RE: Submittal of Information regarding Production disposal fluids

To Whom It May Concern,

This letter is to certify that there has been no discharges that have occurred from the Seguro Well which is located in Huntington Beach CA since Ronald Brindle has owned the well. The well is operated by John Thomas Jr by the Brindle/Thomas Partnership. The oil and water that the well produces flows into the Catalina Tank Farm located at 18851 Goldenwest St. Huntington Beach. The water is disposed of through the Orange County Sanitation District with a waste water disposal permit. There has been no drilling or well completion on this well since Ronald Brindle took possession of the well. There has been no discharges from the Well since Ronald Brindle took possession. There is a concrete lined well cellar where the well head is. There are no know sumps at this well.

Sincerely,

Kathy Thomas

Operations Manager

CALIFORNIA WATER CODE DIRECTIVE PURSUANT TO SECTION 13267 – ORDER TO SUBMIT INFORMATION – THE DISPOSAL OF WELL DRILLING FLUIDS, WELL COMPLETION FLUIDS, AND PRODUCTION FLUIDS TO LAND FOR RONALD I. BRINDLE OIL AND GAS OPERATIONS IN LOS ANGELES AND VENTURA COUNTY, CALIFORNIA

Dear Mr. Brindle:

The California Regional Water Quality Control Board, Los Angeles Region (Regional Board), is the public agency with primary responsibility for the protection of ground and surface water quality within the major portions of Los Angeles and Ventura Counties.

Recently, the California State Legislature has requested that the State Water Resources Control Board (State Water Board) obtain information from operators of oil and gas production facilities regarding the management of fluids associated with oil and gas production and the potential impacts on water quality. As you know, a common oil and gas industry practice is to discharge oil production fluids to land, typically into sumps or produced water ponds.

Operator contact information available from the California Division of Oil, Gas, and Geothermal Resources (DOGGR) has identified Ronald I. Brindle as an operator of oil and gas wells within either DOGGR District One or Two, or as an operator within multiple DOGGR Districts. The enclosed Order issued pursuant to section 13267 of the California Water Code requires the submittal of technical reports regarding information on how fluids associated with oil and gas production are managed within the fields you operate. The Regional Board will provide this information to the State Water Board. If you currently do not operate any oil and gas facility within Los Angeles or Ventura Counties, please respond to this Order with such information.
