Carousel Tract (Former KAST Property Tank Farm)

SUMMER 2018
COMMUNITY UPDATE

Cluster 7 Returned Home, 73 Homes Completed to Date

The Los Angeles Regional Water Quality Control Board (Regional Board) is pleased to provide you with the latest update on the progress of the Carousel Community Cleanup:

- Cluster 7 residents moved back home during the first week of July.
- With Cluster 7 finished, 26% of the cleanup is complete.
- Cluster 8 landscaping began on July 24th.
- Cluster 9 residents will move to temporary housing at the end of July.

During Clusters 9 and 10 excavation activities, residents will notice additional signage on the sound walls. These signs comply with the new South Coast Air Quality Management District (AQMD) Rule 1466 to minimize off-site dust emissions associated with the excavation activities. The rule requires signage for construction sites with certain levels of contaminants in soil. In the following weeks, Shell will install signs on sound walls notifying residents of this requirement. There is no change in cleanup activities for the Remedial Action Plan or to previously documented site conditions.

Come visit the Regional Board Team at our information table in front of 24628 Marbella Avenue on **Saturday, August 18, 2018** from **11 a.m. to 2 p.m.** It's an informal setting for you to drop by to ask questions, raise concerns, or share experiences about the cleanup activity, one-on-one with the Regional Board Team. No appointment is necessary.

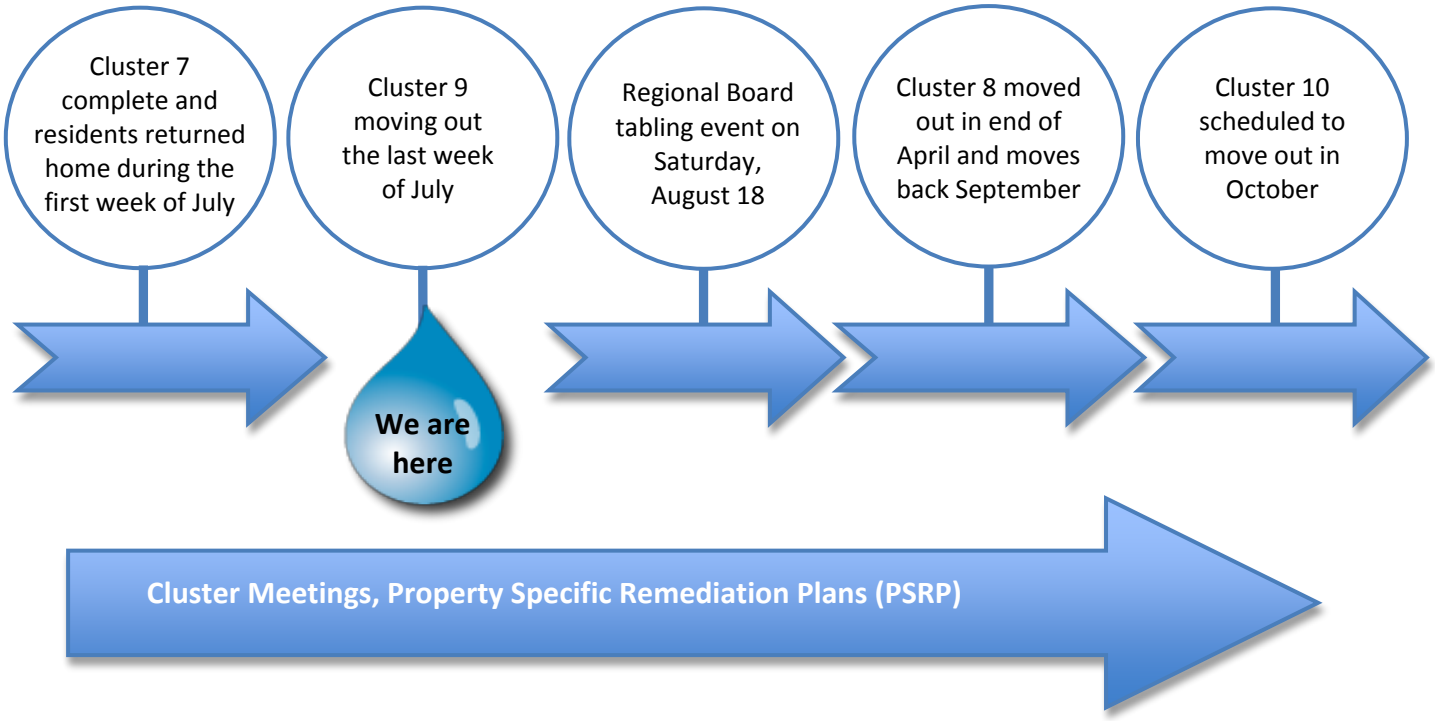
If you have any questions or concerns, please contact the Regional Board:

Dr. Teklewold Ayalew, Regional Board Project Manager
213-576-6739 • teklewold.ayalew@waterboards.ca.gov

Susana Lagudis, Regional Board Public Participation
213-576-6694 • susana.lagudis@waterboards.ca.gov

Cleanup Activities Sequence

Cleanup activities may be subject to change



Your health and safety are top priorities. Please observe all traffic and "No Parking" signs for your safety and the safety of your neighbors. Thank you for your patience and cooperation.

###

The mission of the California State Water Resources Control Board and the nine Regional Water Quality Control Boards is to preserve, enhance and restore the quality of California's water resources for the benefit of present and future generations. The goals of the Los Angeles Regional Water Quality Control Board's (Regional Board) site cleanup program are to protect and restore water resources and implement stringent goals to protect human health, water quality and the environment, today and into the future.
