Subject: RE: Wastewater disposal information for Investigative Order R4-2015-0377
Attachments: Hill well.pdf

Please see attached invoices for the Mitchell Grossu Well. Since I have recently been asked to help with the wells it has been a learning experience to say the least. I have attached all of the paper work that I could locate to try and answer your questions. If there is something that I need to provide in the future please let me know so that I can try and be prepared to get you the information that you need. Thank You for your patience.

Subject: Wastewater disposal information for Investigative Order R4-2015-0377

Mr. Wes Beninga,

Thank you for your response regarding Investigative Order R4-2015-0377. After receiving your response and verifying the information on DOGGR's website, I've found the following:

- Mitchell-Grossu Oil Company operates one (1) wells, designated as active.
- For 2015, Mitchell-Grossu Oil Company produced a cumulative total of **0 (zero)** bbls disposed through the sanitation district.
- There are no DOGGR records indicating wastewater injection.

As a follow up to your response, please provide the following for further clarification:

- Permit numbers and the respective sanitation district the wastewater is disposed into for each lease operated.
- Verify volumes disposed into the sanitation districts. Volumes are provided in the excel spreadsheet attached to this email. The volumes were obtained from DOGGR's database.
- Provide method for obtaining volumes if different from the numbers obtained from DOGGR (e.g. metered flow rates)
- Any other waste disposition methods that were not previously mentioned (e.g. waste manifest tickets from vac truck disposal, 3rd party operators)
- Verify total amount of wells currently operated by Mitchell-Grossu and **associated companies.**

Please kindly provide a response by April 10th, 2016. If you have any questions, please feel free to contact me.

Thank you,

Adam Taing
