Technical Report – Anterra Services, Inc.  
27151U Tapia Canyon Road  
Castaic, CA 91384

The purpose of this letter is to respond to your December 18, 2015 letter requesting information about sumps associated with Anterra Services, Inc. facility located on Tapia Canyon Road in Castaic CA. Please note this facility is comprised of two production wells, only one of which is active. This well, API 3722956 produces 2-3 barrels of oil per day. The produced water associated with this production is transferred via pipeline directly into what we call a "Wash Tank". This Wash Tank is a bolted steel tank that contains the water until it is transferred to our injection wells located in Oxnard, CA for disposal.

Over the course of 2015, 112 bbls of produced water was generated during production activities. As stated above, this produced water was held in Anterra's Wash Tank until one truck load was hauled to the Oxnard facility, located at 1933 East Wooley Road, Oxnard CA, for disposal. Produced water is never discharged to the ground or to a sump at this site.

This situation was discussed with Mr. Josh Cwikla of your staff. Please see attached.

*I, Frank Staben, certify under penalty of law that I have personally examined and am familiar with the information submitted in this document and all attachments and that, based on my inquiry of those individuals immediately responsible for obtaining this information, I believe that the information is true, accurate and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment.*

Thank you,

A handwritten signature in black ink that reads "Frank Staben". The signature is fluid and cursive.

Frank Staben  
Vice President, Board of Directors  
Anterra Energy Services, Inc.
