NOTICE OF PUBLIC HEARING

**PROPOSED
WASTE DISCHARGE REQUIREMENTS (WDRs)
AND WATER RECYCLING REQUIREMENTS (WRRs)**

PROJECT SPONSORS	RECYCLING LOCATION	RECEIVING WATER
City of Los Angeles, Bureau of Sanitation City of Los Angeles, Department of Water and Power Los Angeles County Department of Public Works	Dominguez Gap Seawater Intrusion Barrier	N/A

The City of Los Angeles (hereinafter the City or Discharger) owns and operates the Terminal Island Water Reclamation Plant (TIWRP), a publicly owned treatment works (POTW) located at 445 Ferry Street, San Pedro, California, with a design capacity of 30 million gallons per day (mgd). Tertiary-treated recycled water produced at the TIWRP is either discharged to the Los Angeles Harbor or it is further treated on-site at the Advanced Water Purification Facility (AWPF), which includes microfiltration and reverse osmosis (MF/RO). This process is part of the Harbor Water Recycling Project (HWRP) and it produces recycled water that may be used for various purposes throughout the Los Angeles Harbor area. Up to 6 mgd of the recycled water from the AWPF is currently permitted to be injected into the Dominguez Gap to prevent seawater intrusion as part of the Dominguez Gap Barrier Project. The proposed WDRs/WRRs will increase the recycled water production at the AWPF from 6 mgd to 12 mgd and increase the permitted recycled water contribution injected into the aquifer from 50% to 100% recycled water.

The discharge of tertiary-treated effluent to the Los Angeles Harbor is regulated under waste discharge requirements contained in Order No. R4-2015-0119, adopted by this Regional Water Board on June 11, 2015, and subsequently amended on October 08, 2015. Production of advanced treated recycled water at the AWPF for reuse in the Dominguez Gap Barrier Project is regulated by Order No. R4-2003-0134 (adopted October 02, 2003) and its subsequent amendments, R4-2010-0183 (adopted October 07, 2010), and R4-2011-0034 (adopted February 03, 2011), and R4-2003-0134-A03 (adopted October 08, 2015).

On the basis of preliminary staff review and application of lawful standards and regulations, the California Regional Water Quality Control Board (Regional Water Board), Los Angeles Region, tentatively proposes to issue waste discharge requirements, including effluent limitations and special conditions.
