Subject: Former Long Beach Naval Complex IR Site 7 Dredging Project

Dear Mr. Lyons:

The Port of Long Beach (Port) is proposing to dredge up to approximately 800,000 cubic yards of contaminated sediments from Areas of Ecological Concern (AOEC-A, AOEC-CE, and AOEC-CW) within the Installation Restoration (IR) Site 7, located in the Port's West Basin (former Long Beach Naval Complex). Additional work includes demolishing an existing abandoned sonar calibration pier and retrieval of four sunken barges. The dredged material will be placed in the approved Pier G slip fill, in accordance with the Navy's Proposed Plan and the Consent Agreement between the Port and the California Environmental Protection Agency (Cal/EPA) Department of Toxic Substances Control (DTSC). The proposed dredging project is the last step to fulfill the designated remediation goals for the former Long Beach Naval Complex site.

Please find attached the master dredging permit application, permit fee check, and a CD containing electronic copies of the supplemental application information and Pre-Design Sediment Sampling Report. The attachments contain detailed information on the project description, dredging method, site history, and sediment sampling data.

Accordingly, the Port respectfully requests Waste Discharge Requirements (WDRs) from the Regional Water Quality Control Board for dredging and disposal of dredged material related to the proposed project.

If you have any questions, please contact Janna Watanabe, at (562) 590-4160.

Sincerely,

Richard D. Cameron
Director of Environmental Planning
