PROJECT DESCRIPTION:

The City of Arcadia Public Works Services Department (The City) proposes to discharge groundwater from potable water well, bringing back the well pump into service after pump rehabilitation. The groundwater will be discharged to the flood control channel system.

VOLUME AND DESCRIPTION OF DISCHARGE:

Up to 3.89 million gallons per day (mgd) of groundwater will be discharged during the short-term test that will be infrequent up to 4 hours a day within 1 to 2 weeks time period. The water will be discharged into Arcadia Wash (Latitude: 34° 06' 52", Longitude: 118° 00' 56"), thence into Rio Hondo which flows into Los Angeles River, a waters of the United States. The site location map is shown in Attachment 1.

FREQUENCY OF DISCHARGE:

The discharge will be infrequent up to 4 hours a day within 1 to 2 weeks time period, and will be conducted in January 2002.

REUSE OF WATER:

This is a short-term discharge. In addition, there is very limited landscaping area at the site for irrigation. Therefore, it is not economically or physically feasible to re-use the wastes.
