

Dear State Water Board Members,

As long time Tahoe Keys homeowners we would like to express a strong endorsement of the efforts to rid our waterways of invasive weeds with the use of approved and tested pesticides. We were pleased when the Lahontan Water Board passed an amendment by unanimous vote at an open Lahontan Board meeting that many Tahoe Keys Homeowners attended. It is long overdue to try to eradicate these invasive weeds. The weeds are contributing factor to the decline in the water clarity.

Thank you all for your hard work and your consideration on this very important matter.

Respectfully,

Les Lovell
