REQUEST FOR COMMENTS ON THE TENTATIVE AMENDED TIME SCHEDULE ORDER REQUIRING SENTINEL PEAK RESOURCES CALIFORNIA, LLC, INGLEWOOD OIL FIELD TO COMPLY WITH REQUIREMENTS PRESCRIBED IN ORDER NUMBER R4-2018-0020 - SENTINEL PEAK RESOURCES CALIFORNIA, LLC, INGLEWOOD OIL FIELD, LOS ANGELES, CA (N.P.D.E.S. NUMBER CA0057827, CI NUMBER 6240)

Dear Mr. Walters:

On April 17, 2019, the California Regional Water Quality Control Board, Los Angeles Region (Regional Water Board) received your request for an extension of the current Time Schedule Order (T.S.O.) Number R4-2018-0021 to allow additional time to come into compliance with the final effluent limitation for total petroleum hydrocarbons (TPH). In response to the request, a tentative amendment to the T.S.O. has been developed for the Inglewood Oil Field.

TPH was first regulated in discharges from the Inglewood Oil Field in the National Pollutant Discharge Elimination System (N.P.D.E.S.) Permit Number CA0057827, Order Number R4-2018-0020, which was adopted on February 8, 2018. Concurrently with that permit, the Regional Water Board issued a Time Schedule Order (T.S.O. Number R4-2018-0021), which included a sixteen-month compliance period to achieve compliance with the effluent limitations for copper, lead, zinc and TPH.

The enclosed tentative T.S.O. Number R4-2018-0021-AX includes additional time for Sentinel Peak Resources California, LLC to comply with the final effluent limitation for TPH of 100 micrograms per liter contained in Order Number R4-2018-0020. The mass limits in the tentative T.S.O. have been revised due to an error in the mass limit calculations for T.S.O. Number R4-2018-0021. The final compliance date of March 31, 2023, allows the Discharger to install and test technologies to treat TPH in the discharges from the Inglewood Oil Field.
