### **ORDER IMPOSING WATER RIGHT CURTAILMENT, INCREASED COORDINATION, AND REPORTING REQUIREMENTS IN THE SHASTA RIVER WATERSHED (ORDER WR 2022-0162-DWR)**

This letter and the enclosed Order contain important information regarding the curtailment of the water right(s) listed in Attachment A of the Order, that are owned by «Present\_Owner» or their successor in interest. **The water right(s) listed in Attachment A is conditionally curtailed. Based on lack of forecasted precipitation, warm weather, and other factors, this Order curtails water rights, including those specified in the Shasta Adjudication<sup>1</sup> to a priority date of April 1, 1885. You are required to coordinate with the Scott Valley and Shasta Valley Watermaster District (Watermaster) and the State Water Board, as appropriate, to ensure that the drought emergency minimum flow requirement at the Yreka United States Geological Survey (USGS) gage is met and maintained before diverting. You must cease diverting in order of priority if the flows at the Yreka USGS gage fall below the drought emergency minimum flow requirement. Signing up for the “Scott-Shasta Drought” Email Subscription List under “Water Rights” is the best way to stay informed about changes to the curtailments (there is more information on this email at the end of this letter).**

This letter also describes a form that you are required to submit **by August 12, 2022**, to certify that you acknowledge your water right(s) is subject to curtailment. **In light of the active fire season, please note that this timeframe is extended until ten (10) days after lifting of any evacuation order affecting the place of use of water for the rights in Attachment A or affecting your access to necessary information or the ability to log on for reporting.** The Login(s)/Water Right Identification Number(s) and

---

<sup>1</sup> Judgement and Decree entered on December 29, 1932 in Siskiyou County Superior Court Case No. 7035, In the Matter of the Determination of the Relative Rights, Based Upon Prior Appropriation, of the Various Claimants to the Waters of Shasta River and its Tributaries in Siskiyou County, California.

Password(s)/Reporting Identifier(s) in Attachment A<sup>2</sup> will be needed to complete the required form(s).

Due to the drought and extremely dry conditions, water supply in many parts of California, including the Shasta River watershed, is insufficient to meet a significant portion of water demands, and many people throughout the region have taken steps to reduce water use. The enclosed Order curtails certain surface water diversions, describes exceptions to curtailments (including for firefighting needs), and imposes reporting requirements. This Order is issued under an emergency regulation adopted by the State Water Resources Control Board (State Water Board or Board) that became effective on August 30, 2021, and again on July 29, 2022. The enclosed Order describes the steps that you, or your agent of record, must follow to ensure that you cease diversions if necessary and that you comply with the requirements of this Order. You or your agent are responsible for immediately notifying all parties that divert water under the water right(s) identified in Attachment A of the enclosed Order and its requirements.

You may already be curtailing water use and/or be unable to divert water due to dry conditions. **Even if you are currently not diverting water, you must respond to this Order by completing the certification form.**

It is highly recommended all water users in the watershed sign up to receive notifications on the State Water Board's "Scott-Shasta Drought" email distribution list. You may also visit the State Water Board's [Scott River and Shasta River Watersheds Drought Response webpage](#)<sup>3</sup> frequently for updates. All future updates on curtailments will be provided through electronic communications.

### **Emergency Regulation**

On June 21, 2022, the State Water Board readopted an emergency regulation, with amendments, establishing drought emergency minimum flows in the Scott River and Shasta River watersheds (hereinafter "Regulation" or "Emergency Regulation"). (Cal. Code Regs., tit 23, §§ 875-875.9.). The amended Regulation went into effect on July 29, 2022. The Regulation is available on the Scott River and Shasta River Watersheds Drought Response webpage (see footnote 3).

### **Curtailment of Water Rights in Shasta River Watershed**

The State Water Board is requiring certain water right holders in the Shasta River watershed to stop diverting under their water rights until water supply conditions improve in the watershed and there is no longer a risk to minimum flow requirements, to

---

<sup>2</sup> If you already report to the State Water Board yourself, Attachment A contains the identification number(s) you normally use to enter information into the State Water Board's electronic Water Rights Report Management System. If the Watermaster normally reports to the State Water Board on your behalf, Attachment A has a newly assigned identification number that starts with the letters "SG."

<sup>3</sup> [https://www.waterboards.ca.gov/drought/scott\\_shasta\\_rivers/](https://www.waterboards.ca.gov/drought/scott_shasta_rivers/)

water supplies for minimum human health and safety needs (including firefighting), to minimum livestock needs, or for injury to senior diverters.

The regulation follows the water right priorities in the Shasta Adjudication, and adds in rights that are not addressed under the Shasta Adjudication (e.g., post-adjudication rights, groundwater rights). The regulation does not change the Shasta Adjudication, or affect the authority of the Watermaster to implement the Shasta Adjudication, or of the Siskiyou County Superior Court to administer or otherwise retain and exercise jurisdiction over the Shasta Adjudication. Section 875.5, subdivision (b) of the regulation describes the order of priority for curtailments in the Shasta River watershed.

The Deputy Director for the Division of Water Rights (Deputy Director) issued [Order WR 2021-0082-DWR](#) on September 10, 2021, which imposed curtailment of diversions junior to approximately November 1912. Based on forecasted precipitation and other factors, the State Water Board issued various addenda partially suspending curtailment of water rights in order of priority contingent on the required minimum flow being met and sustained at the Yreka USGS gage. On March 15, 2022, the State Water Board reinstated water right curtailments for the most junior water rights in the Shasta River watershed based on ongoing dry conditions, the approach of the irrigation season, and multiple unexpected decreases in flows below the minimum flow requirement (Addendum 9). Based on ongoing dry conditions, flows being consistently below the minimum flow requirement, and uncertainties associated with demands from overlying groundwater and riparian claims, the State Water Board is issuing this Order subjecting more senior water rights to curtailment because the minimum emergency flow requirement cannot be met by the more junior water rights curtailed in [Order WR 2021-0082-DWR](#).

Hard copy notices will not be sent out when curtailments are suspended, reinstated, or rescinded. As flows improve or worsen over the year, changes to curtailment orders will be posted on the State Water Board website (see footnote 3 of this letter) and sent out to individuals that have signed up for the [“Scott-Shasta Drought” Email Subscription List under “Water Rights”](#).<sup>4</sup> **Signing up for this email list is the best way to stay informed about implementation of the regulation, including changes to curtailments.**

### **Groundwater Wells**

Because the surface water and groundwater are interconnected in the Shasta River watershed, the regulation includes water rights for diversions of surface water as well as appropriative and overlying groundwater diversions, in the order of priority. Section 875.5 specifies the order in which curtailments shall be issued, taking into account water right priority in groupings from lowest to highest water right priority.

For groundwater diversions, case law recognizes overlying and appropriative rights to groundwater, analogous to riparian and appropriative rights to surface water. An overlying groundwater right is generally senior and attaches to land overlying a groundwater basin. An appropriative groundwater right is the type of water right you have if you divert water but: (1) do not own (or rent or lease) land overlying the basin

---

<sup>4</sup> [https://www.waterboards.ca.gov/resources/email\\_subscriptions/swrcb\\_subscribe.html](https://www.waterboards.ca.gov/resources/email_subscriptions/swrcb_subscribe.html)

that you use the water on; (2) own overlying land but use the water on non-overlying land; or (3) sell or distribute<sup>5</sup> the water to someone else. Groundwater appropriators have a priority date from when the groundwater well was constructed, and water first used for non-overlying use.

In the Shasta River watershed, appropriative groundwater pumpers are likely more junior to many surface water diversions, including those described in the Shasta Adjudication. This curtailment order does not extend to overlying groundwater users in the Shasta River watershed. Groundwater diversion curtailment extends only to appropriative groundwater diversions established after April 1, 1885.<sup>6</sup> Selling groundwater to be hauled and used at a different location is an appropriative use and is subject to this curtailment order if the appropriative use started after April 1885.

### **Exceptions to Curtailment (*allowances to continue limited diversions*)**

The regulation has exceptions for certain types of diversions that may continue even after you receive a curtailment order, if the appropriate form(s) is submitted to the State Water Board (see more on this below). These are:

- **Non-consumptive Diversions.** This exception applies if your diversion is not consumptive, meaning that it does not use up water or change the time the water is available to others (i.e., diversions do not decrease stream flows).
- **Minimum Human Health and Safety Diversions.** This exception applies if your diversion is your only water source for human health and safety purposes, like drinking, cooking, washing, or meeting the state's critical infrastructure needs. Please note that diversions for firefighting may continue under this exception.
- **Minimum Livestock Watering Diversions.** This exception applies if your diversion is your only source for minimum livestock watering needs.

**If you are subject to curtailment and you want to use one of these exceptions to continue diverting, you must submit additional information to the State Water Board using the applicable forms available at: <https://public.waterboards.ca.gov/WRInfo>.**

### **Required Response – Curtailment Certification Form**

Within ten (10) calendar days of issuance of this curtailment order, all water right holders or their agents receiving this Order are required to submit, under penalty of perjury, a 2022 Shasta Curtailment Certification Form. **In light of the active fire season, please note that this timeframe is extended until ten (10) days after lifting of any evacuation order affecting the place of use of water for the rights in Attachment A or affecting your access to necessary information or the ability to log on for reporting. The Deputy Director may further extend the deadline for**

---

<sup>5</sup> Sharing a well with your neighbors does not necessarily count as “distributing.” If you have questions about whether your use is “distributing” please call the State Water Board’s Scott River and Shasta River Drought phone message line at: (916) 327-3113 or e-mail us at [ScottShastaDrought@waterboards.ca.gov](mailto:ScottShastaDrought@waterboards.ca.gov).

<sup>6</sup> The priority date for groundwater appropriations is the date of well construction and when appropriative use was initiated. Therefore, appropriative groundwater use established prior to April 1885 is not subject to this curtailment.

**good cause, and the State Water Board recognizes that protection of life and property in these active fire areas may prevent a response within the timelines described in the State Water Board's curtailment orders. If you need further extension of the timeframe for curtailment response in light of wildfires, please contact us at the information below once it is safe for you to do so.**

**You are required to complete the 2022 Shasta Curtailment Certification Form,** which confirms that diversion under your water right is subject to curtailment and cessation of diversion may be required in order of priority if the flows in the Shasta River fall below the minimum flow requirement. The form also confirms that you will coordinate management of the water right with the Watermaster or the State Water Board. You must also indicate whether you are pursuing an exception to continue limited diversions under the curtailment order or plan to divert pursuant to an alternative valid water right. Timely and accurate completion of the form can help you avoid unnecessary enforcement proceedings. Your Login(s)/Water Rights ID and Password(s)/Water Right Identifier(s) are provided in Attachment A of the Order. You can access and complete the form online at: <https://public.waterboards.ca.gov/WRInfo>.

Staff are available to answer questions or otherwise assist with completing the form by email to: [ScottShastaDrought@waterboards.ca.gov](mailto:ScottShastaDrought@waterboards.ca.gov) and via our phone message line at: (916) 327-3113.

### **Local Cooperative Solutions**

Water users may also petition to implement local cooperative solutions that would achieve the purposes of the curtailment order. Local cooperative solutions are described in section 875, subdivisions (f)(1) through (f)(4) of the emergency regulation. Proposed local cooperative solutions may be submitted to the Deputy Director at any time, but they may not be implemented instead of complying with a curtailment order unless it has been approved by the Deputy Director. Additional information regarding local cooperative solutions is provided on the State Water Board website (see footnote 3 of this letter).

Local cooperative solutions should be submitted to the Deputy Director by email to: [ScottShastaDrought@waterboards.ca.gov](mailto:ScottShastaDrought@waterboards.ca.gov). The Deputy Director will review timely submitted proposals as soon as practicable and inform the affected water right holder or claimant of the determination or decision.

### **Potential Enforcement**

The enclosed Order includes enforceable requirements regarding a water right or claim of right that require your immediate attention. Diverting water in violation of the enclosed Order or the regulation risks administrative fines, a cease and desist order, or prosecution in court. The State Water Board has enforcement discretion and decisions related to enforcement and associated penalties are based on the specific circumstances of the violation. Fines may be up to \$1,000 per day of violation. (Wat. Code, §§ 1052, 1055, 1846.)

Please note that the State Water Board's Division of Water Rights (Division) evaluates the location of each diverter relative to any ongoing fires before proceeding with any enforcement or investigation, and carefully considers what type of follow-up is

appropriate. The Division will exercise discretion when considering enforcement, and generally will not pursue enforcement where violations are the result of emergency circumstances such as evacuation orders and loss of property due to wildfires. If you are severely impacted by wildfire and receive an enforcement-related notice or order, please contact us when conditions are safe and you are able to do so. Please also note that intentional misstatements, or intentionally claiming fire risk or impacts when none are present, is subject to legal actions and fines.

### **Request for Reconsideration**

You may submit a petition within 30 days to request that the State Water Board reconsider the enclosed Order. The process and grounds for reconsideration are provided by California Code of Regulations, title 23, sections 768 through 771. Any petition requesting reconsideration must be filed with the State Water Board no later than **September 1, 2022**. To ensure timely consideration, any petition for reconsideration should be emailed to: [ScottShastaDrought@waterboards.ca.gov](mailto:ScottShastaDrought@waterboards.ca.gov).

### **Questions, Resources, and How to Stay Informed**

Please review resources on the [Scott River and Shasta River Watersheds Drought Response webpage](https://www.waterboards.ca.gov/drought/scott_shasta_rivers/) ([https://www.waterboards.ca.gov/drought/scott\\_shasta\\_rivers/](https://www.waterboards.ca.gov/drought/scott_shasta_rivers/)) if you have questions. You may also contact staff by email at: [ScottShastaDrought@waterboards.ca.gov](mailto:ScottShastaDrought@waterboards.ca.gov) or leaving a message at our dedicated Scott River and Shasta River Drought phone line at: (916) 327-3113. Please be aware that calls and emails will be responded to as soon as possible in the order received. Staff will try to return calls within 24 hours, but responses may take a longer depending on call volume.

**We highly encourage you to sign up for the “Scott-Shasta Drought” Email Subscription List under “Water Rights”.<sup>7</sup> This is the best way to stay informed about changes to the curtailments and other important information related to the regulation.**

Sincerely,

Erik Ekdahl  
Deputy Director  
State Water Resources Control Board

Enclosure: Order Imposing Water Right Curtailment, Increased Coordination, and Reporting Requirements in the Shasta River Watershed for Water Right(s) Listed in Attachment A, including Attachment A thereto

---

**ORDER WR 2022-0162-DWR**

---

**IN THE MATTER OF WATER RIGHT(S) LISTED IN ATTACHMENT A OF  
«Present\_Owner»**

**ORDER IMPOSING WATER RIGHT CURTAILMENT, INCREASED COORDINATION,  
AND REPORTING REQUIREMENTS IN THE SHASTA RIVER WATERSHED**

**ISSUED AUGUST 2, 2022**

---

**FINDINGS:**

1. On June 21, 2022, the State Water Resources Control Board (State Water Board or Board) readopted an emergency regulation, titled Establishment of Minimum Instream Flow Requirements, Curtailment Authority, and Information Order Authority in the Klamath River Watershed (hereinafter “Regulation”). The Regulation provides curtailment authority throughout the Klamath River watershed, and establishes minimum instream flow requirements and information order authority in the Scott River and Shasta River watersheds. State Water Board Resolution No. 2022-0025 adopted the Regulation, and describes the need for the Regulation and its intent. State Water Board Resolution No. 2022-0025 is incorporated by reference into this Order. The readoption of the Regulation went into effect on July 29, 2022, when it was approved by the Office of Administrative Law and filed with the Secretary of State. The updated regulation contains a provision that extends previously issued curtailment orders under the amended regulation. (Section 875, subd. (d)(3).) Likewise, any petitions, certifications, or approvals of exceptions to curtailment under sections 875.1, 875.2, 875.3, or Article 24, section 878.1 will not require further action under the amended regulation to remain effective. The Regulation establishes minimum instream flows, as measured in cubic feet per second (cfs) at United States Geological Survey (USGS) gage no. 11517500 located near Yreka, as:

Jan	Feb	Mar 1-24	Mar 25-31	Apr	May	June	July	Aug	Sept 1-15	Sept 16-30	Oct	Nov	Dec
125	125	125	105	70	50	50	50	50	50	75	105	125	125

2. The Regulation includes California Code of Regulations, title 23,<sup>1</sup> sections 875, 875.1, 875.2, 875.3, 875.5, 875.6, and 875.9, which establish the circumstances under which the State Water Board may issue curtailments in the Shasta River watershed to maintain minimum flows for fish, as well as exceptions to curtailments and curtailment reporting requirements.
3. The Deputy Director for the Division of Water Rights determined in [Order WR 2021-0082-DWR](#)<sup>2</sup>, issued on September 10, 2021, that without curtailment as described in the Regulation of diversions junior to approximately November 1912, flows were likely to remain reduced below the minimum flows specified in section 875, subdivision(c)(2)(A). Based on forecasted precipitation and other factors, the State Water Board issued addenda to Order WR 2021-0082-DWR on September 23, October 21, October 29, December 17, December 22, December 29, 2021, January 26, and February 25, 2022, partially suspending curtailment of water rights in order of priority contingent on the required minimum flow being met and sustained at the Yreka USGS gage. On March 15, 2022, water right curtailments for the most junior water rights in the Shasta River watershed went back into effect based on ongoing dry conditions, the approach of the irrigation season, and multiple unexpected decreases in flows below the minimum flow requirement (Addendum 9).
4. July flows in the Shasta River at the USGS gage near Yreka have decreased below the minimum flow requirement of 50 cfs multiple times and were consistently below the minimum flow requirement between July 18 through July 22, 2022. These July decreases have been significant as compared to the magnitude of the flow requirement itself, with a drop in flow to as low as 34.5 cfs (69% of the flow requirement) on July 21, 2022. Flows less than the minimum flow requirement are anticipated to continue periodically through the irrigation season in the absence of additional curtailments. Considerable uncertainty exists regarding water demands from overlying groundwater and riparian claims that could affect the ability to meet and maintain drought emergency minimum flows. As described on pages 9-10 of the [Finding of Emergency and Informative Digest](#) issued on June 20, 2022, and incorporated by reference into this Order, absent curtailments, flows in the Shasta River are not forecasted to meet and stay above the Regulation's drought emergency minimum fishery flows. Additional information regarding the anticipated effect of curtailment under dry conditions is available in the Memorandum to the Deputy Director for the Division of Water Rights from a Water Resource Control Engineer in the Instream Flow Unit in the Division of Water Rights, dated July 25, 2022, and incorporated by reference
5. Based on the current flow conditions, and the information discussed above, the Deputy Director for the Division of Water Rights has determined that there is not

---

<sup>1</sup> All subsequent section references in this order are to California Code of Regulations, title 23 unless otherwise noted.

<sup>2</sup> All future addenda to Order WR 2021-0082-DWR include Order WR 2021-0085-DWR, Order WR 2022-0142-DWR, Order WR 2022-0161-DWR, and this Order.

reasonable assurance that minimum flows specified in section 875, subdivision(c)(2)(A) will continue to be met without additional curtailment to approximately April 1885. To provide reasonable assurance that the Regulation's drought emergency minimum flows are met, it is necessary to conditionally curtail all of the water right holders in the Shasta River watershed, described in Section 875.5, subdivision (b)(1)(A) [appropriative surface and groundwater rights post-Adjudication], as well as a portion of those water right holders in the priority group described in Section 875.5, subdivision (b)(1)(B) [Shasta Adjudication] with priority dates later than April 1, 1885.

6. This Order requires that you coordinate your diversions with the Scott Valley and Shasta Valley Watermaster District (and the State Water Board if your diversions fall outside the area of the authority of the Watermaster) to ensure that such diversions are allowed in order of priority only if the drought emergency minimum flow requirement at the Yreka USGS gage are being met and sustained. Coordination of diversions includes the requirement to provide reasonable information as requested to assist in coordinating diversions to meet minimum flows.
7. Wildfire in Northern California is often highly active during droughts, and communities across the state, including Siskiyou County, have been periodically at risk. This Order provides an automatic extension of the reporting requirements under this Order where the affected diversions, properties, or reporters are affected by evacuation orders.

**IT IS HEREBY ORDERED:**

1. This curtailment order shall be effective on August 3, 2022.
2. Diversion of water in the Shasta River watershed pursuant to the water right(s) listed in Attachment A is hereby curtailed.
3. You are required to coordinate the management of your water right(s) with the Scott Valley and Shasta Valley Watermaster District (and the State Water Board, as appropriate) to ensure that the drought emergency minimum flow requirement at the Yreka USGS gage in the Shasta River is maintained. Diversion of some or all of the water right(s) listed in Attachment A may be allowed without further modification of this Curtailment Order and shall be permitted only through such coordination. If the flow at the Yreka USGS gage falls below the minimum flow requirement, diversions must cease in order of priority until the minimum flow requirement is met.
3. Diversions otherwise subject to curtailment under this Order may be permitted to continue if authorized under an exception to curtailment as described by sections 875.1, 875.2, and 875.3 of the Regulation.
4. In accordance with section 875, subdivision (d)(1) of the Regulation, the water rights holder or agent of record who receives this Order is responsible for immediately providing notice of this Order to all diverters exercising the water right(s) associated with this Order.

5. «Present\_Owner» or their agent or successor is required, **by August 12, 2022**, to submit under penalty of perjury an online 2022 Shasta Online Curtailment Certification form (Curtailment Certification) in accordance with section 875.6 subdivision (a) for each water right listed in Attachment A. Attachment A lists the Water Rights ID/Login(s) and Password(s)/Water Right Identifier(s) to be used for reporting requirements. The Curtailment Certification shall be accessed and completed via the following website link:  
**<https://public.waterboards.ca.gov/WRInfo>**. Where the diversion or place of use for the water right(s) listed in Attachment A is in an area subject to a wildfire evacuation order, or where such an evacuation order inhibits the ability of «Present\_Owner» or their agent or successor to access the necessary information to complete the Curtailment Certification or to log on to complete the form, the deadline is automatically extended until ten (10) days after the lifting of the evacuation order.
6. If an exception(s) to curtailment is needed to continue diverting for non-consumptive uses, minimum human health and safety needs, or minimum diversions for livestock needs, as authorized by Regulation sections 875.1, 875.2, and 875.3, respectively, «Present\_Owner» or their agent or successor shall complete and submit either a self-certification or a petition using the forms available at:  
**<https://public.waterboards.ca.gov/WRInfo>** in addition to completing the Curtailment Certification.
7. All subsequent modifications to this Order, including curtailment suspensions, reinstatements, rescissions, or other modifications, shall be noticed through electronic means, including through the State Water Board's "Scott-Shasta Drought" email distribution list or as posted to the **[State Water Board's Scott River and Shasta River Watersheds Drought Response webpage](https://www.waterboards.ca.gov/drought/scott_shasta_rivers/)** ([https://www.waterboards.ca.gov/drought/scott\\_shasta\\_rivers/](https://www.waterboards.ca.gov/drought/scott_shasta_rivers/)). «Present\_Owner» is responsible for **signing up** for the "Scott-Shasta Drought" e-mail subscription list and/or for checking the State Water Board's Scott River and Shasta River Watersheds Drought Response webpage to receive such notice.
8. Violation of this Order shall be subject to enforcement and any applicable penalties pursuant to Water Code sections 1052, 1058.5, 1831, 1845, and 1846. To the extent of any conflict between the requirements of this curtailment order and any other applicable orders or conditions of approval, the diverter must comply with the requirements that are most stringent.
9. Nothing in this Order is intended to or shall be construed to limit or preclude the State Water Board from exercising its authority under any statute, regulation, ordinance, or other law, including but not limited to, the authority to bring enforcement against diverters for unauthorized diversion or use in violation of Water Code section 1052.
10. Nothing in this Order shall excuse individual water right holders from meeting any more stringent requirements that may be imposed by applicable legally binding legislation, regulations, or a water right permit requirement. This Order does not

«Present\_Owner»

Page 5 of 6

authorize any act which results in the taking of a threatened, endangered, or candidate species or any act which is now prohibited, or becomes prohibited in the future, under either the California Endangered Species Act (Fish and Game Code sections 2050 to 2097) or the federal Endangered Species Act (16 U.S.C.A sections 1531 to 1544).
