Dear Mr. Mastin:

The California Regional Water Quality Control Board, Los Angeles Region (Regional Board) adopted Waste Discharge Requirements (WDRs) Order No. 00-098 for Southdown, Inc. (aka. Transit Mixed Concrete Company), a sand and gravel quarry and concrete production facility (Facility) in Azusa, California, on June 29, 2000. On November 6, 2000, Cemex Construction Materials Pacific LLC (Cemex) took over operations of the Facility from Southdown, Inc. On July 18, 2018, Cemex submitted a letter to the Regional Board requesting the termination of WDRs because operations at the Facility has been ceased. As such, Regional Board staff intends to terminate WDR Order No. 00-098.

In accordance with administrative procedures, this Regional Board, at a public hearing, will consider the enclosed tentative Order, which will terminate WDRs Order No. 00-098. The hearing will be held on November 8, 2018, at the Metropolitan Water District of Southern California, 700 North Alameda Street, Los Angeles, California and will begin at 9:00 AM.

In order to be fully evaluated by Regional Board staff and included in the Board's agenda packet, written comments must be received at the Regional Board office by 5:00 PM on October 12, 2018. Failure to comply with these requirements is grounds for the Regional Board to refuse to admit the proposed written comment or exhibit into evidence. Timely submittal of written comments is encouraged to ensure that all comments are accurately and fully included in the administrative record, that Regional Board staff is able to provide a timely review, and that Regional Board members have sufficient time to give full consideration to the comments and issues raised.
