NOTICE OF PUBLIC HEARING

**PROPOSED ISSUANCE OF
 WASTE DISCHARGE REQUIREMENTS (WDRs) AND
 NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM (NPDES) PERMIT**

Discharger	Discharge Location	Receiving Water
City of Los Angeles, Bureau of Sanitation (Los Angeles-Glendale Water Reclamation Plant)	4600 Colorado Boulevard Los Angeles, CA 90039	Los Angeles River

The City of Los Angeles, Bureau of Sanitation (Discharger) discharges tertiary-treated effluent from its Los Angeles-Glendale Water Reclamation Plant (LAGWRP) to the Los Angeles River, a water of the United States. The Discharger and the City of Glendale jointly own the LAGWRP, a publicly owned treatment works located at 4600 Colorado Boulevard, Los Angeles, California, with a design capacity of 20 million gallons per day. The Discharger is granted sole authority to operate LAGWRP pursuant to the Joint Powers Agreement between the two cities. The LAGWRP treats wastewater consisting of domestic and industrial wastewater. The wastewater is generated from the cities of Glendale, Burbank, Los Angeles, La Cañada Flintridge, and from Los Angeles Zoo. Treatment at the LAGWRP consists of preliminary treatment (bar screening and grit removal); primary treatment (primary sedimentation and scum removal); secondary treatment (activated sludge biological treatment with nitrification and denitrification); secondary sedimentation with coagulation; tertiary treatment (aqua cloth and deep bed sand filtration); disinfection with ammonium hydroxide and sodium hypochlorite; and dechlorination with sodium bisulfite. Tertiary-treated effluent is discharged from the LAGWRP to the Los Angeles River at the discharge point 001 (Latitude 33.137155° N, Longitude 118.275088° W)

The LAGWRP is part of the City of Los Angeles' integrated network of facilities, known as the Hyperion Treatment System (HTS), which includes four treatment plants. The three upstream treatment plants (Donald C. Tillman WRP, LAGWRP, and Burbank WRP) discharge biosolids, solids, and excess flows via the HTS for downstream treatment at the Hyperion Water Reclamation Plant.

The discharge is regulated under WDRs contained in Order Number R4-2017-0063, adopted by the California Regional Water Quality Control Board Los Angeles Region (Los Angeles Water Board), on March 2, 2017. Order Number R4-2017-0063 serves as a permit under the National Pollutant Discharge Elimination System (NPDES Number CA0053953). The Discharger filed a report of waste discharge (ROWD) and applied for reissuance of its WDRs and NPDES permit on October 29, 2021, to discharge tertiary-treated effluent. The application was deemed complete on March 28, 2022. The terms and conditions of the current NPDES order have been automatically continued and remain in effect until new WDRs and NPDES permit are adopted pursuant to this Order. On the basis of preliminary staff review and application of lawful standards and regulations, the Los Angeles Water Board, tentatively proposes to issue consolidated WDRs and NPDES permit under Title 40 of the Code of Federal Regulations (40 CFR) § 124.4(c)(2).
