TERMINATION OF COVERAGE UNDER GENERAL WASTE DISCHARGE REQUIREMENTS FOR IN-SITU GROUNDWATER REMEDIATION AND GROUNDWATER RE-INJECTION – FORMER PNEUMO ABEX FACILITY, 3151 WEST FIFTH STREET, OXNARD, CALIFORNIA (FILE NO. 94-076, ORDER NO. R4-2014-0187, SERIES NO. 022, CI-8984, GLOBAL ID. WDR100001027)

Dear Mr. Reis:

On April 17, 2015, the Los Angeles Regional Water Quality Control Board authorized the proposed subsurface injection of materials under the General Waste Discharge Requirements (WDR) Order No. R4-2014-0187. The authorized discharge was part of an approved *Bioaugmentation Workplan* for groundwater remediation of volatile organic compounds at the former Pneumo Abex facility.

On April 12, 2019, you requested termination of coverage under the General WDR because injection of bioaugmentation culture was completed in February 2018 and no additional injection activities are planned in the future. Therefore, the WDR is no longer needed. Coverage under General WDR Order No. R4-2014-0187 for the subject site is hereby terminated except for enforcement purposes.

If you have any questions, please contact the Project Manager, Dr. Ann Chang at (213) 620-6122 (ann.chang@waterboards.ca.gov), or the Chief of Groundwater Permitting Unit, Dr. Eric Wu at (213) 576-6683 (eric.wu@waterboards.ca.gov).

Sincerely,

Renee Purdy
Executive Officer
