

Los Angeles Regional Water Quality Control Board

July 13, 2018

Mr. Robert Usab
Director, HESQ
Polynt Composite USA Inc.
2801 Lynwood Road,
Lynwood, CA 90262

Dear Mr. Usab:

TENTATIVE TERMINATION OF WASTE DISCHARGE REQUIREMENTS (WDRs) AND NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM (NPDES) PERMIT FOR POLYNT COMPOSITES USA, INC., LYNWOOD FACILITY, LYNWOOD, CA. (NPDES NO. CA0063908, CI NO. 7655)

Reference is made to the WDRs and NPDES permit adopted by this Regional Water Board for the discharge of treated storm water runoff from the Polynt Composite USA, Inc. (hereinafter, the Discharger), Lynwood Facility (hereinafter, the Facility), located at 2801 Lynwood Road, Lynwood, California. The discharge of treated storm water from the Facility to Compton Creek is currently regulated by the NPDES permit No. CA0063908 under Order No. R4-2015-0199. Order No. R4-2015-0199 was adopted on October 8, 2015, and is scheduled to expire on November 30, 2020. Your letter dated June 11, 2018, requested termination of the NPDES permit because the Discharger ceased operation at the Facility, and the Facility and equipment onsite have been decommissioned, decontaminated, and are undergoing demolition. Therefore, the discharge of storm water associated with industrial activities to surface water from the Facility will be eliminated. As such, the Regional Water Board concluded that the NPDES permit regulating the discharge is no longer needed.

In accordance with administrative procedures, this Regional Water Board, at a public hearing, will consider the enclosed tentative Order, which will terminate the requirements in Order No. R4-2015-0199. The hearing will be held on **September 13, 2018, at 9:00 a.m.**, at the **Ventura County Government Center Hearing Room, 800 South Victoria Avenue, Ventura, California**. The Board members will hear any testimony pertinent to this matter. It is expected that the Board will take action at the hearing; however, as testimony indicates, the Board, at its discretion, may order further investigation.

Written comments regarding this tentative Order must be received at the Regional Water Board office by the close of business on **August 14, 2018**, in order to be evaluated by Regional Water Board staff and included in the Board's agenda folder. Timely submittal of written comments is encouraged to ensure that all comments are accurately and fully included in the administrative record, that Regional Water Board staff is able to provide timely review, and that Board members have sufficient time to give full consideration to the comments and issues raised. The Board chair

may exclude from the record written materials received after this date (See California Code of Regulations, title 23, section 648.4.).

Should any future activities at the subject Facility result in new discharges of any wastewater to any surface waters of the United States, you are required to file a Report of Waste Discharge with this Regional Water Board and secure a permit prior to discharge.

If you have any questions, please contact Ching Yin To at (213) 576-6696.

Sincerely,

Cris Morris, P.E., Chief
Watershed Regulatory Section

Enclosure
