REPORT: 09/23/2015
@~0810 hours

I arrived at the complainant's address. No sewer odors were detected. Since it was street sweeping from 8-10am, I drove around the neighborhood to survey the area and attempt to find a parking spot. I eventually just parked in the prohibited zone and called the complainant. A message was left advising her of my presence, and that no odors were detected, but that I would check the potential sources.

To the west or at present upwind of the complainant:

A trash/refuse odor was noted near EDCO, a trash transfer station where recycling is also conducted, and a petroleum odor was detected near the Patterson, Darby, and Meader leases.

With no sewer odor detected upwind of the complainant and none in the immediate area, the disposition of this complaint is source not identified.

The Graner Darby & Meader Lease has removed the well-head gas fueled ICEs and replaced it with submersible pumps. I imaged the lease with the FLIR and only found a small emission from a releasing breather safety valve connected to the water tank. Due to my concern with the release, I spoke with Will Simons of Graner Oil, who dispatched staff from Allen Davis Construction to do maintenance on the breather.

A minor(potential) violation was identified, which was immediately corrected.

RECENT ASSIGNMENTS:

09/23/2015	No. 1517229	Inspector: VJ01	Activity: EQUIPMENT LIST INSPECTION	Inspection Date: 09/23/2015
08/16/2013	No. 1384288	Inspector: VJ01	Activity: EQUIPMENT LIST INSPECTION	Inspection Date: 08/16/2013
