

## Los Angeles Regional Water Quality Control Board

December 16, 2016

Mr. Michael Bower The Boeing Company Santa Susana Field Laboratory 5800 Woolsey Canyon Road Canoga Park, CA 91304-1148

TERMINATION OF GENERAL WASTE DISCHARGE REQUIREMENTS FOR THE BOEING COMPANY, SANTA SUSANA FIELD LABORATORY, 5800 WOOLSEY CANYON ROAD, CANOGA PARK, CALIFORNIA 93063 (FILE NO. 12-147, ORDER NO. R4-2007-0019, SERIES NO. 232, CI-9974, GLOBAL ID WDR100009654)

Dear Mr. Bower:

On September 5, 2013, the Los Angeles Regional Water Quality Control Board (Regional Board) informed you that the In-Situ Chemical Oxidation (ISCO) by injecting potassium permanganate to reduce the concentration of volatile organic compounds (VOCs) in groundwater is regulated under Regional Board Order No. R4-2007-0019, which specifies your Waste Discharge Requirements (WDR).

In a letter dated February 16, 2016, you requested the termination of the WDR coverage under Regional Board Order No. R4-2007-0019 because all the ISCO injection activities were completed in February 2015, and no additional injection activities are planned. As a result, the WDR is no longer needed. The coverage for the subject facility, under Regional Board Order No. R4-2007-0019, is hereby terminated with the exception of enforcement under the term of the permit.

If you have any additional questions, please contact the Project Manager, Mr. David Koo at (213) 620-6155 (<a href="mailto:david.koo@waterboards.ca.gov">david.koo@waterboards.ca.gov</a>) or the Groundwater Permitting Unit Chief, Dr. Eric Wu at (213) 576-6683 (<a href="mailto:eric.wu@waterboards.ca.gov">eric.wu@waterboards.ca.gov</a>).

Sincerely,

Samuel Unger, P.E
