<u>DISCHARGER</u>	<u>DISCHARGER LOCATION</u>	<u>RECEIVING WATER</u>
Metropolitan Stevedore Company	1045 Pier G Avenue, Berth 212 Long Beach, CA 90802	Long Beach Inner Harbor

Metropolitan Stevedore Company (hereinafter Discharger, or Permittee), is the operator of Bulk Marine Terminal (hereinafter Facility), a marine bulk cargo handling and storage facility located in Long Beach, California. The Port of Long Beach owns the property, and the Discharger leases the property from the Port of Long Beach. The Facility discharges up to 900,000 gallons per day (gpd) of treated stormwater and process wastewater from Discharge Point 001 (Latitude 33.7445 ° N, Longitude 118.2041° W), to Long Beach Inner Harbor, a water of the United States, within the Dominguez Channel and Los Angeles/Long Beach Harbors Watershed. The discharge is regulated under waste discharge requirements contained in Order No. R4-2015-0052, adopted by the Los Angeles Water Board on March 12, 2015. Order No. R4-2015-0052 also serves as a permit under the National Pollutant Discharge Elimination System (NPDES No. CA0057746) program. The Discharger filed a Report of Waste Discharge (ROWD) and applied to the California Regional Water Quality Control Board, Los Angeles Region (Los Angeles Water Board) for renewal of waste discharge requirements (WDRs) and an NPDES permit on November 1, 2019, to discharge treated stormwater and process wastewater into the Long Beach Inner Harbor. The application was deemed complete on July 27, 2020. The terms and conditions of the current NPDES permit have been automatically continued and remain in effect until new WDRs and NPDES permit are adopted pursuant to the proposed Order.

On the basis of preliminary staff review and application of lawful standards and regulations, the Los Angeles Water Board, tentatively proposes to issue waste discharge requirements, including effluent limitations and special conditions.
