**FACT SHEET  
WASTE DISCHARGE REQUIREMENTS  
FOR  
ULTRAMAR, INC.  
(Marine Tank Farm Pipeline Installation Project)**

**NPDES NO. CAG994001  
CI-8334**

**PROJECT LOCATION**

130 West A Street  
Wilmington, CA 90744

**FACILITY MAILING ADDRESS**

2402 E. Anaheim Street  
Wilmington, CA 90744

**PROJECT DESCRIPTION**

Ultramar proposes to install pipelines at its marine tank farm facility. Dewatering is anticipated during excavation for the pipeline installation. Ultramar proposes to store the extracted groundwater in Baker tanks, and to analyze the groundwater prior to discharge into the storm drain.

**VOLUME AND DESCRIPTION OF DISCHARGE**

Ultramar will discharge up to 0.012 million gallons per day (mgd) of groundwater. The water will be discharged into storm drain (Latitude 33° 46' 8", Longitude 118° 15' 37"), thence into Los Angeles Inner Harbor, a water of the United States. The site location is shown as Attachment I.

**FREQUENCY OF DISCHARGE**

The discharge will be intermittent and will begin in October 2001. The construction project will last approximately three weeks.

**REUSE OF WATER**

The discharge water will be highly saline and have no feasible reuse options at the site.
