

Los Angeles Regional Water Quality Control Board

February 20, 2015

Mr. Benny Dehghi
Honeywell International Inc.
M/S 23-1-80, 2525 West 190th Street
Torrance, CA 90504

TERMINATION OF GENERAL WASTE DISCHARGE REQUIREMENTS FOR FORMER HONEYWELL SITE, 3201 WEST LOMITA BOULEVARD, TORRANCE, CALIFORNIA (FILE NO. 11-120, ORDER NO. R4-2007-0019, SERIES NO. 178, CI-9767, GLOBAL ID WDR100001801)

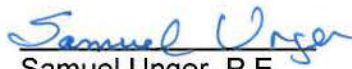

Dear Mr. Dehghi:

On February 3, 2012, Regional Water Quality Control Board (Regional Board) informed you that the application of sweet dry whey as enhanced in situ bioremediation (EISB) pilot study for groundwater remediation of volatile organic compounds (VOCs) is regulated under Regional Board Order No. R4-2007-0019, which specifies your Waste Discharge Requirements (WDR).

In a letter dated February 10, 2015, you requested the termination of the WDR coverage under Regional Board Order No. R4-2007-0019 because the planned enhanced in situ bioremediation pilot test has been deferred. Honeywell will evaluate other remedial technologies and prepare a work plan for Department of Toxic Substances Control's (DTSC) approval by late 2015. Since the planned pilot test is deferred, no discharge has occurred at the subject site. Therefore, the WDR is no longer needed. The coverage for the subject facility, under Regional Board Order No. R4-2007-0019, is hereby terminated with the exception of enforcement under the term of the permit.

If you have any additional questions, please contact the Project Manager, Mr. David Koo at (213) 620-6155 (dkoo@waterboards.ca.gov) or the Groundwater Permitting Unit Chief, Dr. Eric Wu at (213) 576-6683 (ewu@waterboards.ca.gov).

Sincerely,

Samuel Unger, P.E.
Executive Officer
