

CALIFORNIA REGIONAL WATER QUALITY CONTROL BOARD  
LOS ANGELES REGION

MONITORING AND REPORTING PROGRAM NO. CI-6166

FOR

CALIFORNIA MILK PRODUCERS  
(NPDES NO. CA0057371)

The discharger shall implement this monitoring program on the effective date of this Order. The first monitoring report under this program is due by April 15, 1991.

Monitoring shall be submitted by the dates in the following schedule:

<u>Reporting Period</u>	<u>Report Due</u>
January - March	April 15
April - June	July 15
July - September	October 15
October - December	January 15

Effluent Monitoring

A sampling station shall be established for each point of discharge and shall be located where representative samples of that effluent can be obtained. The following shall constitute the effluent monitoring program:

<u>Constituent</u>	<u>Units</u>	<u>Type of sample</u>	<u>Minimum Frequency of Analysis</u>
Temperature	oF	grab	monthly
Total waste flow	gal/day	---	monthly
pH	units	grab	quarterly
Oil and grease	mg/l	grab	quarterly
Suspended Solids	mg/l	grab	quarterly
BOD <sub>5</sub> 20°C	mg/l	grab	quarterly
Settleable solids	ml/l	grab	quarterly

ORDER NO. 90-163

NPDES NO. CA0057371

WASTE DISCHARGE REQUIREMENTS  
FOR

CALIFORNIA MILK PRODUCERS

The California Regional Water Quality Control Board, Los Angeles Region, finds:

1. California Milk Producers (a corporation) discharges waste under waste discharge requirements contained in Order No. 85-50 adopted by this Board on August 26, 1985.
2. California Milk Producers has filed a report of waste discharge and has applied for renewal of its waste discharge requirements and National Pollutant Discharge Elimination System (NPDES) Permit.
3. California Milk Producers operates a milk transfer and processing plant at 11709 East Artesia Boulevard, Artesia, California, and discharges up to 220,000 gallons per day of condensate water expelled from milk evaporators. The wastes flow to a storm drain in Fallon Street and thence to Coyote Creek, at a point approximately one-half mile south of Wardlow Road. Coyote Creek is tributary to San Gabriel River, a water of the United States, near Stearns Street, above the tidal prism.
4. All other industrial and domestic wastes from this facility go to the community sewer system.
5. The Board adopted a revised Water Quality Control Plan for Los Angeles River Basin on November 27, 1978. The plan contains water quality objectives for San Gabriel River. The requirements contained in this Order as they are met will be in conformance with the goals of that Water Quality Control Plan.
6. The beneficial uses of the receiving waters are: water contact and non-contact water recreation, warm freshwater habitat, wildlife habitat, and (within the tidal prism), industrial service supply, ocean commercial and sport fishing, preservation of rare and endangered species, marine habitat, and saline water habitat.

7. The issuance of waste discharge requirements for this discharge is exempt from the provisions of Chapter 3 (commencing with Section 21100) of Division 13 of the Public Resources Code in accordance with Water Code Section 13389.

The Board has notified the discharger and interested agencies and persons of its intent to prescribe waste discharge requirements for this discharge and has provided them with an opportunity to submit their written views and recommendations. The Board in a public hearing heard and considered all comments pertaining to the discharge and to the tentative requirements.

This Order shall serve as a National Pollutant Discharge Elimination System permit pursuant to Section 402 of the Federal Clean Water Act or amendments thereto, and shall take effect at the end of ten days from the date of its adoption, provided the Regional Administrator of the EPA, has no objections.

IT IS HEREBY ORDERED, that California Milk Producers, in order to meet the provisions contained in Division 7 of the California Water Code and regulations adopted thereunder, and the provisions of the Federal Clean Water Act and regulations and guidelines adopted thereunder, shall comply with the following:

I. Effluent Limitations

1. Wastes discharged shall be limited to condensate water from milk evaporators only, as proposed.
2. The discharge of an effluent in excess of the following is prohibited:

<u>Constituent</u>	<u>Units</u>	<u>Discharge Limitation</u>	
		<u>30-day Average</u>	<u>Maximum</u>
Suspended Solids	mg/l	50	150
	lbs/day*	92	275
BOD <sub>5</sub> 20 <sup>0</sup> C	mg/l	20	60
	lbs/day*	37	110
Settleable solids	ml/l	0.1	0.3
Oil and grease	mg/l	10	15
	lbs/day*	18	28

\*Based on total waste flow of 220,000 gallons per day

II. Requirements and Provisions

This Order includes the attached "Standard Provisions and General Monitoring and Reporting Requirements".

III. Expiration Date

This Order expires on November 10, 1995.

The discharger must file a Report of Waste Discharge in accordance with Title 23, California Code of Regulations, not later than 180 days in advance of such date as application for issuance of new waste discharge requirements.

IV. Rescission:

Order No. 85-50 adopted by this Board on August 26, 1985, is hereby rescinded.

I, Robert P. Ghirelli, Executive Officer, do hereby certify that the foregoing is a full, true, and correct copy of an Order adopted by the California Regional Water Quality Control Board, Los Angeles Region, on December 3, 1990.

  
ROBERT P. GHIRELLI, D.Env.  
Executive Officer
