PROJECT LOCATION

City Wells Nos.2,4,5, and 6
Santa Monica Boulevard
Beverly Hills, CA 90210

FACILITY MAILING ADDRESS

455 N. Rexford Drive
Beverly Hills, CA 90210-4817

PROJECT DESCRIPTION

The City of Beverly Hills's production well No.6 is covered under General NPDES Permit No. 994001, Order No. 97-045. The City of Beverly Hills is requesting a revision of the permit to cover three additional production wells, Nos. 2, 4, and 5. The city proposes to discharge groundwater generated during pumping test from the production wells to the storm drain. The pumped groundwater will be analyzed prior to discharge into the storm drain catch basins.

VOLUME AND DESCRIPTION OF DISCHARGE

The City of Beverly Hills will discharge up to 0.99 million gallons per day (mgd) of the pumping test water. The water will be discharged into a storm drain catch basins; for well No.2 (Latitude 34° 04' 53", Longitude 118° 23' 20"); well No.4 (Latitude 34° 04' 38", Longitude 118° 23' 41"); well No.5 (Latitude 34° 04' 21", Longitude 118° 24' 06"); well No.6 (Latitude 34° 04' 20", Longitude 118° 23' 43") thence to Ballona Creek, a water of the United States. The project locations are shown as Attachments 1.

FREQUENCY OF DISCHARGE

The discharge will be intermittent and will begin in August 2001. The pumping test project will be completed in the first quarter of 2002.

REUSE OF WATER

Due to intermittent and short duration discharge for each individual well, there are no feasible reuse options for the discharge.
