CERTIFIED MAIL
RETURN RECEIPT REQUESTED
CLAIM NO. 7003 3110 0003 3258

Dear Mr. Cochran:

GENERAL WASTE DISCHARGE REQUIREMENTS FOR SMALL COMMERCIAL SUBSURFACE SEWAGE DISPOSAL SYSTEMS – STATE READY MIX, INC., 3127 LOS ANGELES AVENUE, OXNARD, CALIFORNIA (FILE NO. 06-020 CI-9159)

We have completed our review of your application for Waste Discharge Requirements to discharge domestic wastewater from State Ready Mix, Inc. in an unincorporated area of Ventura County near the City of Oxnard.

State Ready Mix, Inc. (Discharger) owns a 10-acre site and a concrete batch plant located 3127 Los Angeles Avenue, Oxnard, California (Figure 1). The facility consists of concrete batch plant, concrete storage bins, concrete color and additives storage, repair facility, scale, administration offices, concrete recycler and water recovery, and a septic tank system (Figure 2). The Discharger proposed to build a new modular office for use as a dispatch office. The existing septic system consists of a septic tank with a total capacity of 1,500 gallons connected to two 90 foot leach lines.

The Discharger has estimated that a maximum of 300 gallons per day of domestic wastewater will be discharged from the existing septic tank system that services seven staff people. Groundwater beneath the site was not encountered to a depth of 26 ft below ground surface, the maximum depth drilled.

Regional Board staff have reviewed the information provided and have determined that the proposed discharge meets the conditions specified in Order No. 01-031, "General Waste Discharge Requirements for Small Commercial and Multifamily Residential Subsurface Sewage Disposal System" adopted by this Regional Board on February 22, 2001.

The enrollment under this general permit (Order No. 01-031) is only for disposal of the domestic wastewater and there shall not be any other waste discharge through the septic system.

Enclosed are your Waste Discharge Requirements, consisting of Order No. 01-031 and Monitoring and Reporting Program No. CI-9159.

California Environmental Protection Agency

The energy challenge facing California is real. Every Californian needs to take immediate action to reduce energy consumption
For a list of simple ways to reduce demand and cut your energy costs, see the tips at: <http://www.swrcb.ca.gov/news/echallenge.html>

Our mission is to preserve and enhance the quality of California's water resources for the benefit of present and future generations.

Mr. Russell Cochran

The "Monitoring and Reporting Program" requires you to implement the monitoring program on the effective date of coverage under this permit. All monitoring reports should be sent to the Regional Board, ATTN: Information Technology Unit.

When submitting monitoring or technical reports to the Regional Board per these requirements, please include a reference to Compliance File No. CI-9159, which will assure that the reports are directed to the appropriate file and staff. Also, please do not combine other reports with your monitoring reports. Submit each type of report as a separate document.

We are sending a copy of Order No. 01-031 only to the applicant. Copies of the Order will be furnished to anyone who requests it.

If you have any questions, please contact Mr. Orlando H. Gonzalez at (213) 620-2267.

Sincerely,

Jonathan Bishop
Executive Officer
