to the public water systems that the Division determines are at risk of future water shortages, informing them that they are subject to the requirements of this Order.

### DIRECTIVES

**THEREFORE**, the State Water Board hereby orders that public water systems receiving a Notice of Applicability comply with the following directives:

- No later than the seventh day of each month, submit to the Division a Drought Technical Report containing data for the prior month. Begin reporting in the month following receipt of a Notice of Applicability.
- 2. The contents of the Drought Technical Report shall consist of responses to the technical questions available at <u>drought.waterboards.ca.gov</u>. The technical questions relate to, among other things, public water systems' sources and supplies, drinking water demand, forecast water shortages, demand reduction measures, and efforts to augment supplies to meet current demand. The Drought Technical Report questions set forth at https//drought.waterboards.ca.gov are incorporated by reference and made a part of this Order.
- Public Water Systems subject to this Order shall submit the Drought Technical Report using the web-based reporting tool at <u>drought.waterboards.ca.gov</u>.
- 4. If the Division determines that a public water system including a public water system subject to this Order - is experiencing a severe water shortage or is expected to experience one within 90 days, the Division may require weekly

reporting. The Division will consider the following factors to determine whether a severe water shortage exists or is imminent: loss of pressure in parts of the system to less than 20 PSI, inadequate supply to customers, reliance on hauled or bottled water to meet demand, or other operational conditions threatening the availability of drinking water or the health and safety of the public water system's consumers. If notified by the Division, a public water system shall submit its Drought Technical Report on a weekly basis, no later than seven days after the end of the weekly reporting period. Weekly reporting periods begin on Sunday and end the following Saturday.

5. If a public water system subject to this Order believes that it is not at risk of a future water shortage, it may seek the Division's review of the Notice of Applicability by emailing the Division at <u>ddw-drought@waterboards.ca.gov</u> and providing supporting information. A public water system that is ordered to report on a weekly basis may seek the Division's review of its determination that the system is experiencing or will imminently experience a severe water shortage by emailing the Division at <u>ddw-drought@waterboards.ca.gov</u> and providing supporting information. Any change to the reporting frequency or other requirements must be approved in writing by the Division.

#### NOTICES OF APPLICABILITY

The Division will send Notices of Applicability and a copy of this Order to public water systems that the Division determines are at risk of future water shortages. When the Division determines that a public water system is no longer at risk of a future water shortage, the Division will inform the public water system in writing that it is no longer subject to the requirements of this Order.

## PREVIOUS DROUGHT REPORTING ORDERS

The drought reporting orders previously issued by the Division and listed in Appendix 1 are hereby rescinded.

## **AMENDMENTS TO THIS ORDER**

The State Water Board reserves the right to make modifications to this Order as it may deem necessary to protect public health and safety. Such modifications may be issued as amendments to this Order or changes to the Drought Technical Reporting webpage.

## FUTURE TECHNICAL REPORTING ORDERS

By issuing this Order and Notices of Applicability, the State Water Board does not waive its authority to issue individual technical reporting orders to public water systems.

### **PARTIES BOUND**

This Order shall apply to and be binding upon the System, its owners, shareholders, officers, directors, agents, employees, contractors, successors, and assignees.

### **SEVERABILITY**

The directives of this Order are severable, and future invalidation of a provision of this Order shall not be deemed to affect the validity of any other provision of this Order.

### FURTHER ENFORCEMENT ACTION

The California SDWA authorizes the State Water Board to issue a citation with monetary penalties to a public water system for violation or continued violation of the requirements of the California SDWA or any regulation, permit, standard, citation, or order issued or adopted thereunder. Failure to comply with this Order may subject the System to a citation with monetary penalty.

The California SDWA also authorizes the State Water Board to suspend or revoke a permit that has been issued to a public water system if the public water system has violated applicable law or regulations or has failed to comply with an order of the State Water Board, and to petition the superior court to take various enforcement measures against a public water system that has failed to comply with an order of the State Water Board. The State Water Board does not waive any further enforcement action by issuance of this Order.

Darrin Polhemus, Deputy Director Division of Drinking Water <u>July 21, 2022</u> Date
