Re: Los Angeles Regional Water Quality Control Board regarding California Water Code
Directive Pursuant to Section 13267 – Order to Submit Information

The original order to submit information was received during the year-end holiday season, and in order to research the required information, George Kahn Operating Company requested an extension from your office, which was granted and the request was approved on January 15, 2016, with the due date extended to February 18, 2016.

Historical documents have shown that George Kahn Operating Company does not have a sump on its property. George Kahn Operating Company does not dispose of waste into any pond or sump. To the best of my knowledge, and through an in depth search of our records, I have found no evidence of any discharges on the site.

Water produced in oil operations is pumped to Oil Operators, Inc. for disposal. Water volume produced averages 8,500 barrels of water per month.

I, Aurora Lee, certify under penalty of law that I have personally examined and am familiar with the information submitted in the document and all attachments and that, based on my inquiry of those individuals immediately responsible for obtaining the information, I believe that the information is true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment.
