Oxnard, CA 93003

Dear Mr. Naumann:

**TERMINATION OF COVERAGE UNDER GENERAL WASTE DISCHARGE REQUIREMENTS  
– FIVE POINTS COMMINGLED PLUME, 2901 EAST MAIN STREET AND 2912 TELEGRAPH  
ROAD, VENTURA, CALIFORNIA (ORDER NO. R4-2007-0019, SERIES NO. 051, CI-9396)**

In our letter dated April 16, 2008, we informed you that the subject discharge is regulated under Order No. R4-2007-0019, Series No. 051, which also serves as your Waste Discharge Requirements (WDR).

By email dated February 5, 2009, you notified the Regional Board that a pilot test of ozone injection for remediation of total petroleum hydrocarbons performed for the site is complete and that you request termination of the WDR.

The monitoring results were provided to the Regional Board in the quarterly monitoring reports. Since the pilot testing has been completed and the WDR is no longer needed, the coverage under Board Order No. R4-2007-0019, Series No. 051 for the subject facility is hereby terminated. Please note that you are required to apply for a WDR for full scale remediation.

**If you have any questions, please contact Chief of Groundwater Permitting Unit, Dr. Rebecca Chou, at (213) 620-6156.**

Sincerely,

  
Tracy J. Egoscue  
Executive Officer
