DISCHARGER	FACILITY LOCATION	RECEIVING WATER

The City of Burbank, Public Works Department (hereinafter the City or Discharger), discharges tertiary-treated wastewater from its Burbank Water Reclamation Plant (Burbank WRP) to the Burbank Western Channel, a tributary to the Los Angeles River, a water of the United States, at Discharge Point 002 (Latitude 34.182778° N, Longitude 118.316111° W). The City owns the Burbank WRP, a publicly-owned treatment works located at 740 N. Lake Street, Burbank, California, with a design capacity of 12.5 million gallons per day (MGD). The City of Burbank contracts with Veolia North America (formerly known as Suez) to operate the Burbank WRP. The discharge is regulated under waste discharge requirements contained in Order No. R4-2017-0064, adopted by the California Regional Water Quality Control Board, Los Angeles Region (Los Angeles Water Board) on March 2, 2017. Order No. R4-2017-0064 serves as a permit under the National Pollutant Discharge Elimination System (NPDES No. CA0055531). The Discharger filed a Report of Waste Discharge (ROWD) and applied for reissuance of Waste Discharge Requirements (WDRs) and NPDES permit on November 1, 2021, to discharge tertiary-treated wastewater to the Los Angeles River. The application was deemed complete on February 17, 2022. The terms and conditions of the current NPDES permit have been automatically continued and remain in effect until new WDRs and NPDES permit are adopted pursuant to the proposed Order.

On the basis of preliminary staff review and application of lawful standards and regulations, the Los Angeles Water Board tentatively proposes to issue waste discharge requirements and the NPDES permit under Title 40 of the Code of Federal Regulations (40 CFR) § 124.4(c)(2).
