

Subject: Scott River Watershed: Reinstatement of Curtailments for All Surface Water Rights (Groups 1-8) – Addendum 12

To: Scott River Water Right Holders (sent to water right holders for which the Board has email addresses and to the Scott-Shasta Drought E-mail List)

The State Water Resources Control Board (State Water Board or Board) is reinstating curtailments for all surface water rights in the Scott River watershed as listed in Attachments A of [Order WR 2024-0024-DWR](#) and [Order WR 2026-0005-DWR](#) (Orders) as authorized under the Scott River and Shasta River Watersheds Drought Emergency Regulation ([Regulation](#)). **This Addendum to the Orders ends the conditional suspension of curtailments allowed under certain conditions per Addendum 11 and requires all surface water diverters to cease all diversions immediately. You may not resume diversions until otherwise informed by the State Water Board.**

Curtailments are needed to maintain the minimum flow requirement at the [Fort Jones United States Geological Survey \(USGS\) gage](#). For reference, the required minimum flows for the Scott River watershed in the coming months are the natural flow of the system up to the amounts listed in the table below, as measured in cubic feet per second (cfs), at the Fort Jones USGS gage.

June 1-23	June 24-30	July	August	September	October	November
125	90	50	30	33	40	60

The Regulation allows for limited diversions under curtailed water rights for specific purposes. More information on these exceptions can be found below.

Background

Pursuant to flow regulations that establish minimum instream flows for fishery protection, which with minor exceptions and changes have been in effect since August 30, 2021, the State Water Board issued a curtailment order (Order WR 2024-0024-DWR) on July 23, 2024. It curtailed all surface water rights in the Scott River watershed, as specified in Attachment A of the Order. In 2024 and 2025, subsequent addenda were issued to suspend or reinstate curtailments as required to maintain minimum flow requirements established in the [Regulation](#). (The Regulation is available online at:

https://www.waterboards.ca.gov/drought/scott_shasta_rivers/docs/2025/2025-scott-shasta-emergency-reg-adopted-searchable.pdf.)

Following the reinstatement of curtailments for all surface water rights in the Scott River watershed on May 21, 2026 ([Addendum 9](#)), flows continued to decline to a low flow of 137 cfs as measured at the Fort Jones USGS gage at 8:45 pm on May 22, 2026. Thereafter, flows began increasing. On May 25, 2026, the State Water Board issued [Addendum 10](#), conditionally suspending curtailments for Priority Group 8

in the Scott River watershed. Flows continued to rebound and precipitation in the watershed coupled with additional precipitation in the forecast permitted the State Water Board to issue [Addendum 11](#) on May 27, 2026. Addendum 11 expanded the conditional suspension of curtailments to all surface water rights in the Scott River watershed under specific conditions designated by priority group and only when flows were above the minimum flow requirement.

More recently, flows began declining again on June 5, 2026, with flows dropping below the minimum flow requirement of 125 cfs for June 1-23 on the evening of June 8, 2026. As of 7:30 am on June 9, 2026, the flow at the Fort Jones USGS gage was 119 cfs. Curtailments are needed in the Scott River watershed based on the current flow at the Fort Jones USGS gage, insignificant snowpack, a warmer temperature forecast, water demand, a seasonal drought forecast, no to minimal precipitation forecast, and comparison to flows in recent years with similar snowpack and precipitation measurements. Curtailments will assist in meeting the minimum instream flow requirement of natural flows up to the flow requirement noted in the table above.

While the lack of snowpack, seasonal forecasts, and historic flows indicate curtailment will be necessary for much of the irrigation season, the State Water Board will continue to monitor flows, flow forecasts, precipitation and temperature forecasts, and watershed conditions regularly to determine if adjustments to the curtailments are appropriate.

Allowances for Continued Limited Diversions

The Regulation has exceptions for certain types of diversions that may continue even after you receive a curtailment order, if the appropriate form(s) is submitted to the State Water Board (see more on this below). These exceptions are:

- **Non-consumptive Diversions**. This exception applies if your diversion is not consumptive, meaning that it does not use up water or change the time the water is available to others (e.g., run-of-river hydropower with returns entering the same stream, instream use).
- **Minimum Human Health and Safety Diversions**. This exception applies if a curtailed diversion is your only water source for minimum human health and safety purposes, like drinking, cooking, washing, or meeting the state's critical infrastructure needs. Please note that diversions for firefighting may continue under this exception.
- **Minimum Livestock Watering Diversions**. This exception applies if a curtailed diversion is your only source for minimum livestock watering. See section 875.3 in the Regulation for more information on minimum livestock watering.

Reporting, certification, and petition forms previously submitted for the Orders are still active and do not need to be resubmitted, unless you are updating your previous submittal or have not yet submitted the form(s). If you want to continue diverting using one of the above exceptions, and you have not submitted information already, you must submit the relevant information to the State Water Board. Please contact us using the

information in the Questions section below if you have questions about a prior submittal or need to submit a certification or petition.

Questions and How to Stay Informed

If you believe your curtailment is being suspended in error or have questions regarding this email, please contact Board staff immediately using the information provided below.

Contact Board Staff by:

- Email: ScottShastaFlows@waterboards.ca.gov
- Phone: (916) 327-3113

Stay Informed by:

- **Webpage:** Please monitor your email and our [Scott–Shasta Drought webpage](https://www.waterboards.ca.gov/drought/scott_shasta_rivers/) (https://www.waterboards.ca.gov/drought/scott_shasta_rivers/) for future updates.
- **Email Subscription:** If you received this notice in a forwarded message and would like to receive future emails related to this and similar efforts, please sign up for the State Water Board’s “Scott-Shasta Drought and Flow Efforts” [email subscription list](#) under “Water Rights”.

Sign up for an email subscription list online at:

https://www.waterboards.ca.gov/resources/email_subscriptions/swrcb_subscribe

If an email notice is issued on the weekend or after business hours, the website will not be updated until the following workday due to service limitations.

Juliet Christian-Smith
Deputy Director
Division of Water Rights
State Water Resources Control Board

Issued: June 9, 2026

Attachment: Attachment to Addendum 12 of Order WR 2024-0024-DWR and Order WR 2026-0005-DWR (Orders Imposing Water Right Curtailment and Requiring Reporting for Surface Water Rights in the Scott River Watershed)

**ATTACHMENT TO ADDENDUM 12 OF
ORDER WR 2024-0024-DWR AND ORDER WR 2026-0005-DWR
(ORDERS IMPOSING WATER RIGHT CURTAILMENT AND REQUIRING REPORTING
FOR SURFACE WATER RIGHTS IN THE SCOTT RIVER WATERSHED)**

The Curtailment Group number is based on the order of priority outlined in [Regulation](#) section 875.5(a)(1). Group 1 is curtailed first and suspended last (i.e., most junior water right priority), Group 8 is curtailed last and suspended first. Please note that water rights of Group 2 refer to the Surplus Rights only, not the other water rights of the owner. Please also note that ownership is as listed in the Scott River Decree. This list should be understood to include the successors and assigns of the owners at this time. Group 2 Surplus Rights are generally unavailable in drought years and are only available when all other rights under the Scott River Decree have been fully satisfied.

NOTE: This includes the water rights in Order WR 2024-0024-DWR, issued July 23, 2024, as well as the water rights in the Order WR 2026-0005-DWR, issued June 5, 2026.
