Subject: Local water problem

August 5, 2018

Dear Ms. Owens,
In recent weeks, we've been aware of water quality problems here at Channel Islands Harbor, in Ventura County.

Apparently, since NRC Energy shut down circulation pumps in the Edison Canal, in Oxnard, at the Mandalay Generating Station, we've been having water circulation problems on the canal here at Seabridge Harbor.

We have heard that algae blooms due to runoff on farms, etc., suck out the oxygen from the water resulting in fish dying. The city of Oxnard has installed 6 aerators to help oxygenate the water.

However, this is likely to be a longterm problem, and we would like the state to be aware of it. We appreciate anything you can do to prevent and eliminate this problem.

Sincerely,
Roxana and Bob Chappell
(roxanachappell@yahoo.com), or:

Mr. and Mrs. Robert Chappell
1421 Seabridge Lane
Oxnard, CA. 93035
